
APPENDIX F

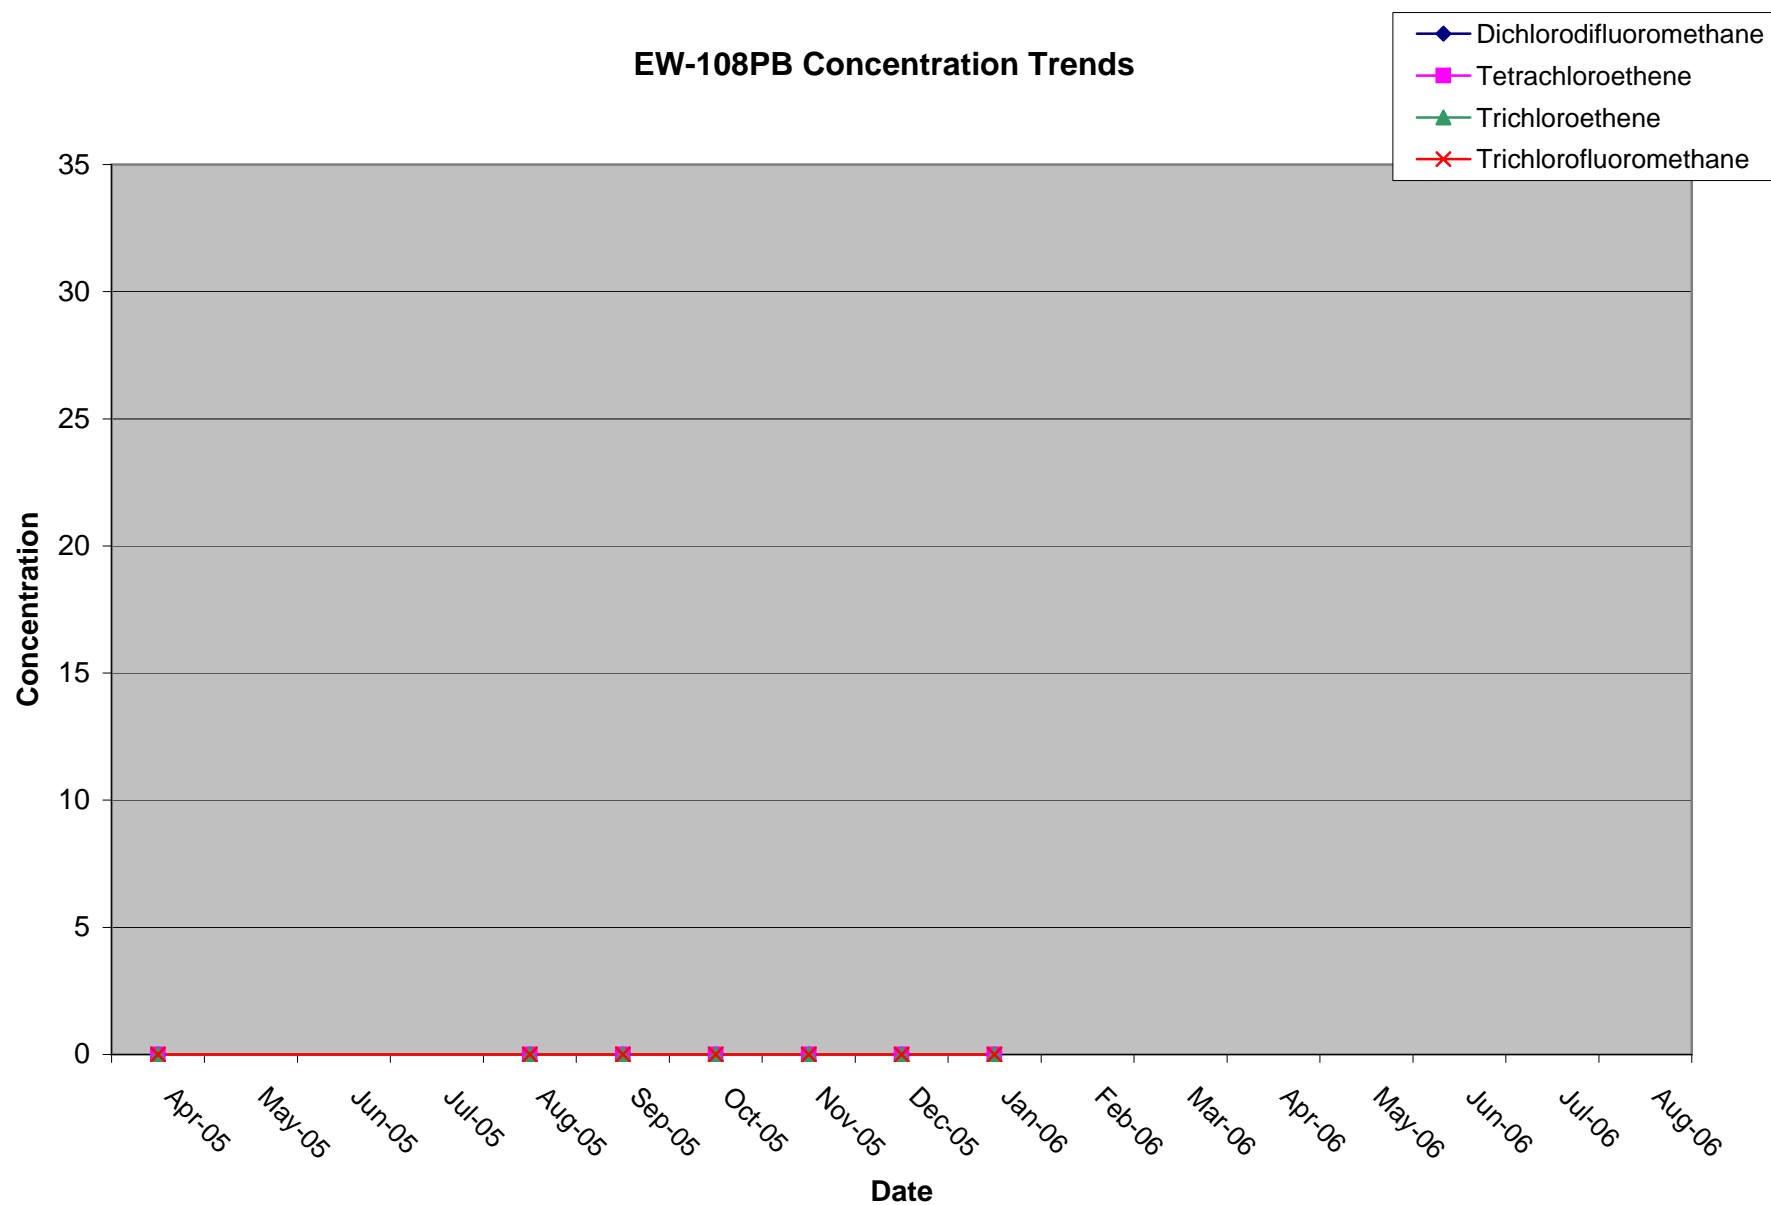

Muscoy OU Concentration Plots for Individual Wells

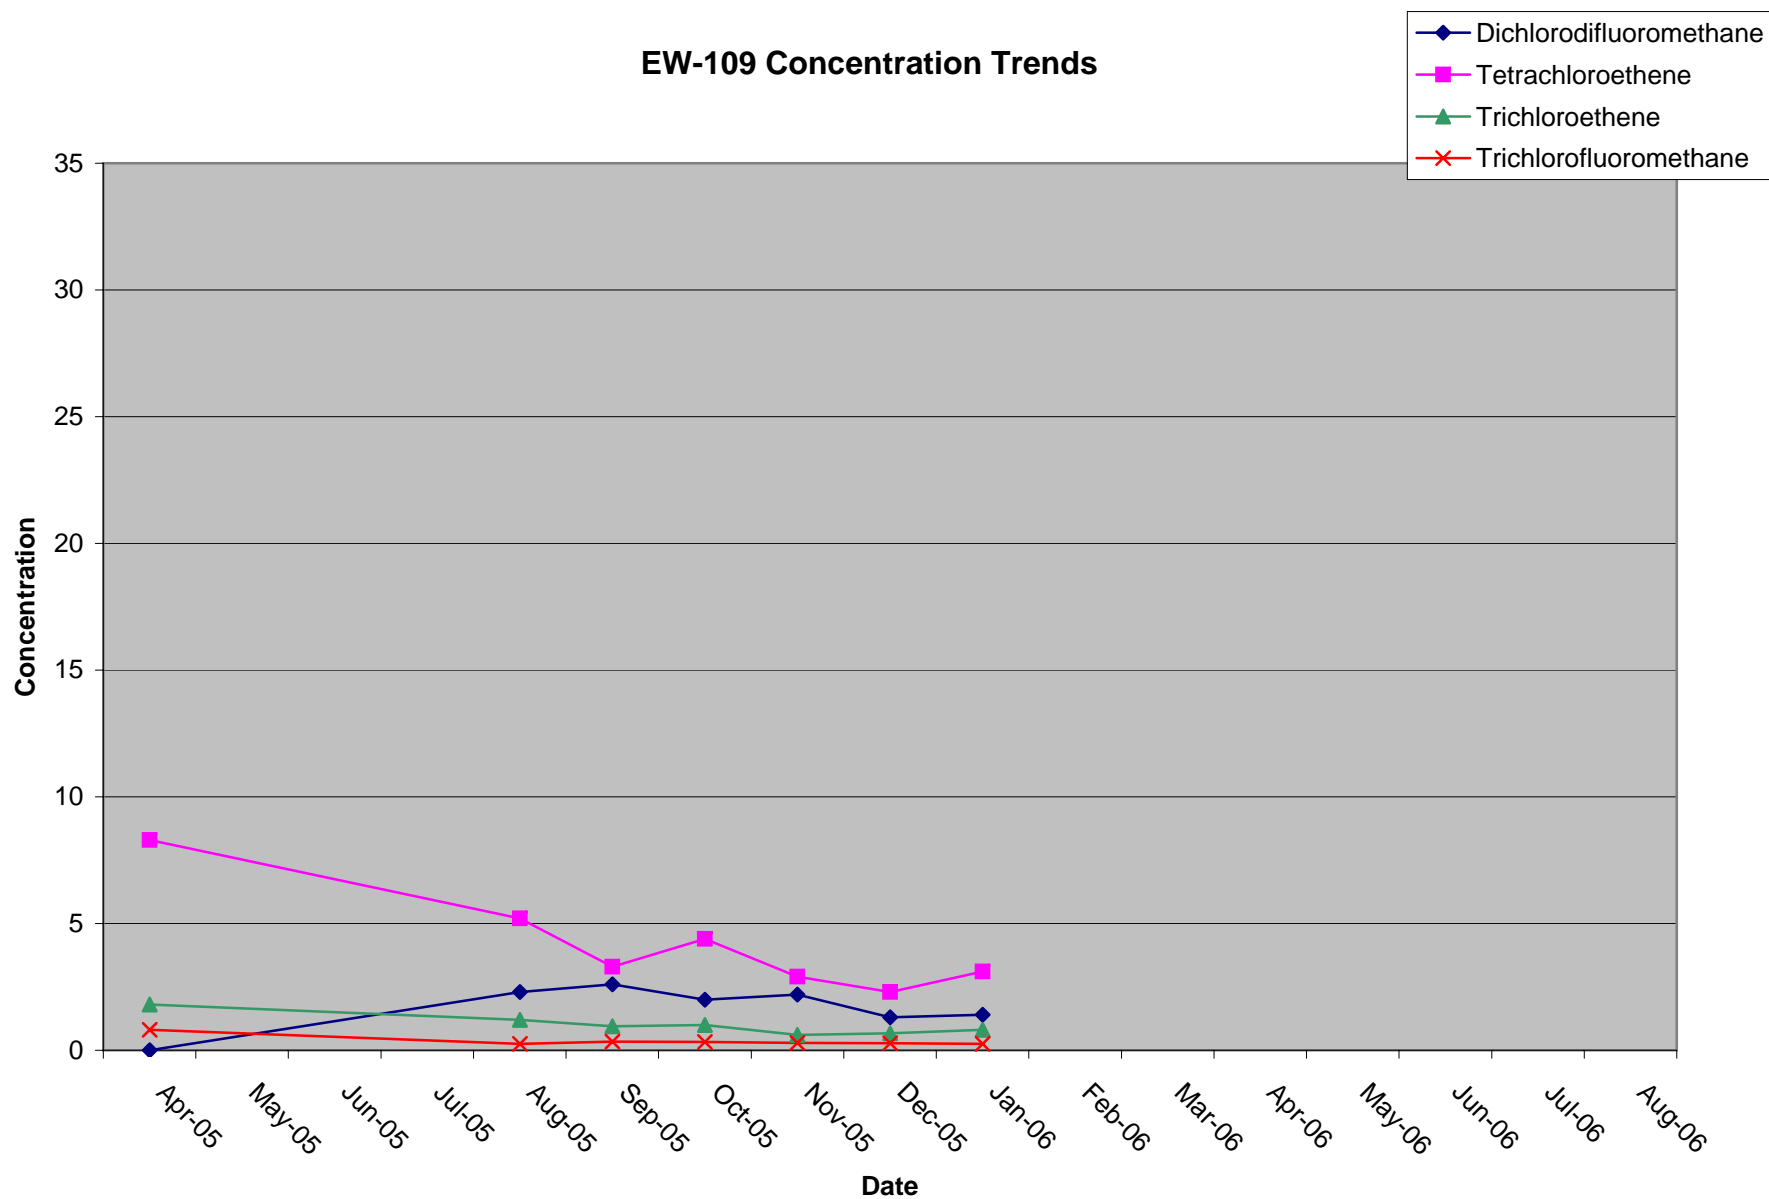

*Analyte results that are non-detect are entered as zero for graphing purposes.

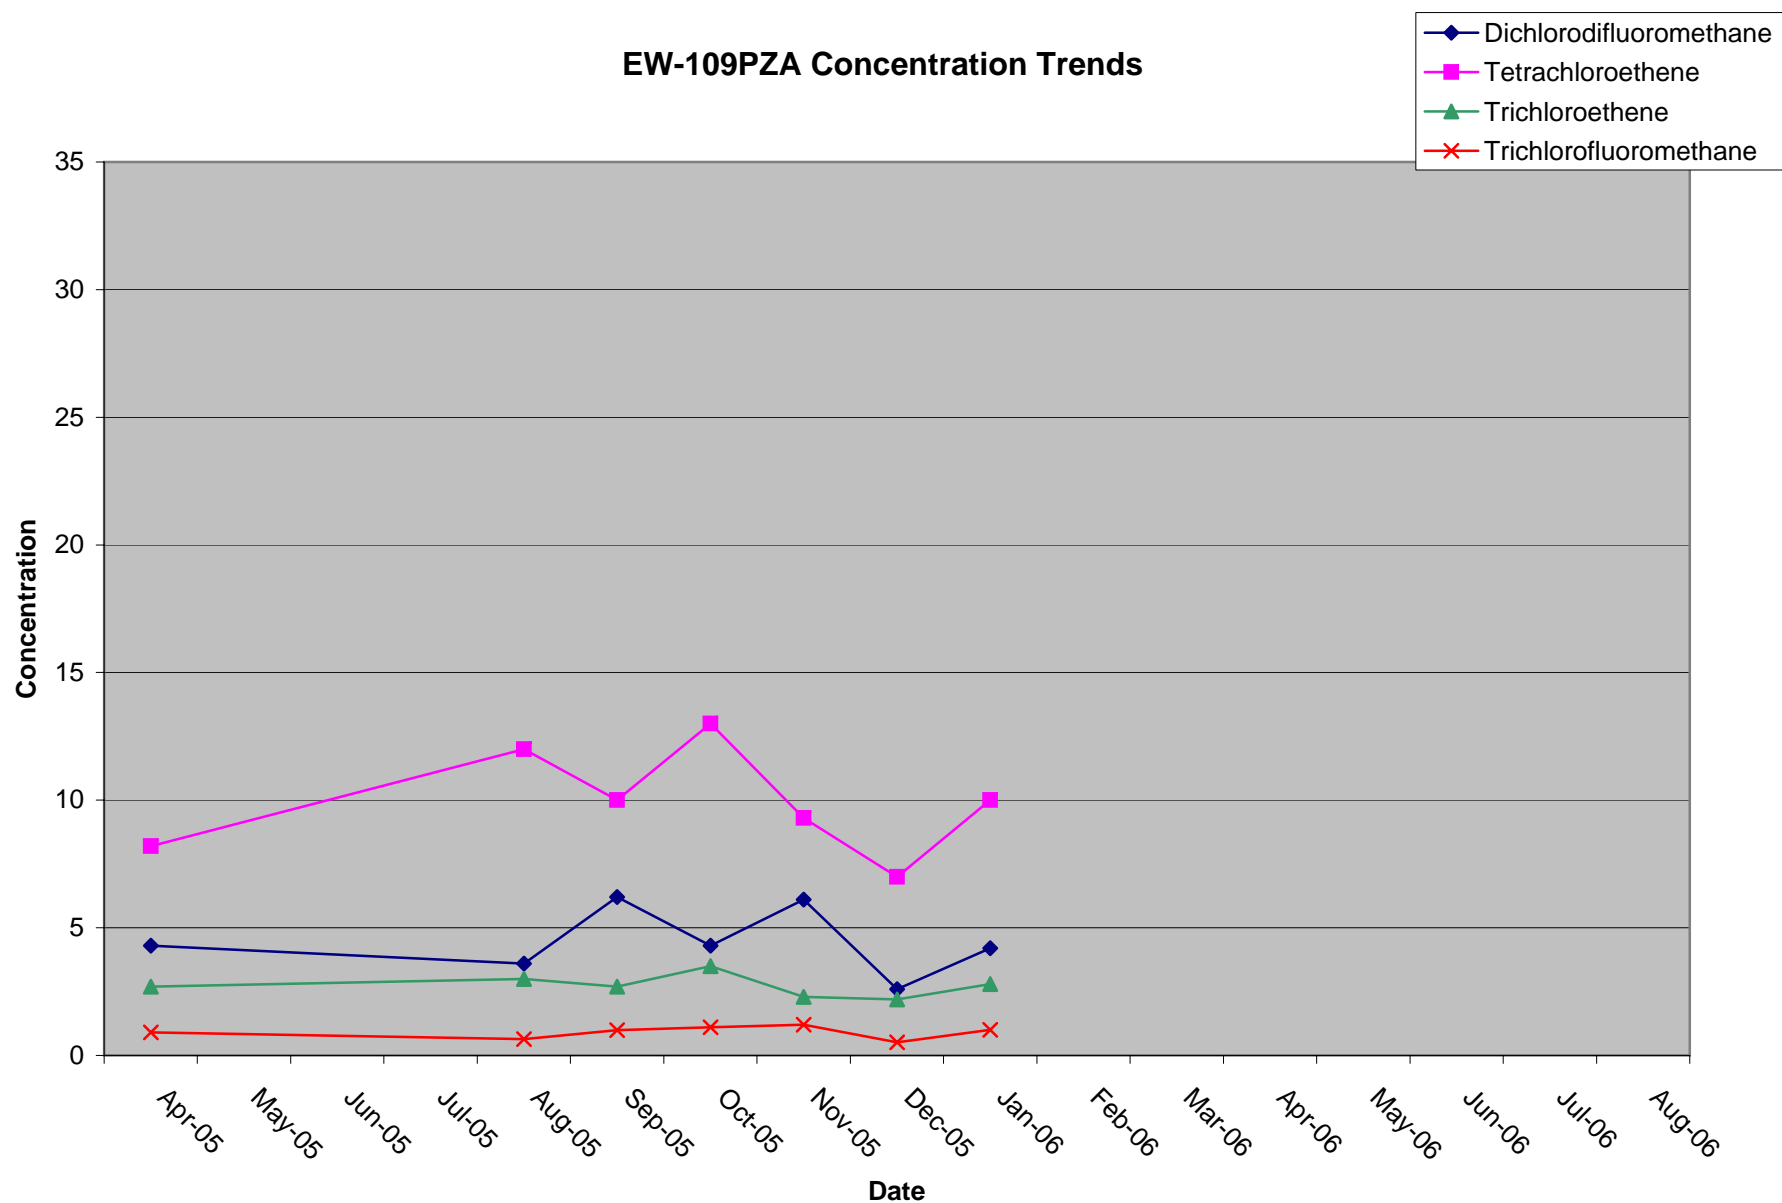

*Analyte results that are non-detect are entered as zero for graphing purposes.

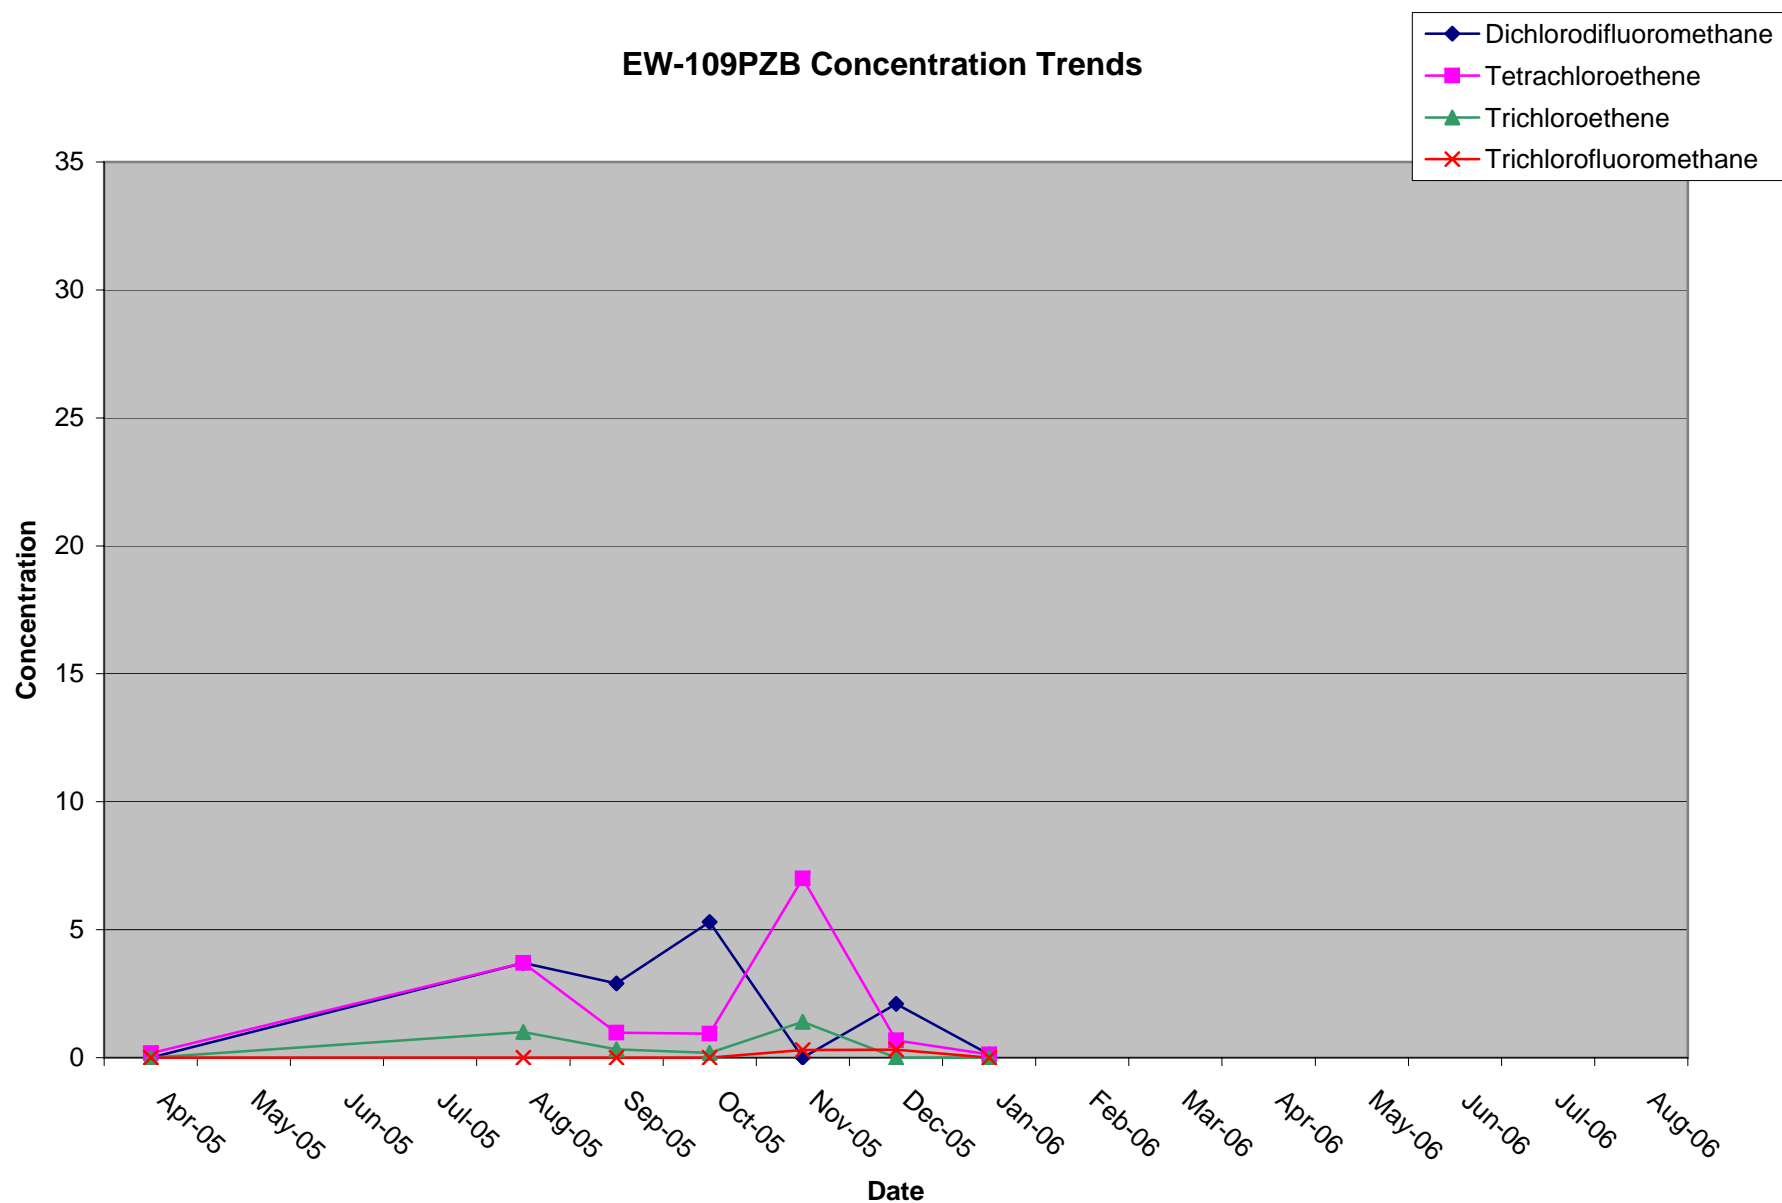

*Analyte results that are non-detect are entered as zero for graphing purposes.

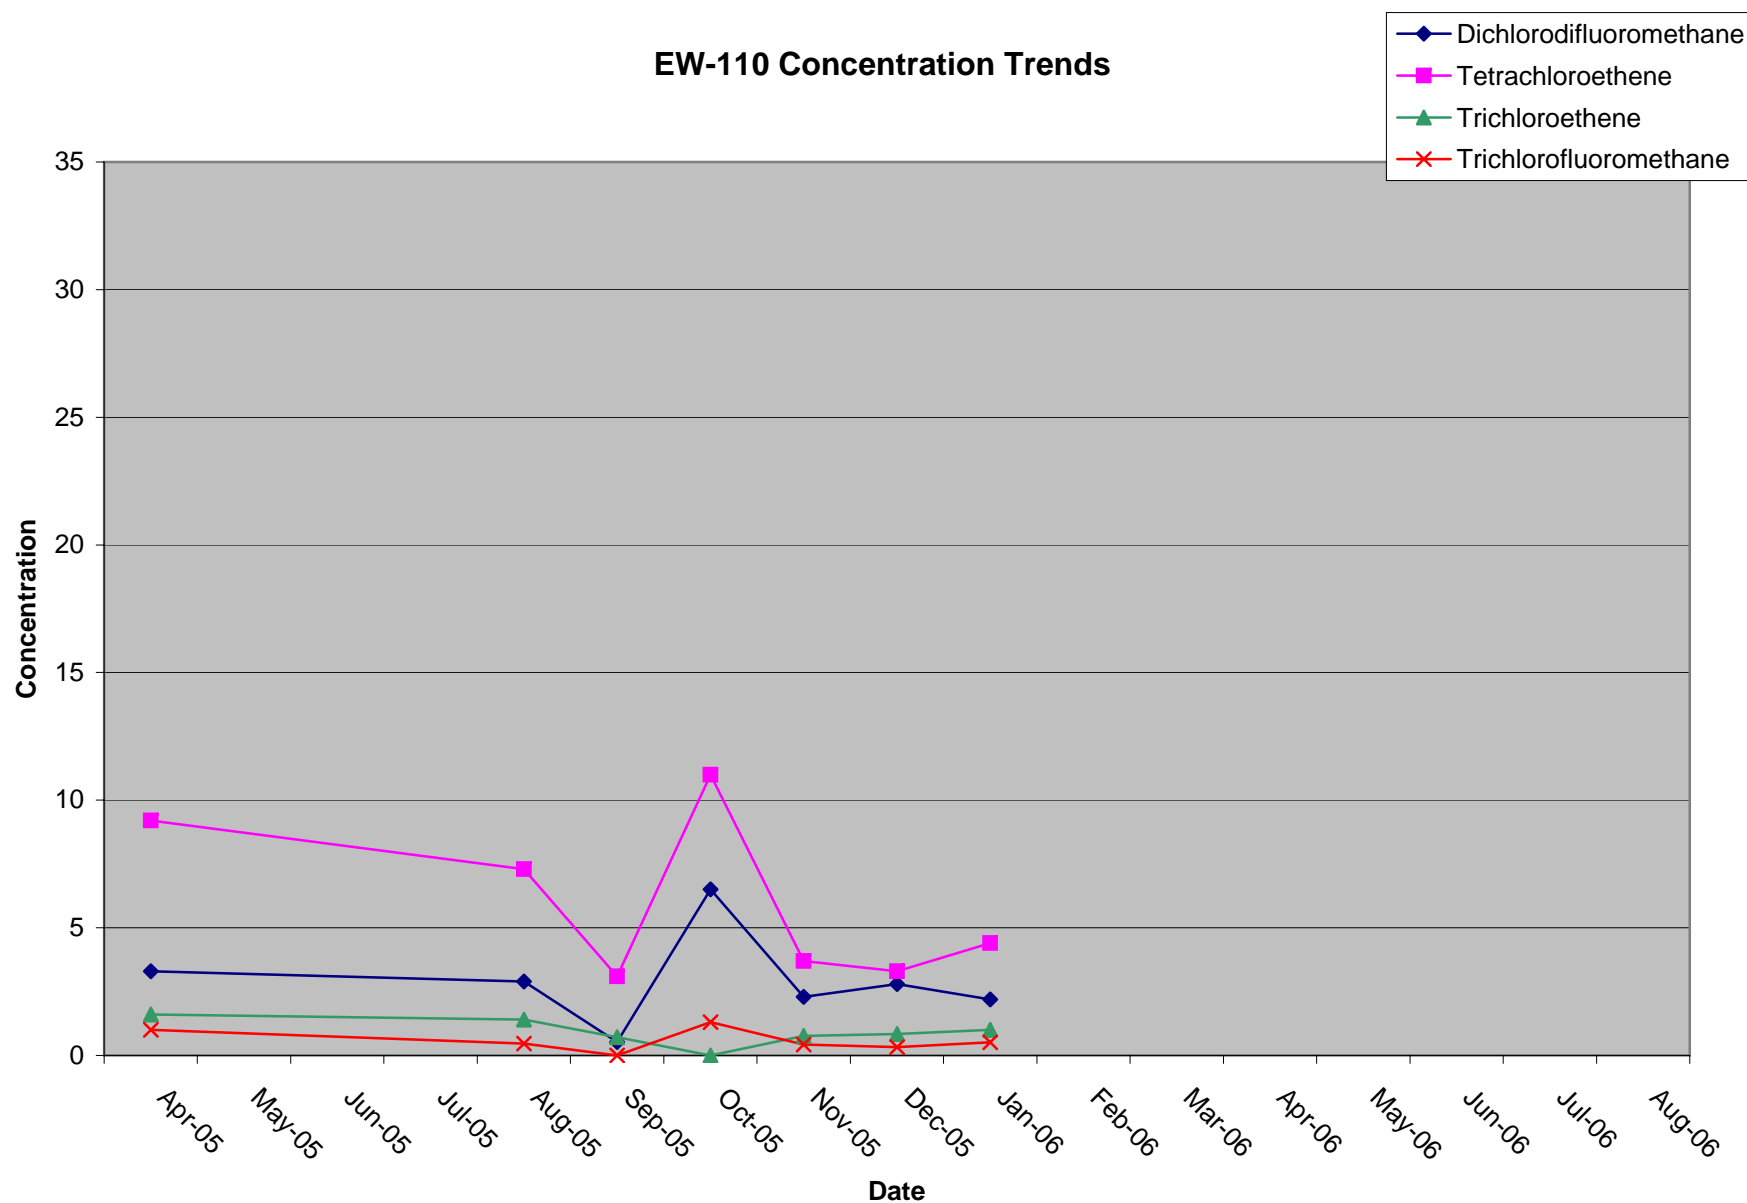

*Analyte results that are non-detect are entered as zero for graphing purposes.

*Analyte results that are non-detect are entered as zero for graphing purposes.

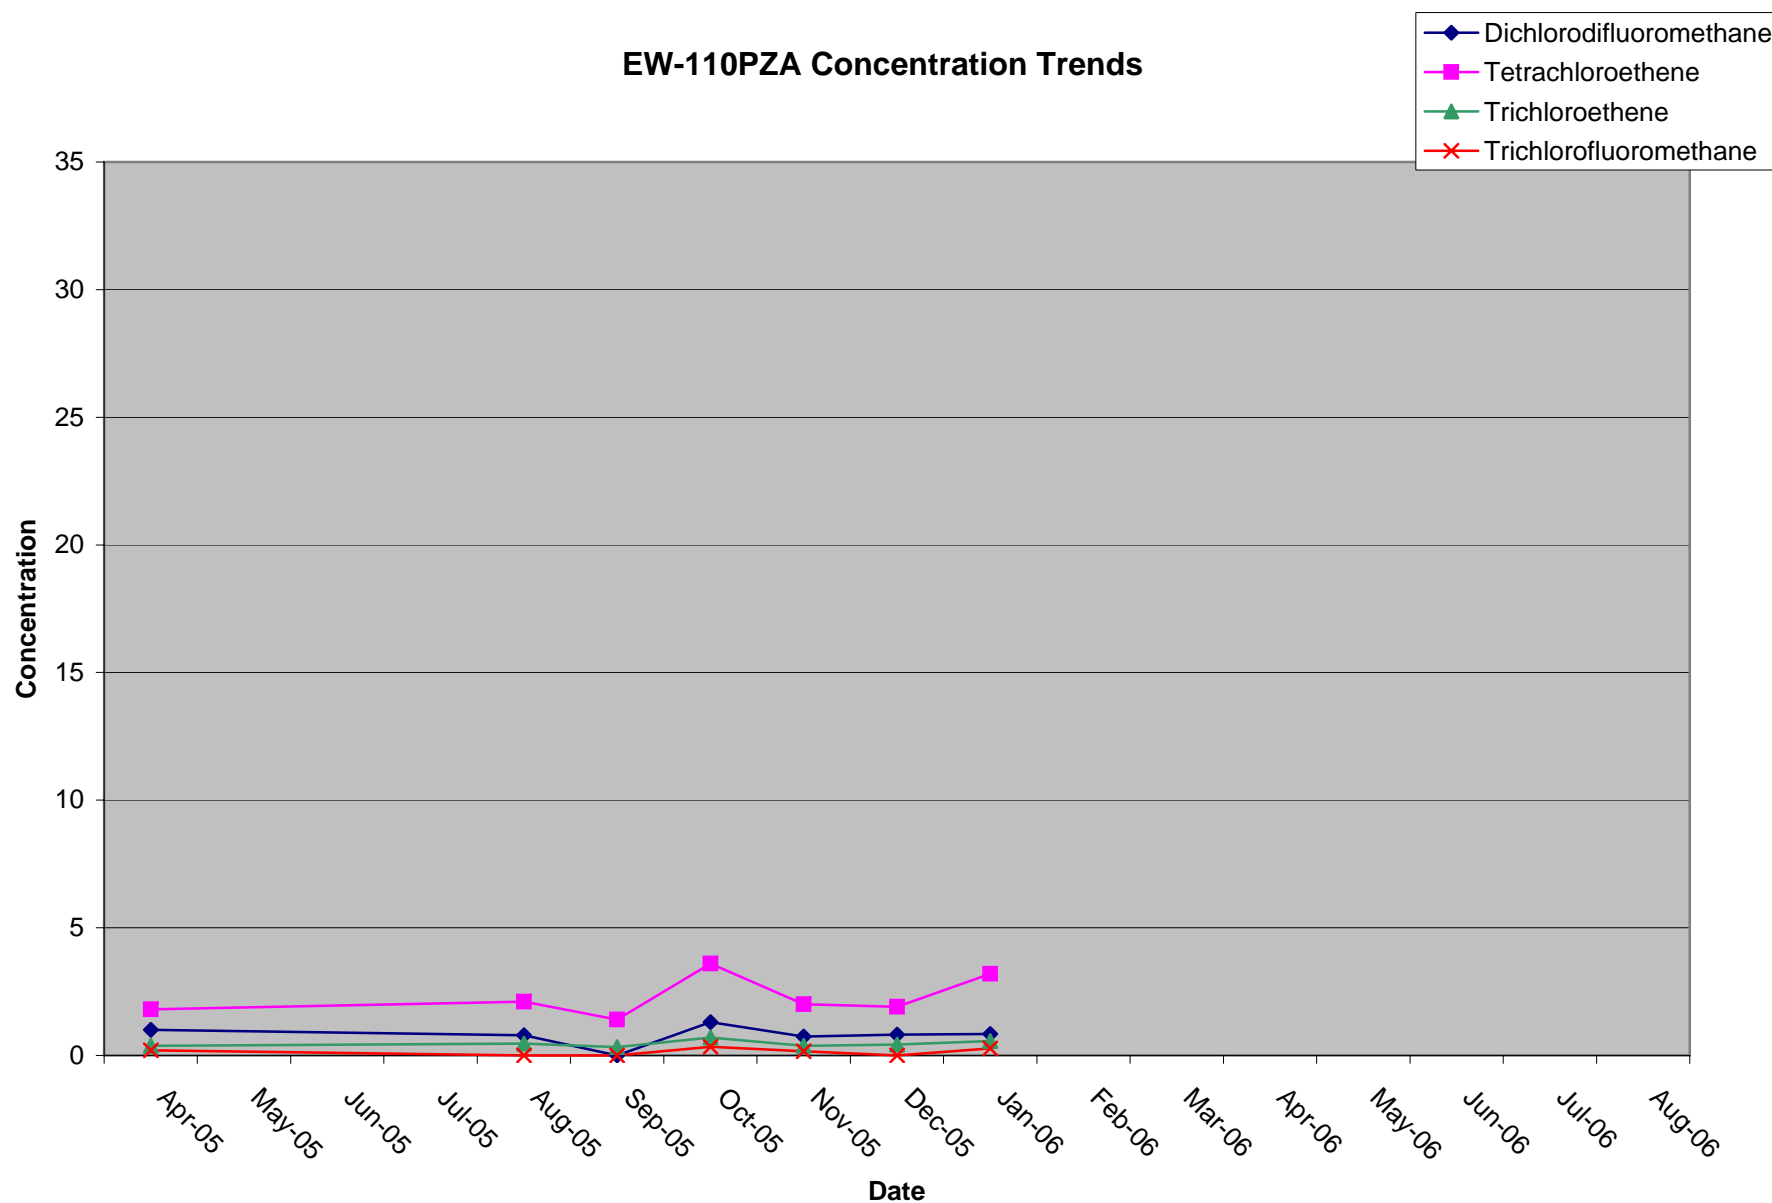

*Analyte results that are non-detect are entered as zero for graphing purposes.

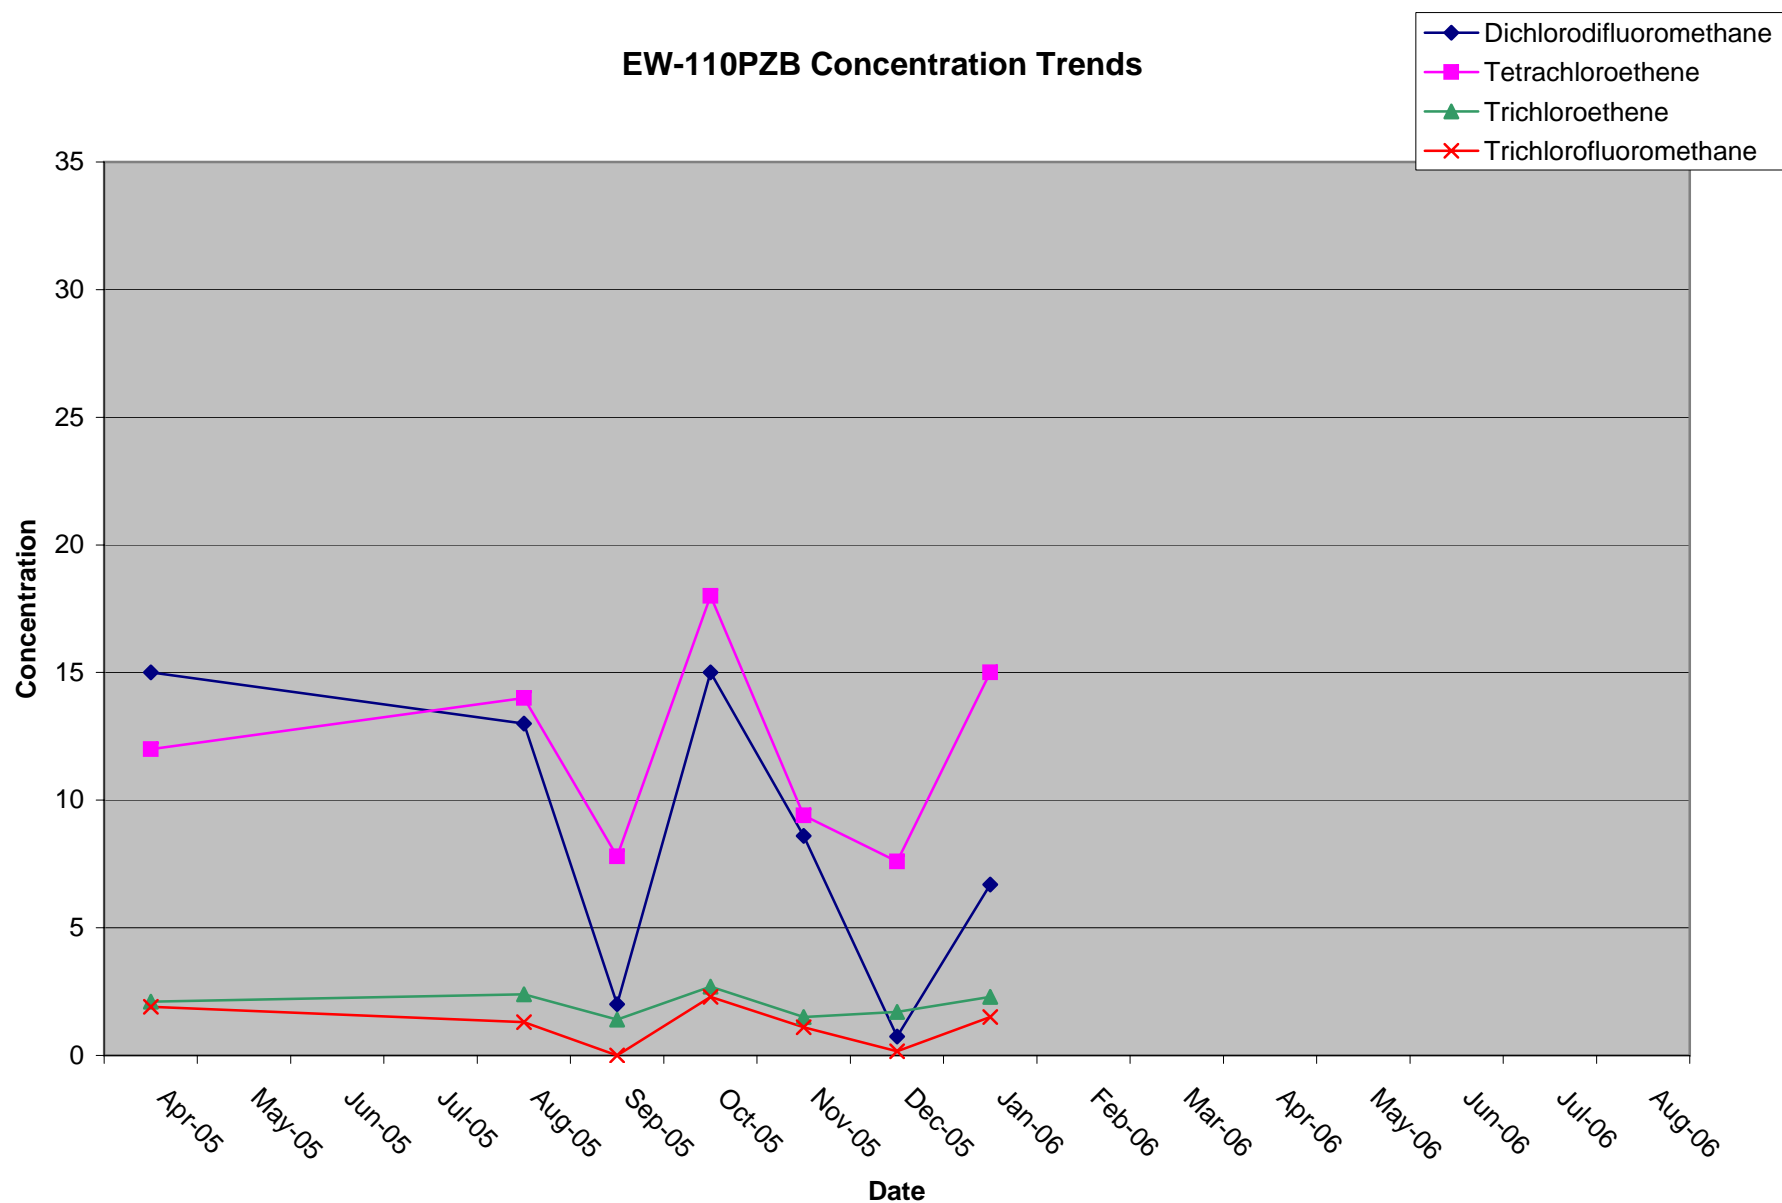

*Analyte results that are non-detect are entered as zero for graphing purposes.

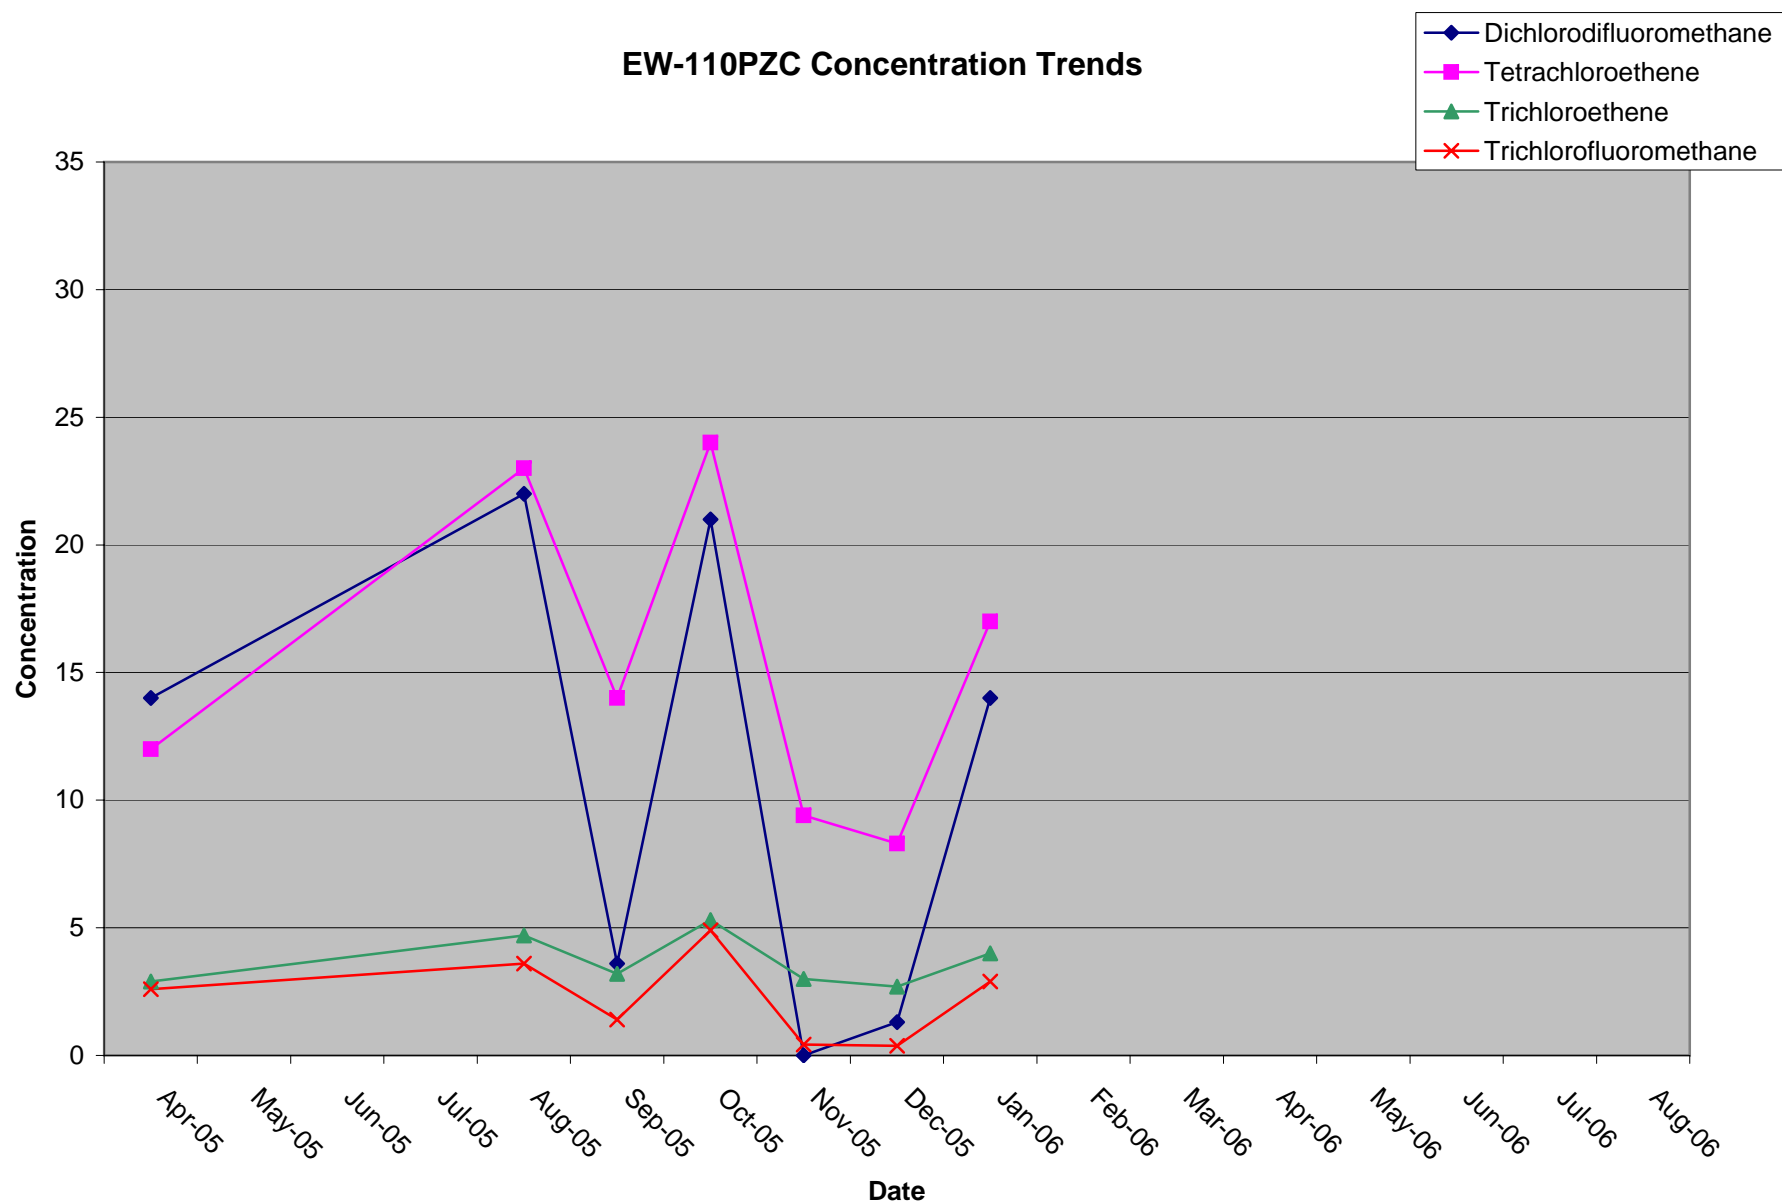

EW-110PZA Concentration Trends

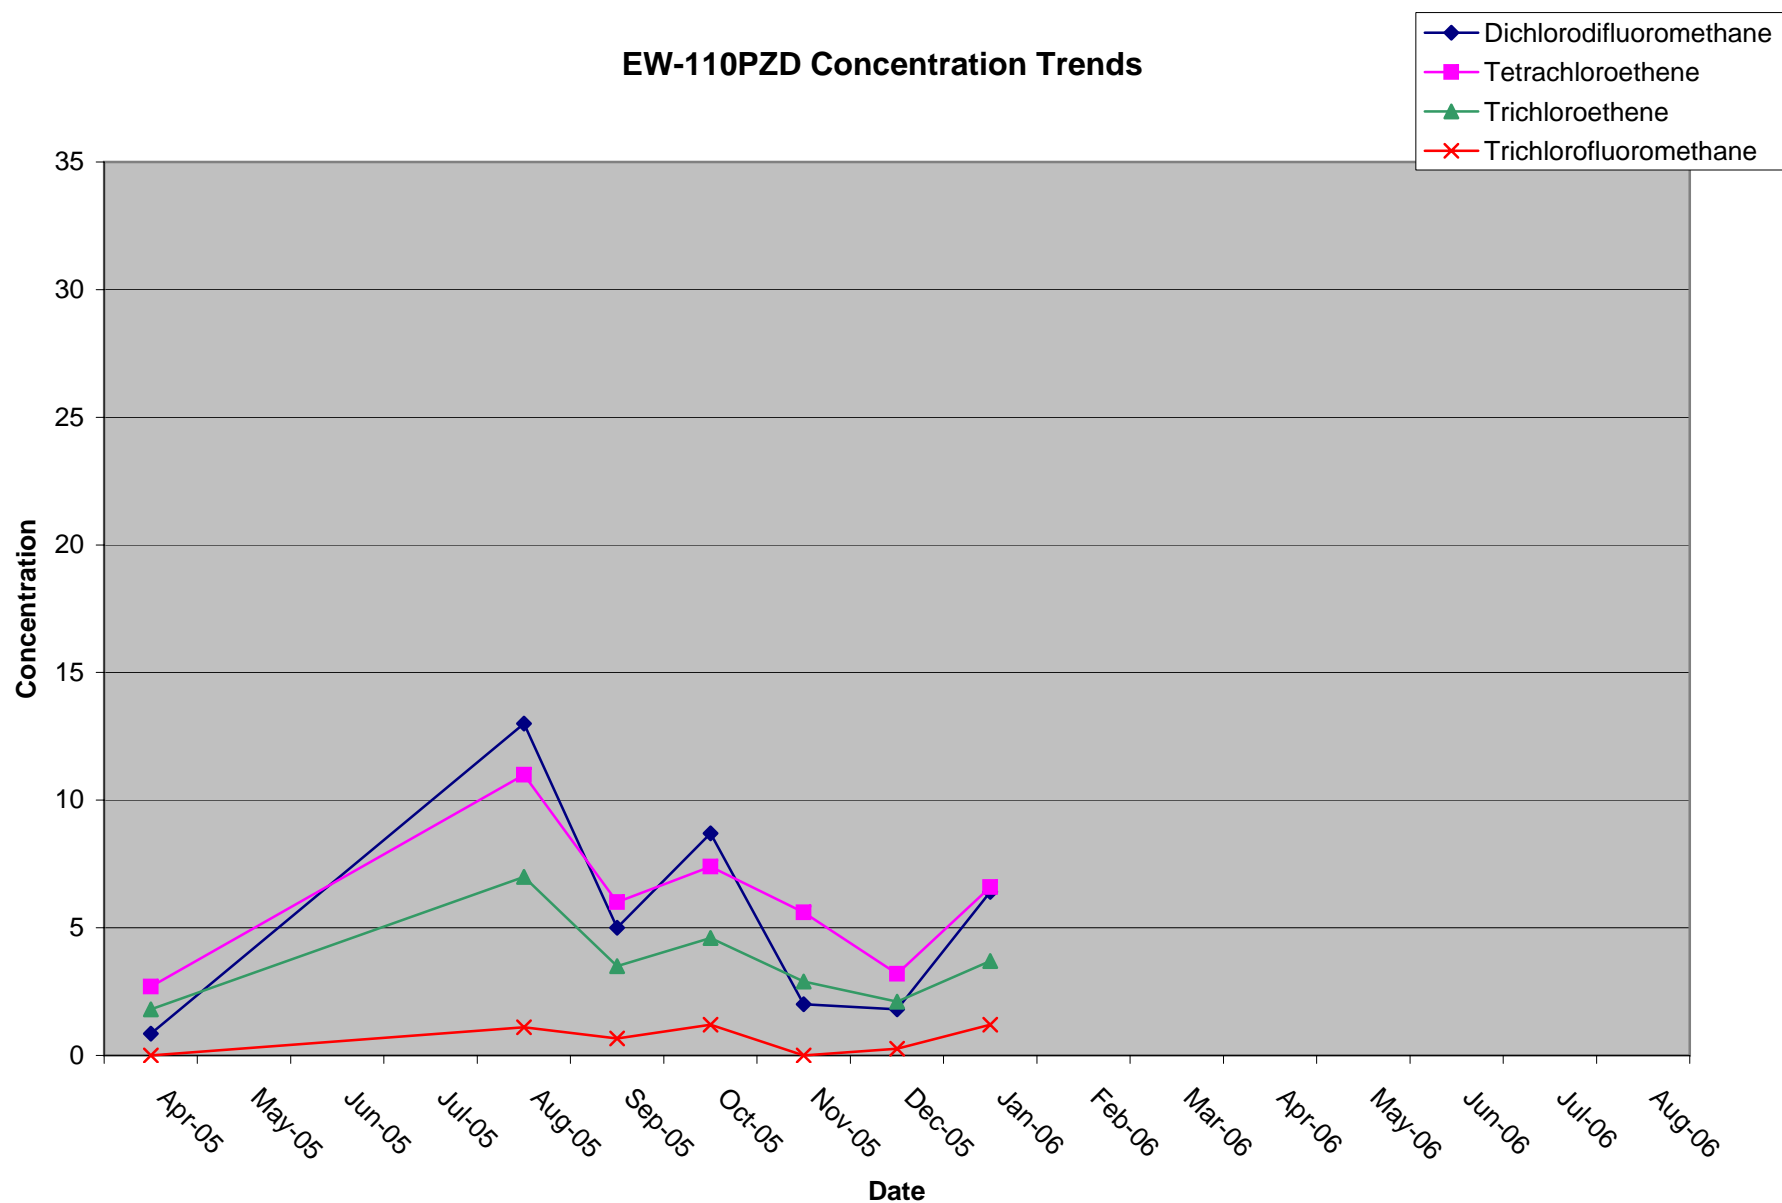

*Analyte results that are non-detect are entered as zero for graphing purposes.

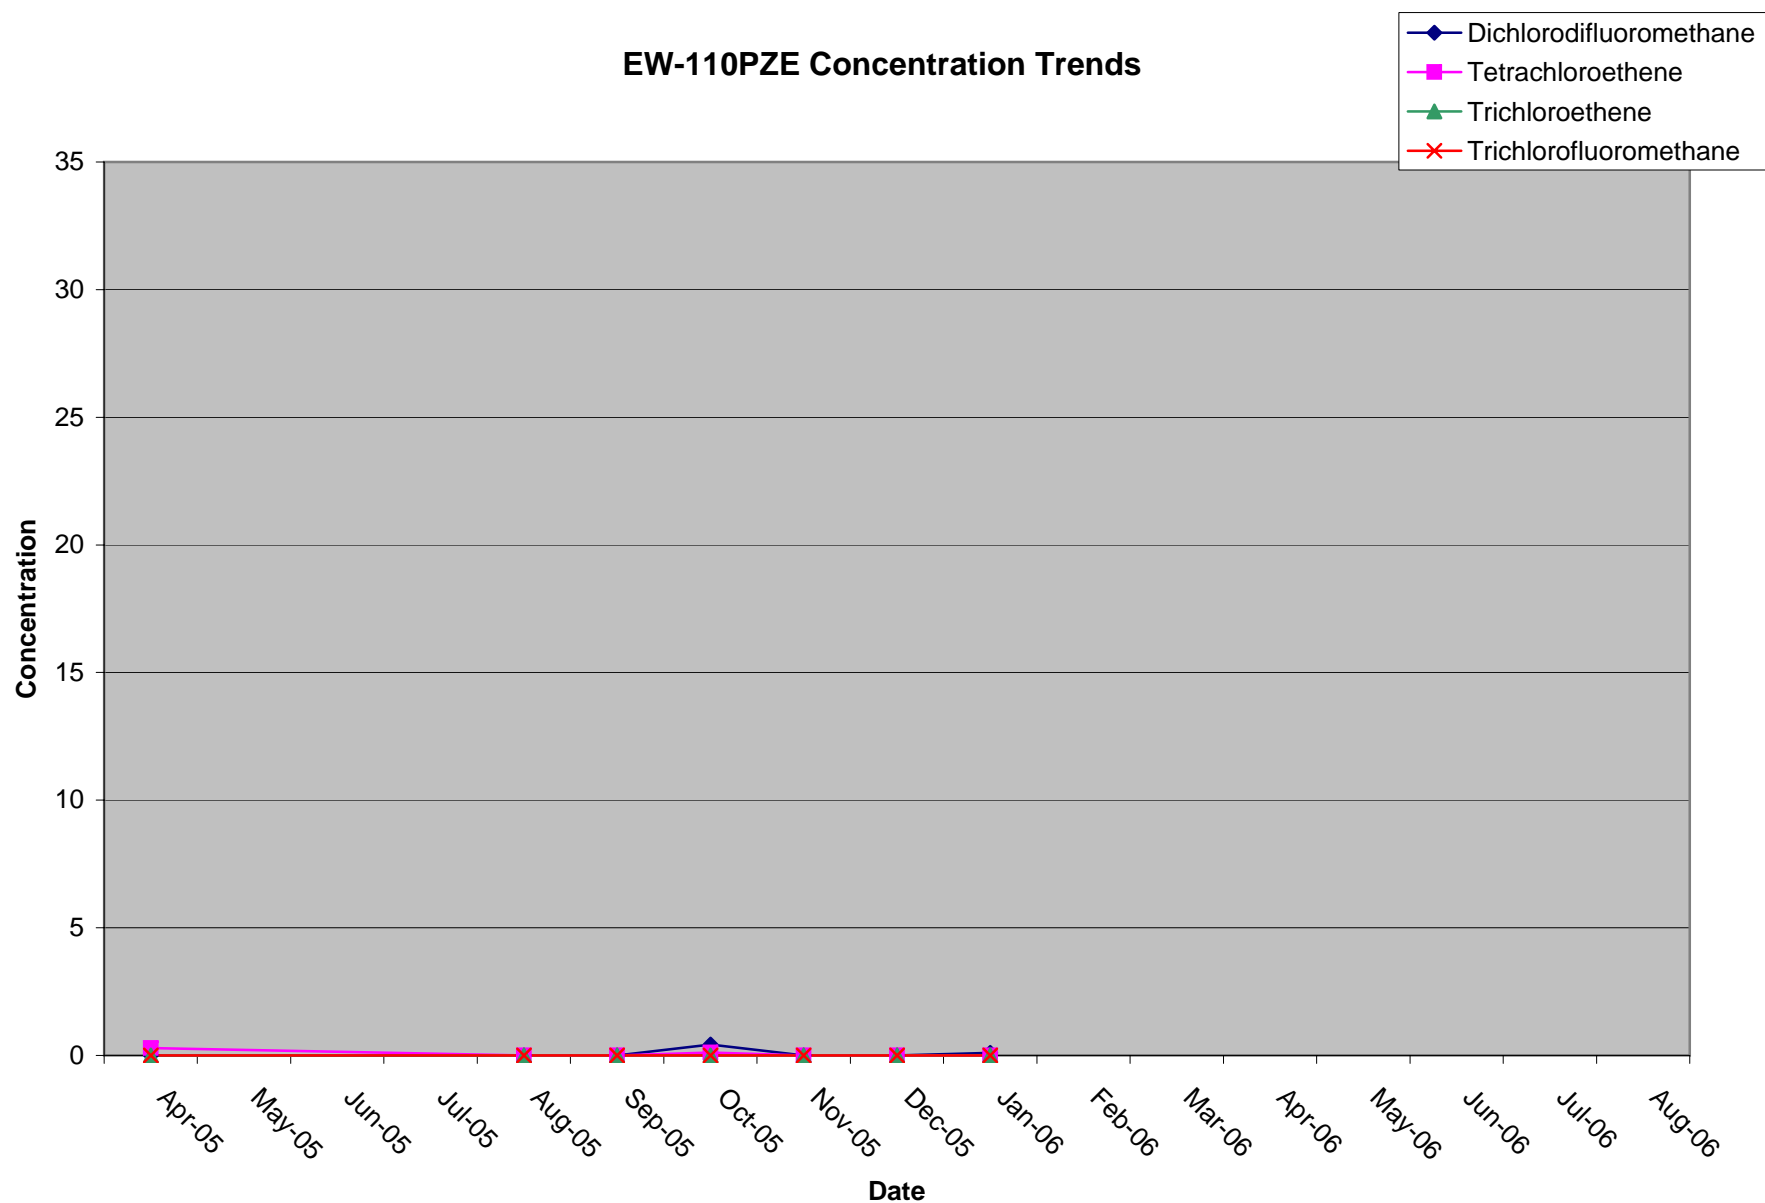

*Analyte results that are non-detect are entered as zero for graphing purposes.

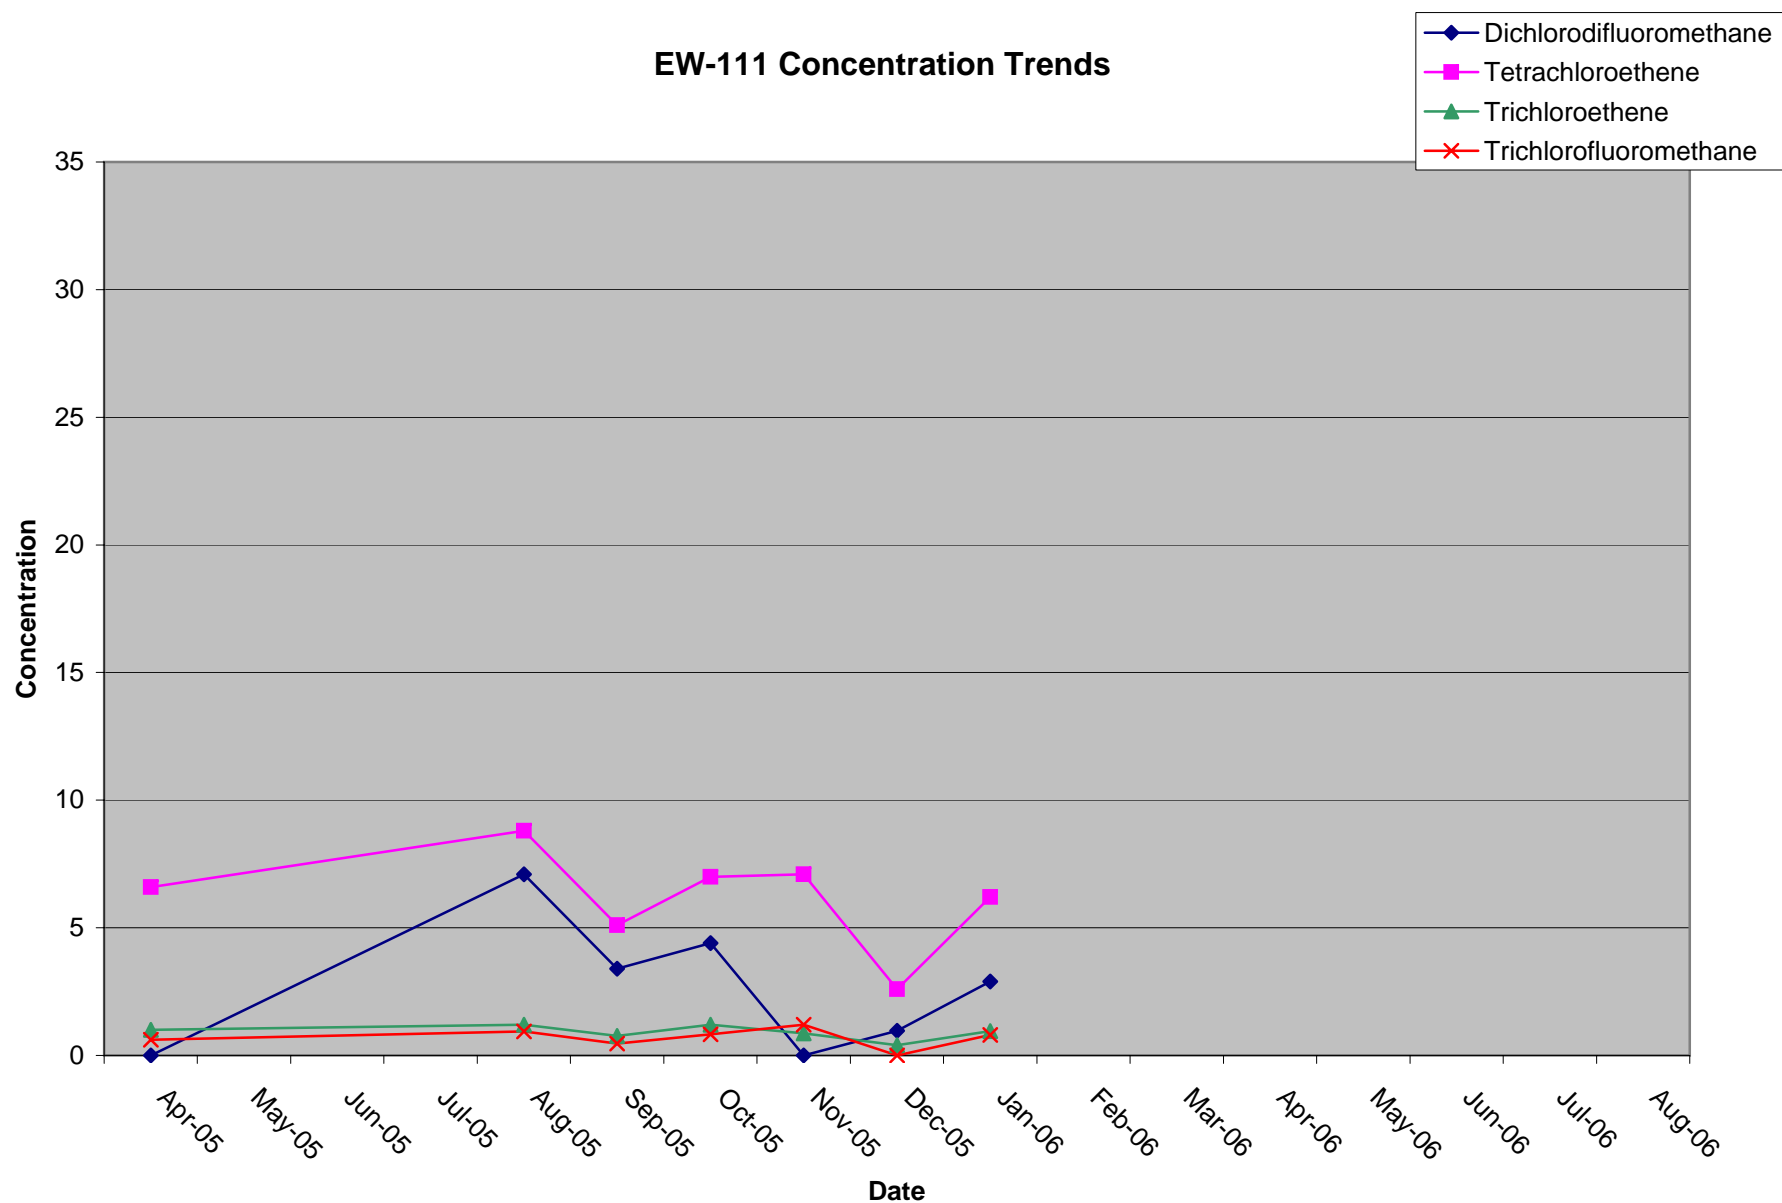

*Analyte results that are non-detect are entered as zero for graphing purposes.

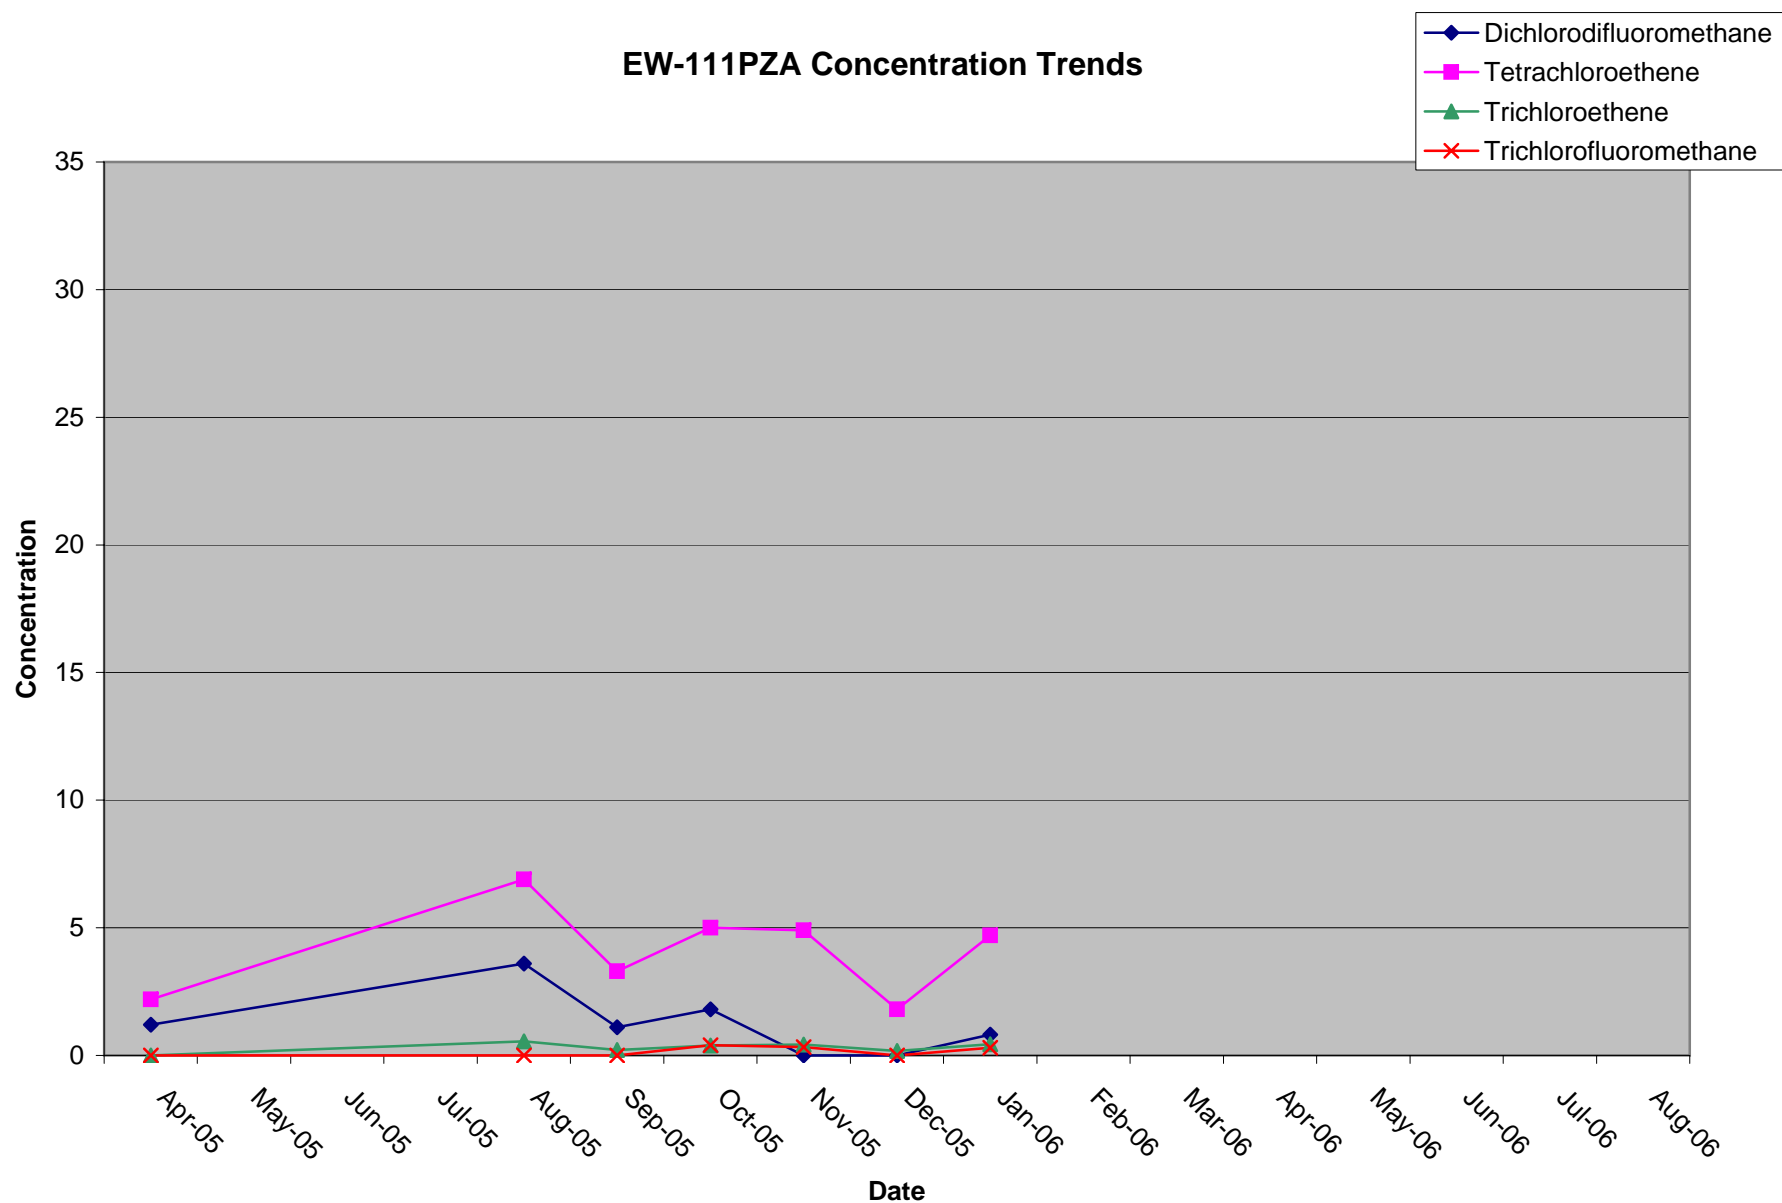

*Analyte results that are non-detect are entered as zero for graphing purposes.

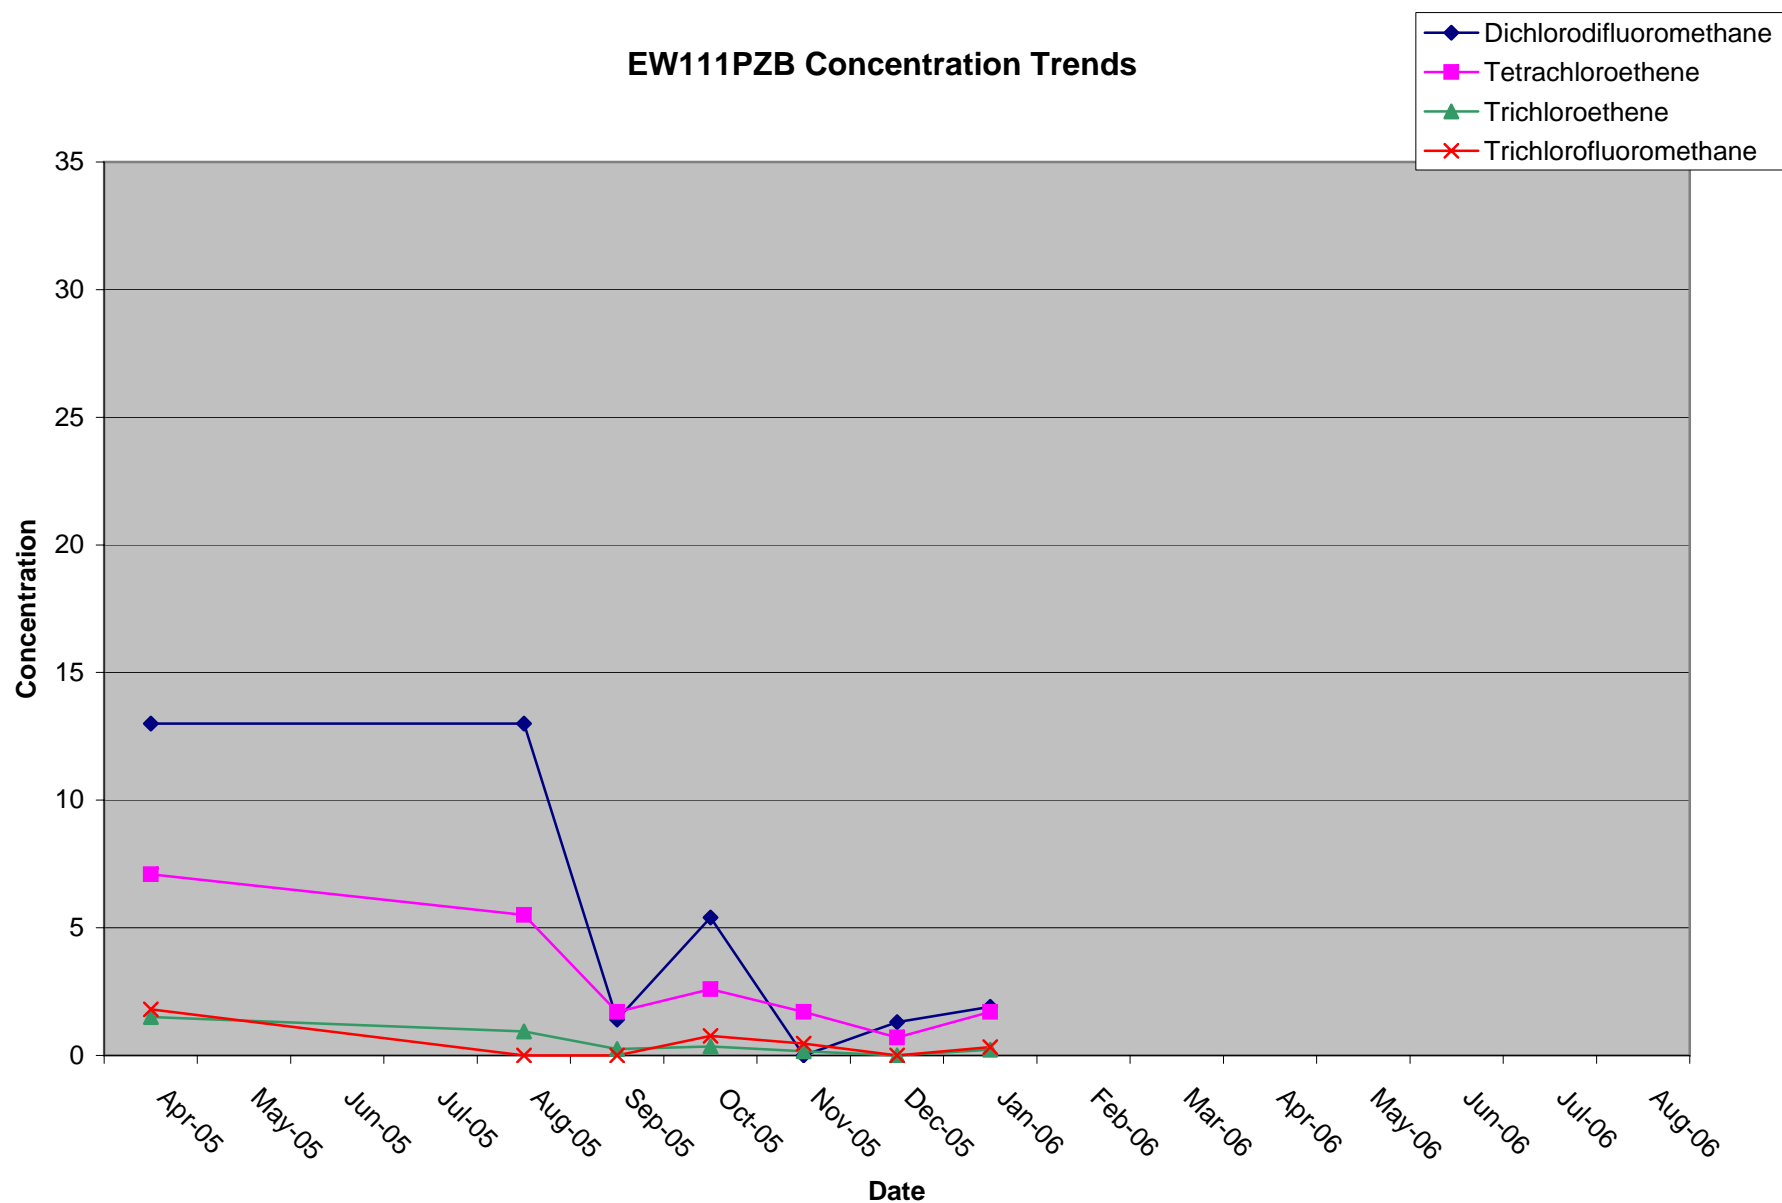

*Analyte results that are non-detect are entered as zero for graphing purposes.

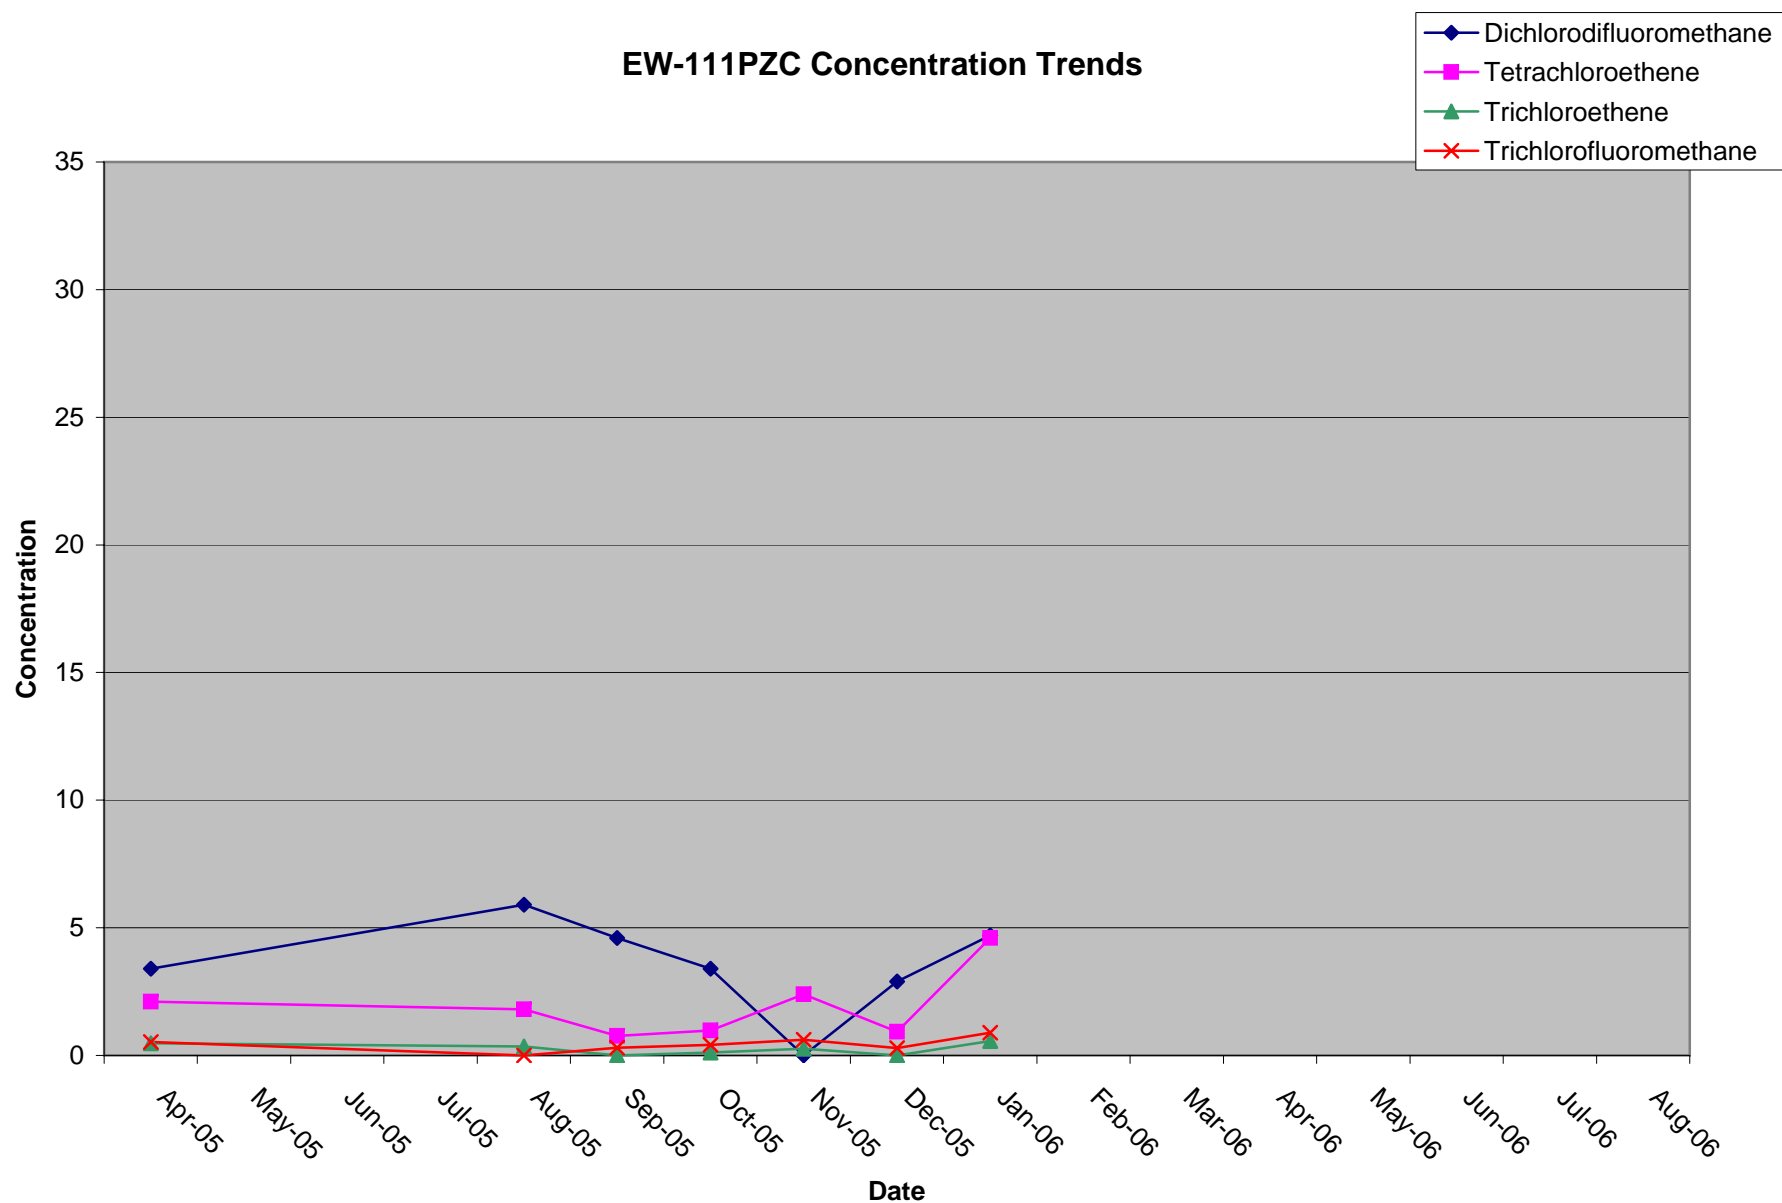

*Analyte results that are non-detect are entered as zero for graphing purposes.

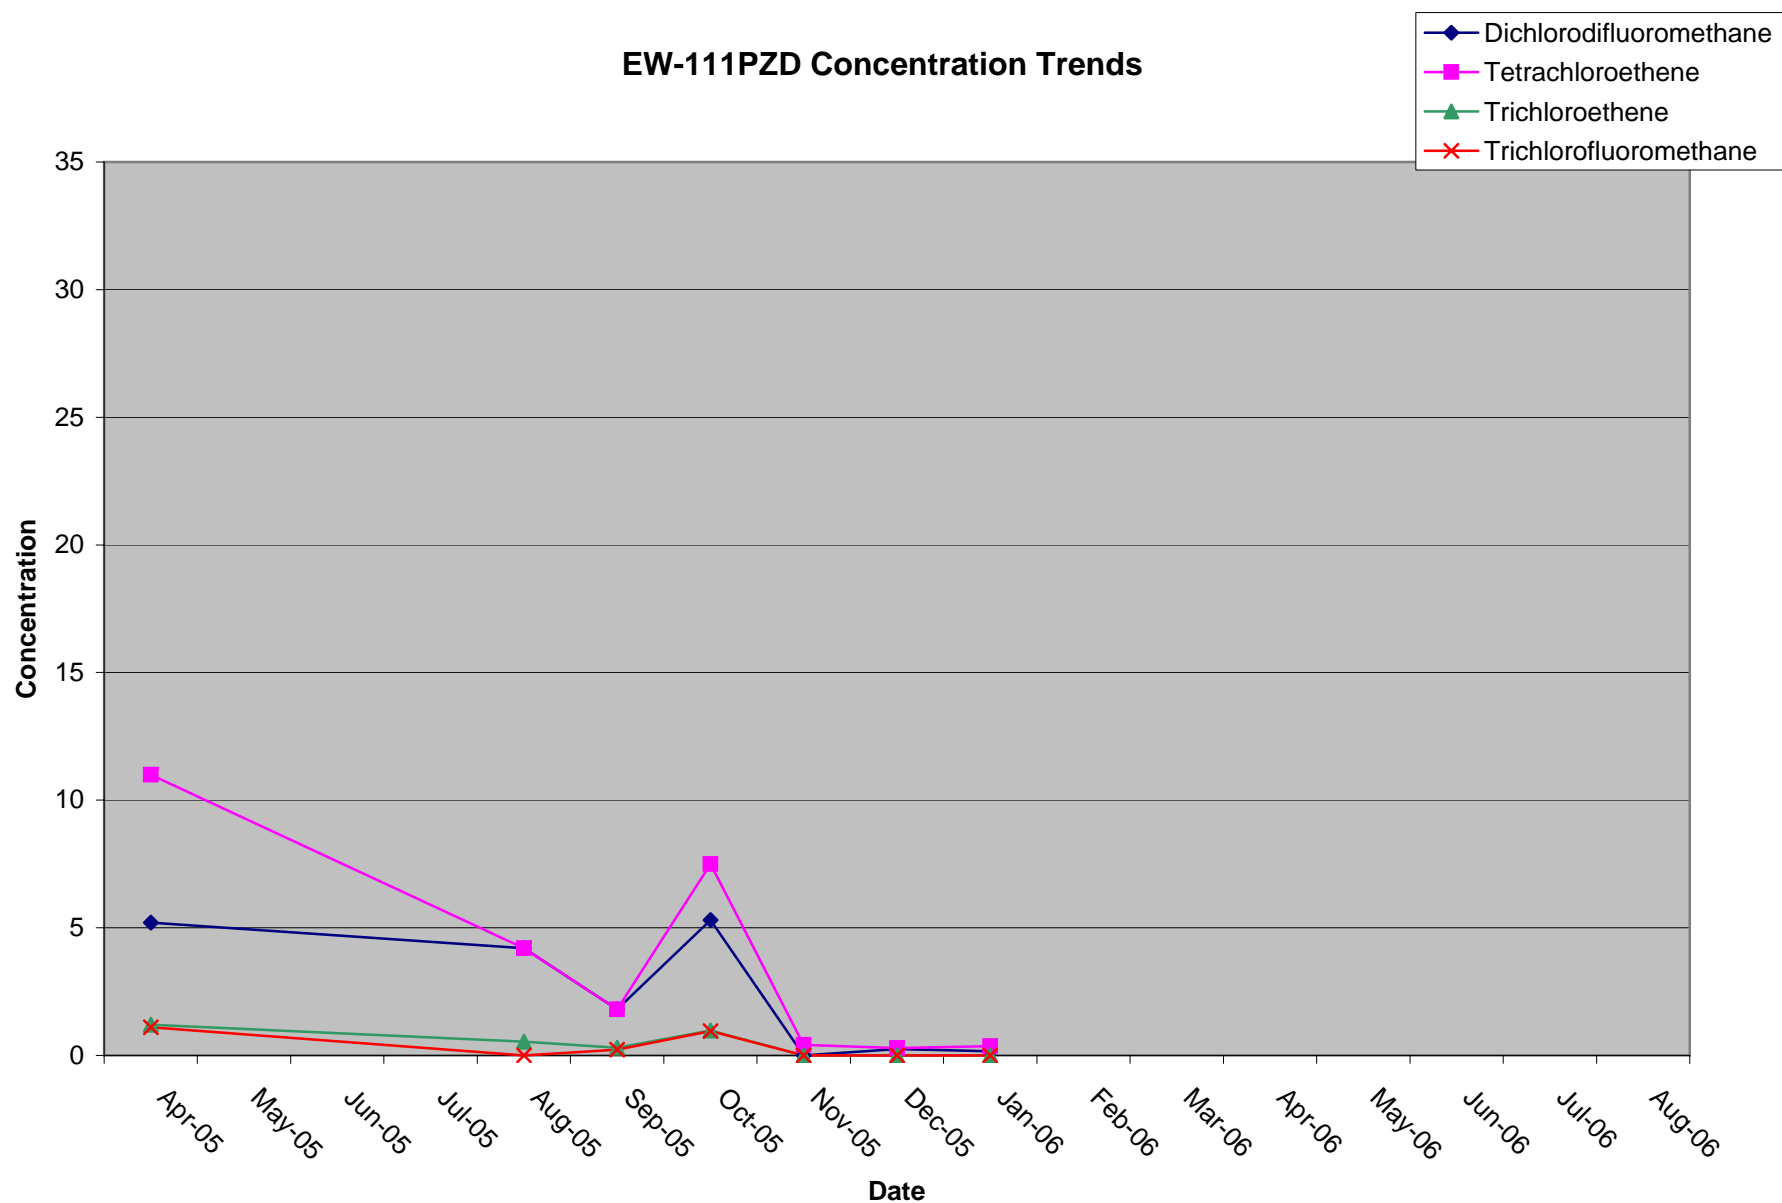

*Analyte results that are non-detect are entered as zero for graphing purposes.

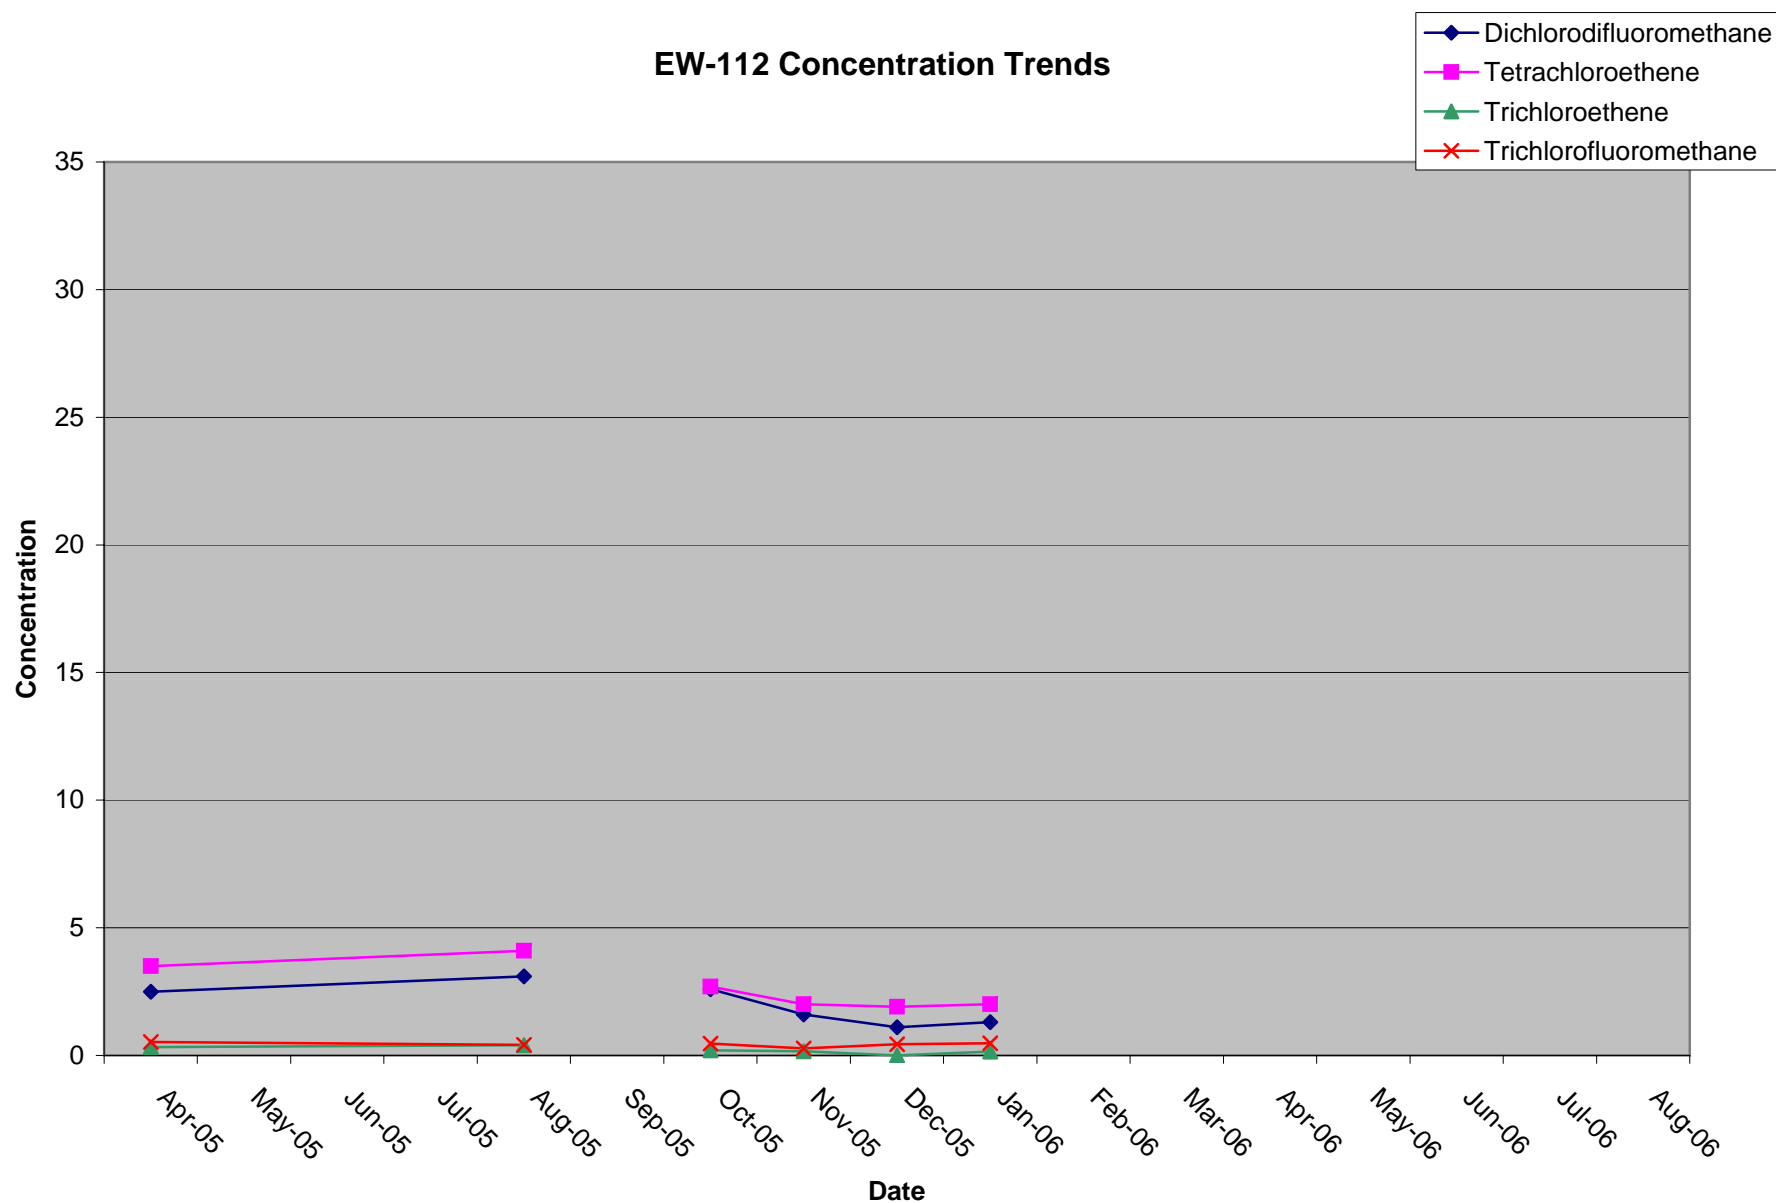

*Analyte results that are non-detect are entered as zero for graphing purposes.

*Analyte results that are non-detect are entered as zero for graphing purposes.

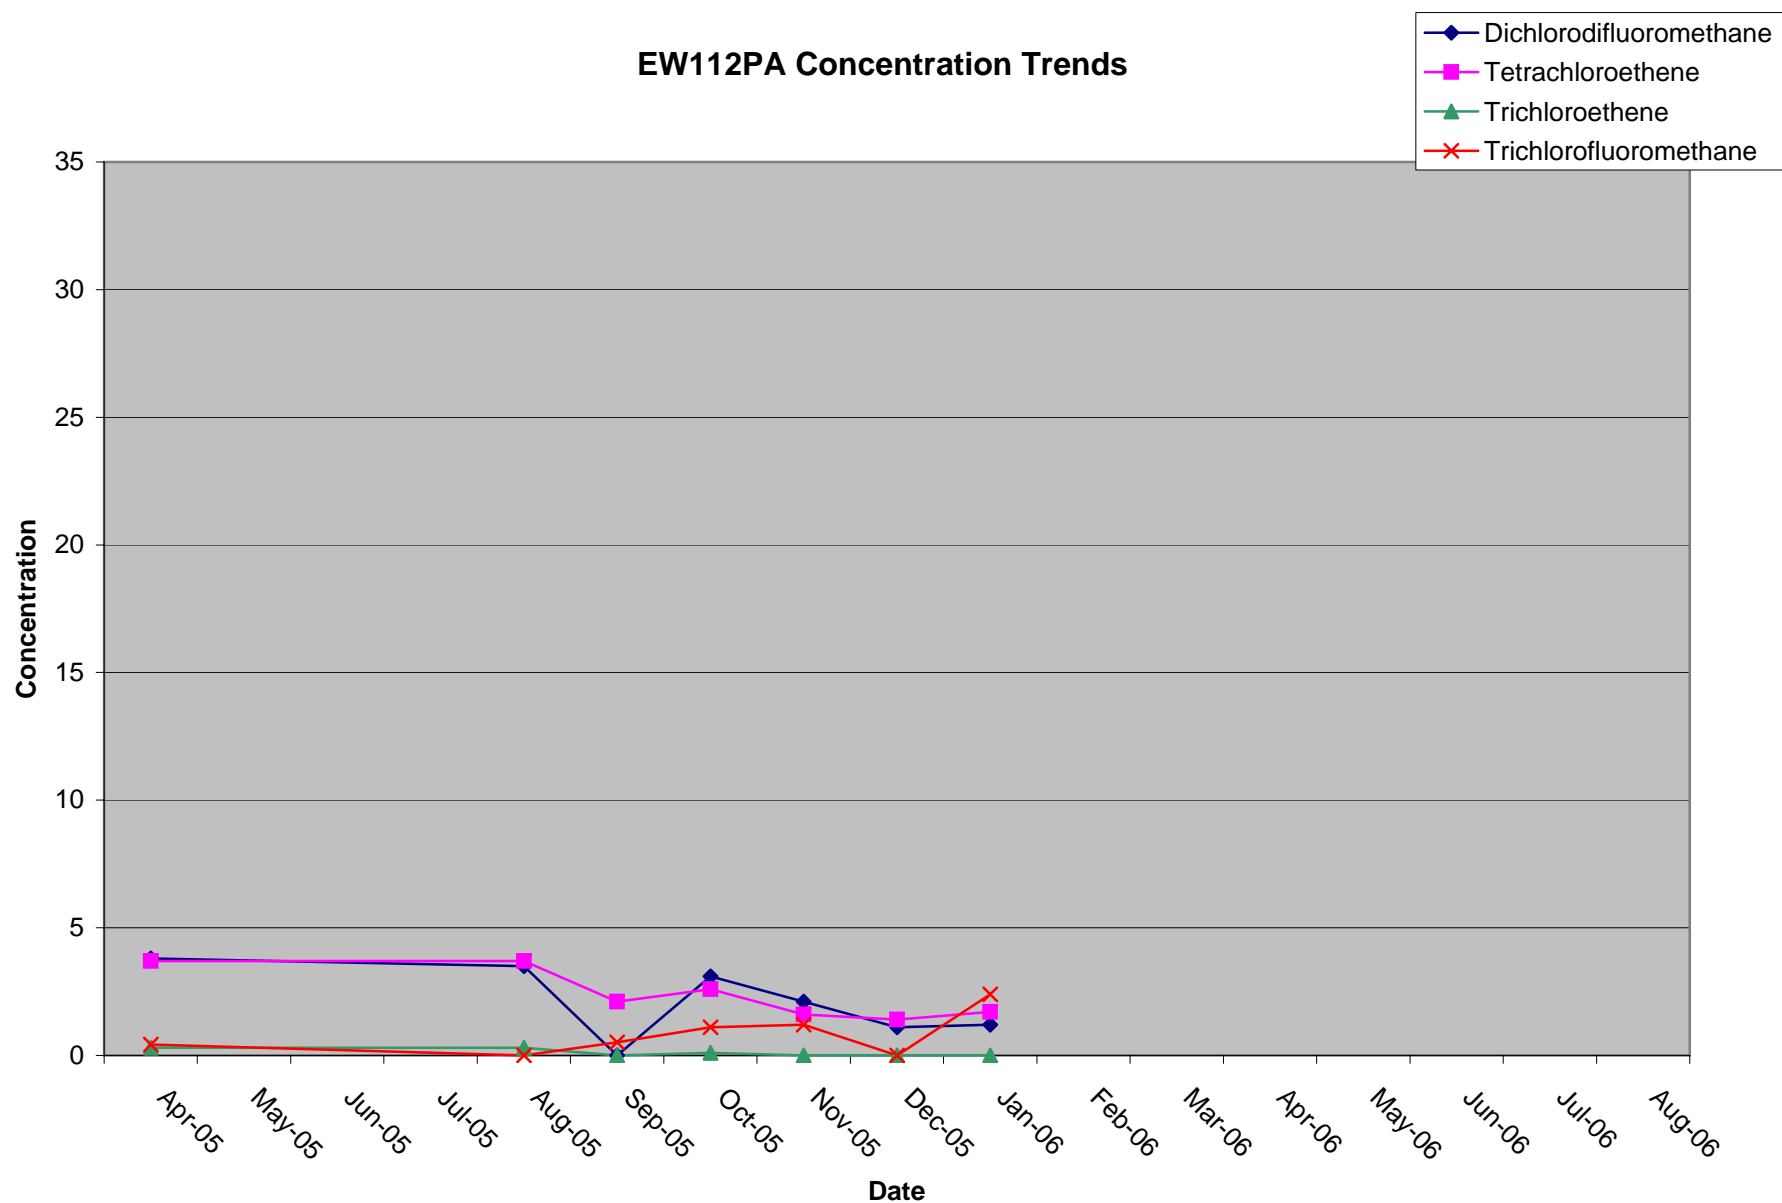

*Analyte results that are non-detect are entered as zero for graphing purposes.

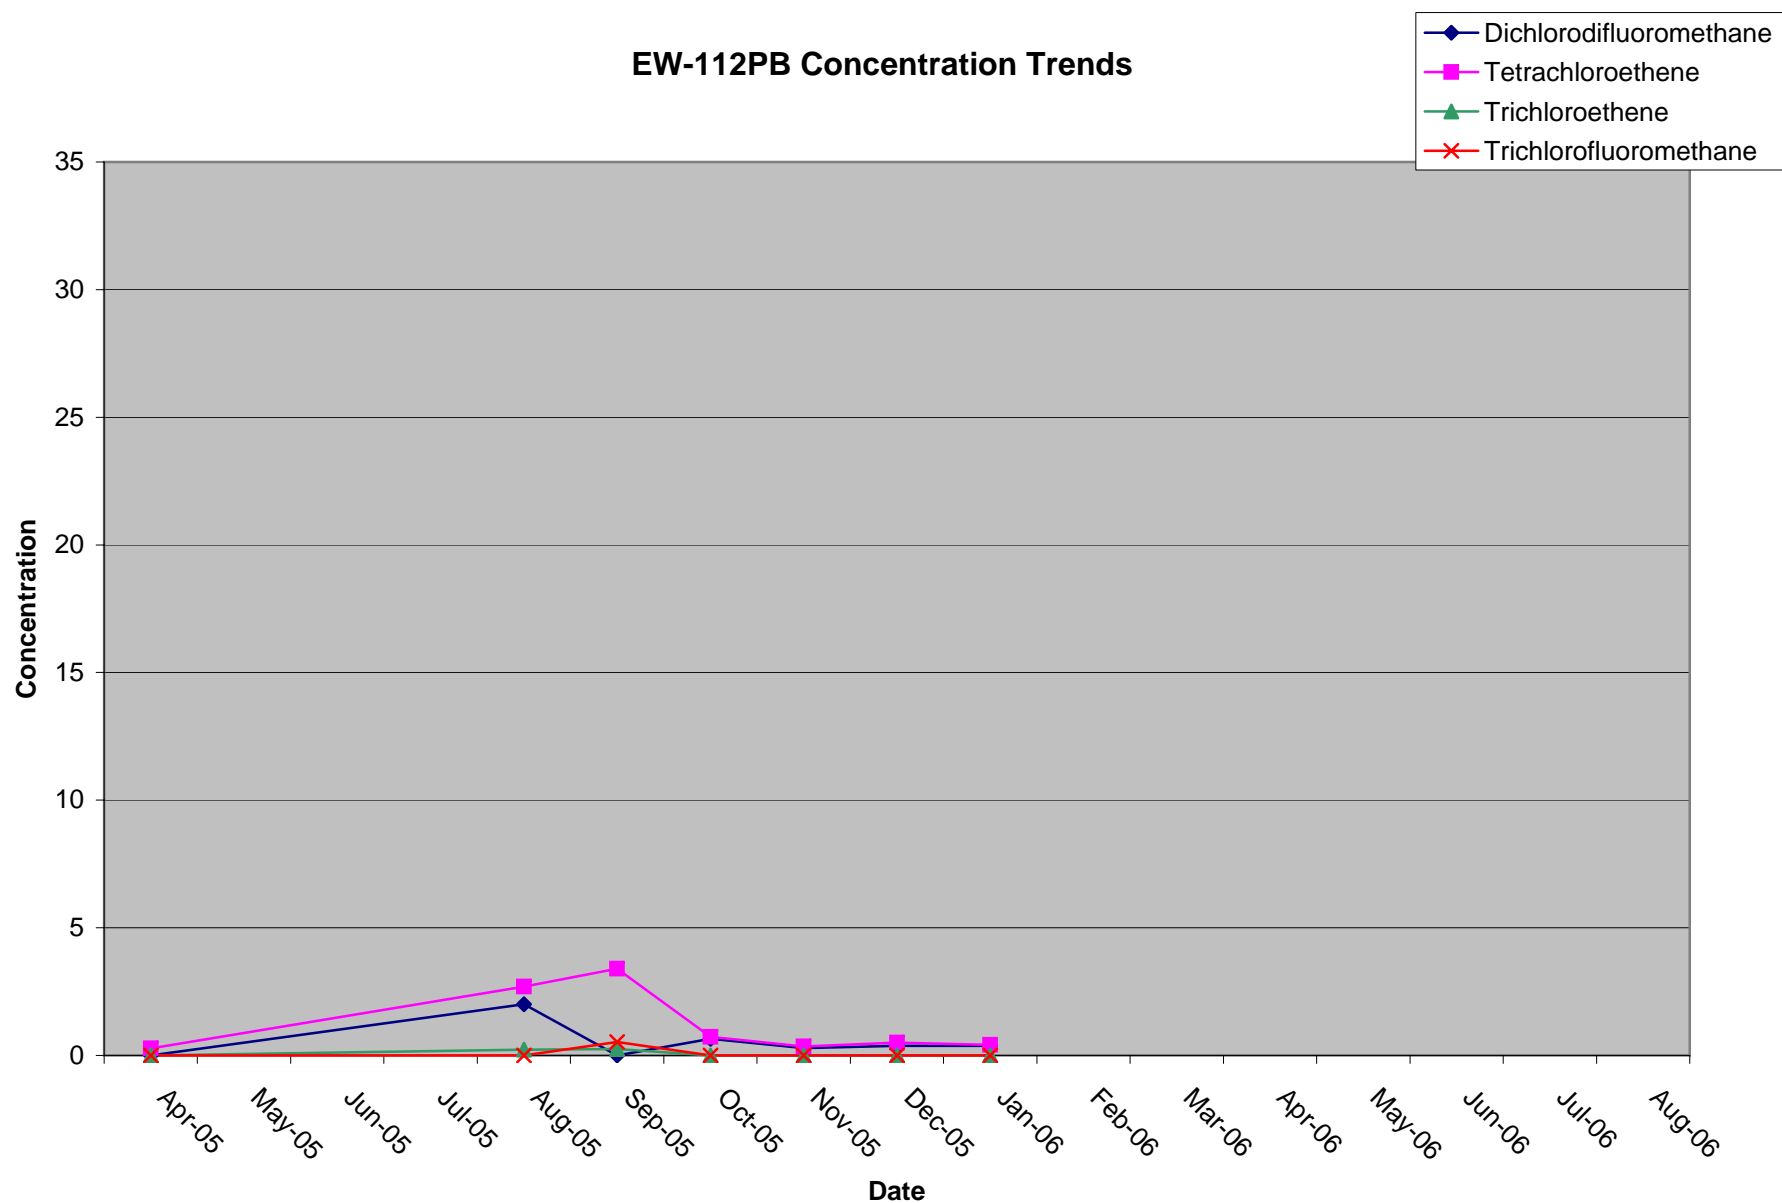

*Analyte results that are non-detect are entered as zero for graphing purposes.

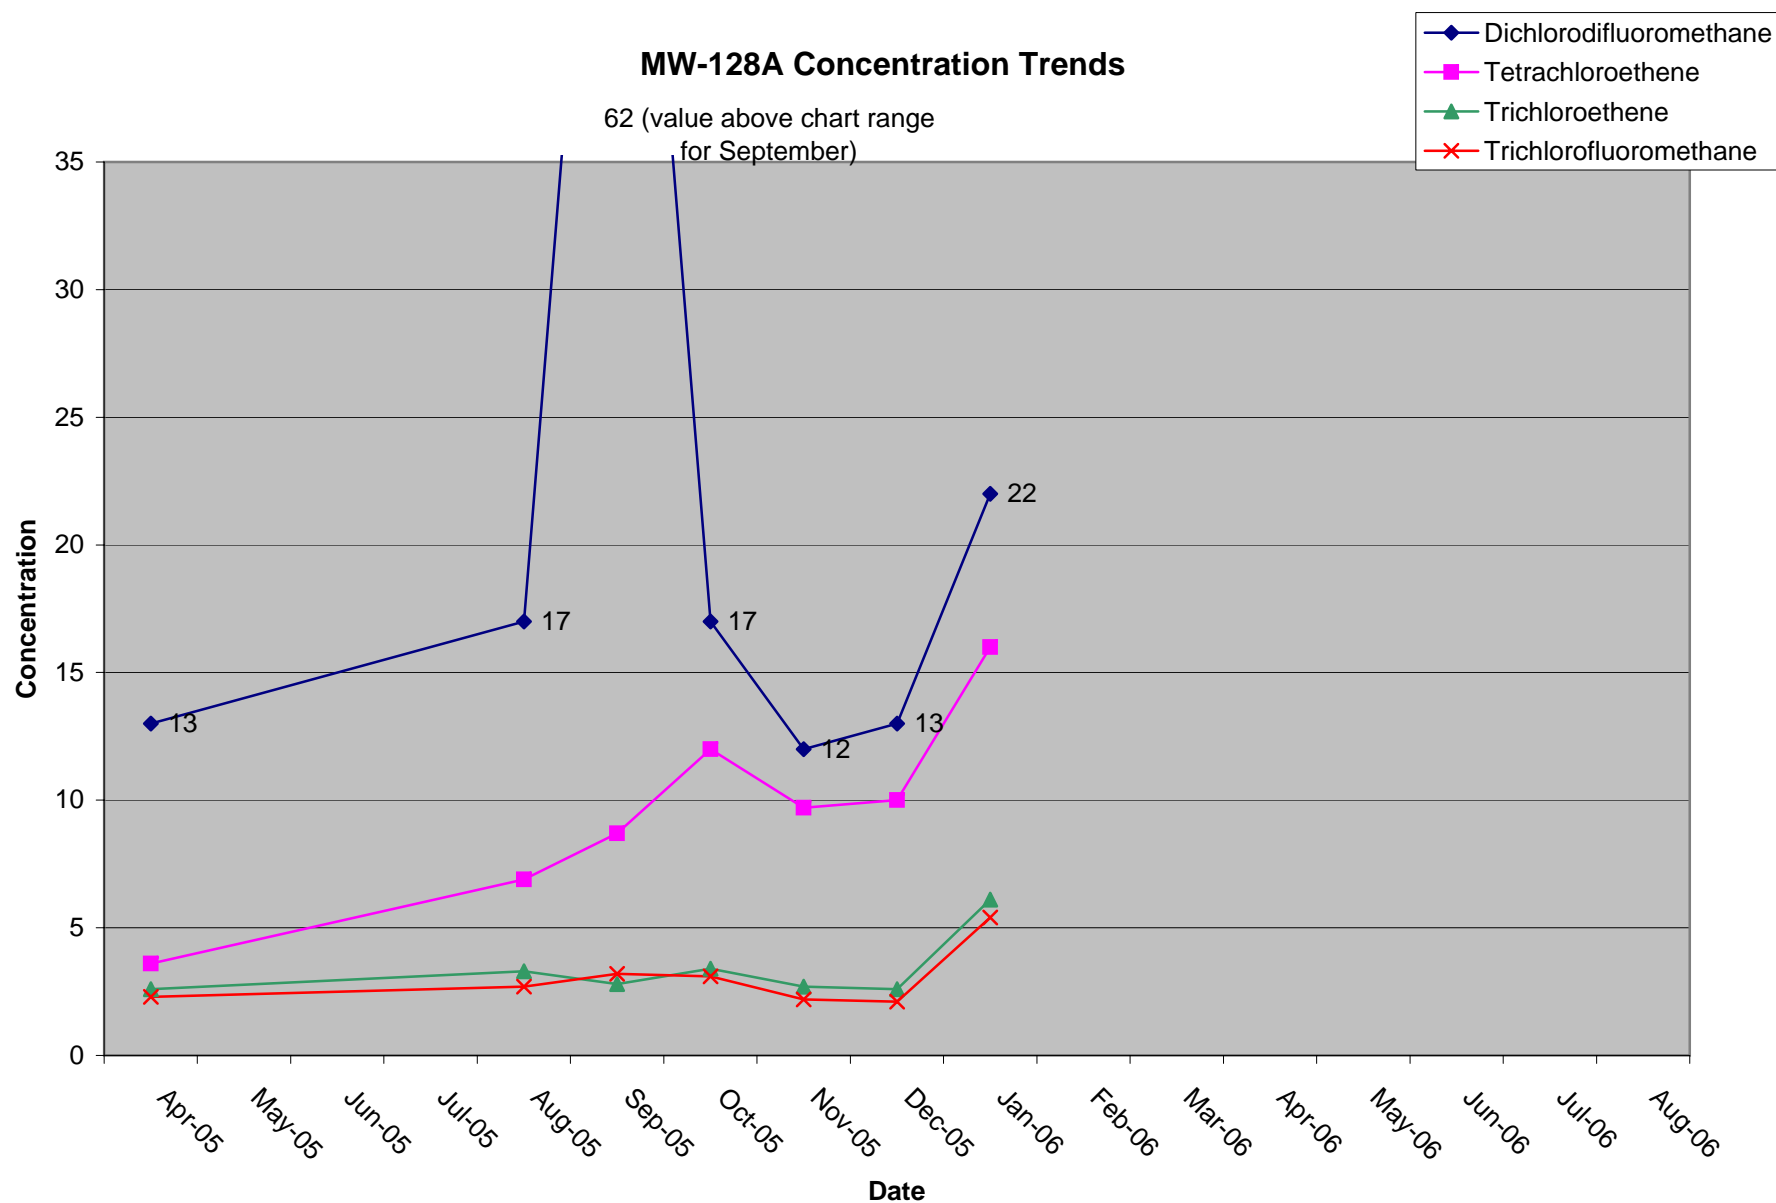

**Data gap for September 2005 due to sample not being collected because the pump was off for repairs.

*Analyte results that are non-detect are entered as zero for graphing purposes.

*Analyte results that are non-detect are entered as zero for graphing purposes.

*Analyte results that are non-detect are entered as zero for graphing purposes.

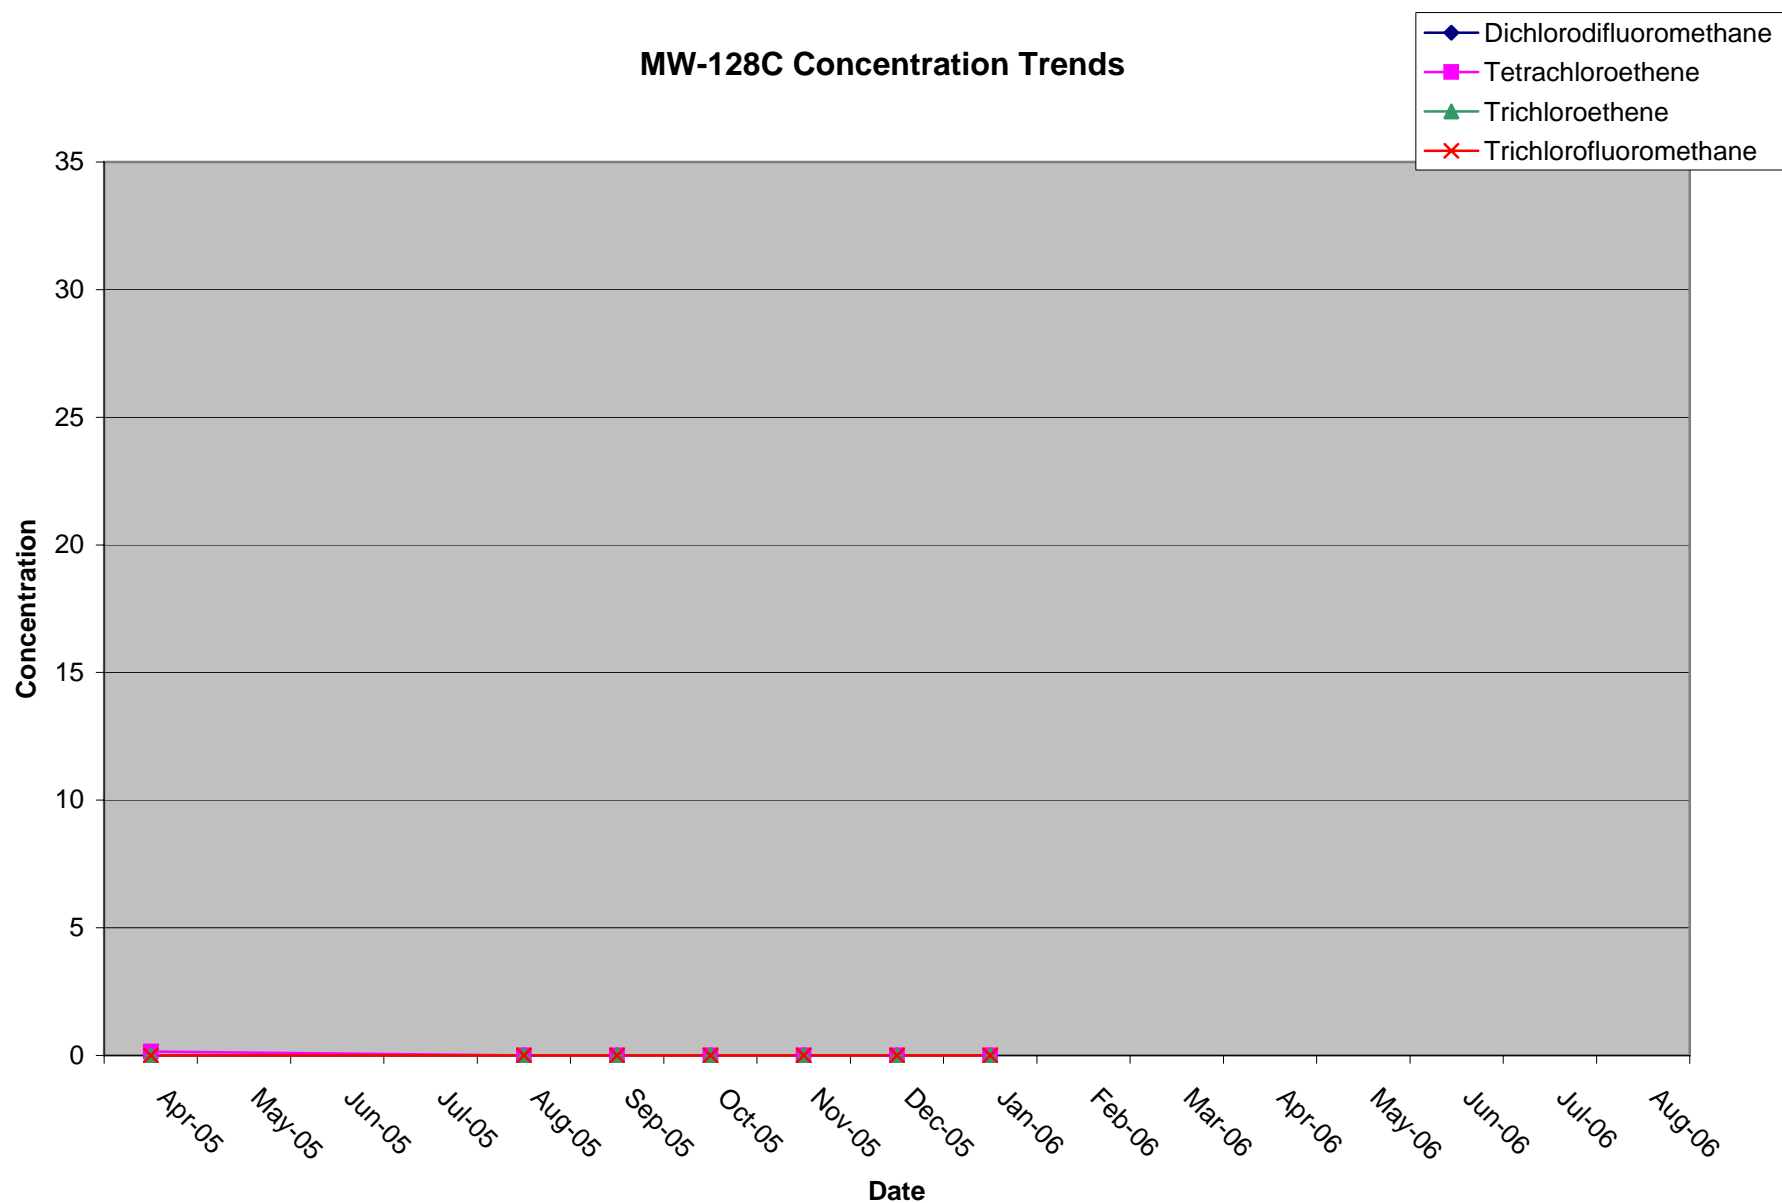

*Analyte results that are non-detect are entered as zero for graphing purposes.

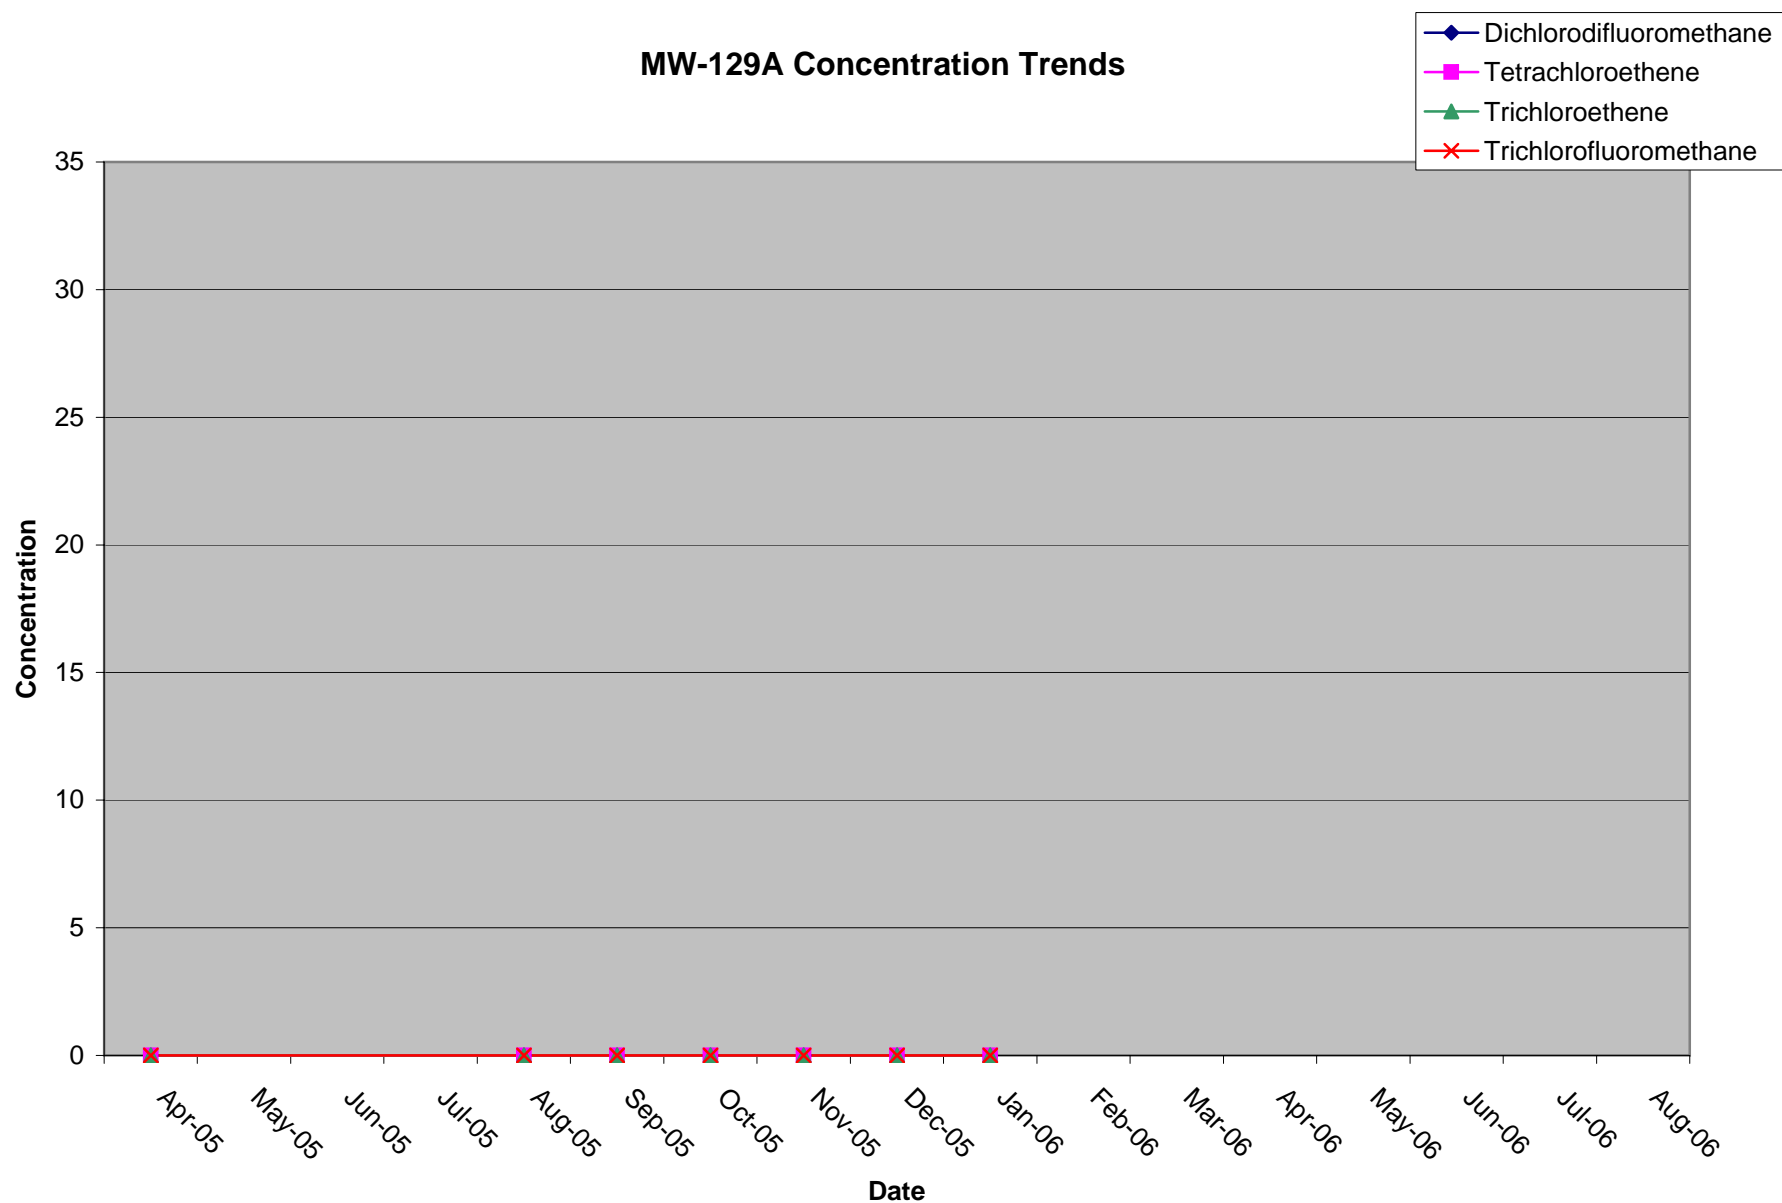

*Analyte results that are non-detect are entered as zero for graphing purposes.

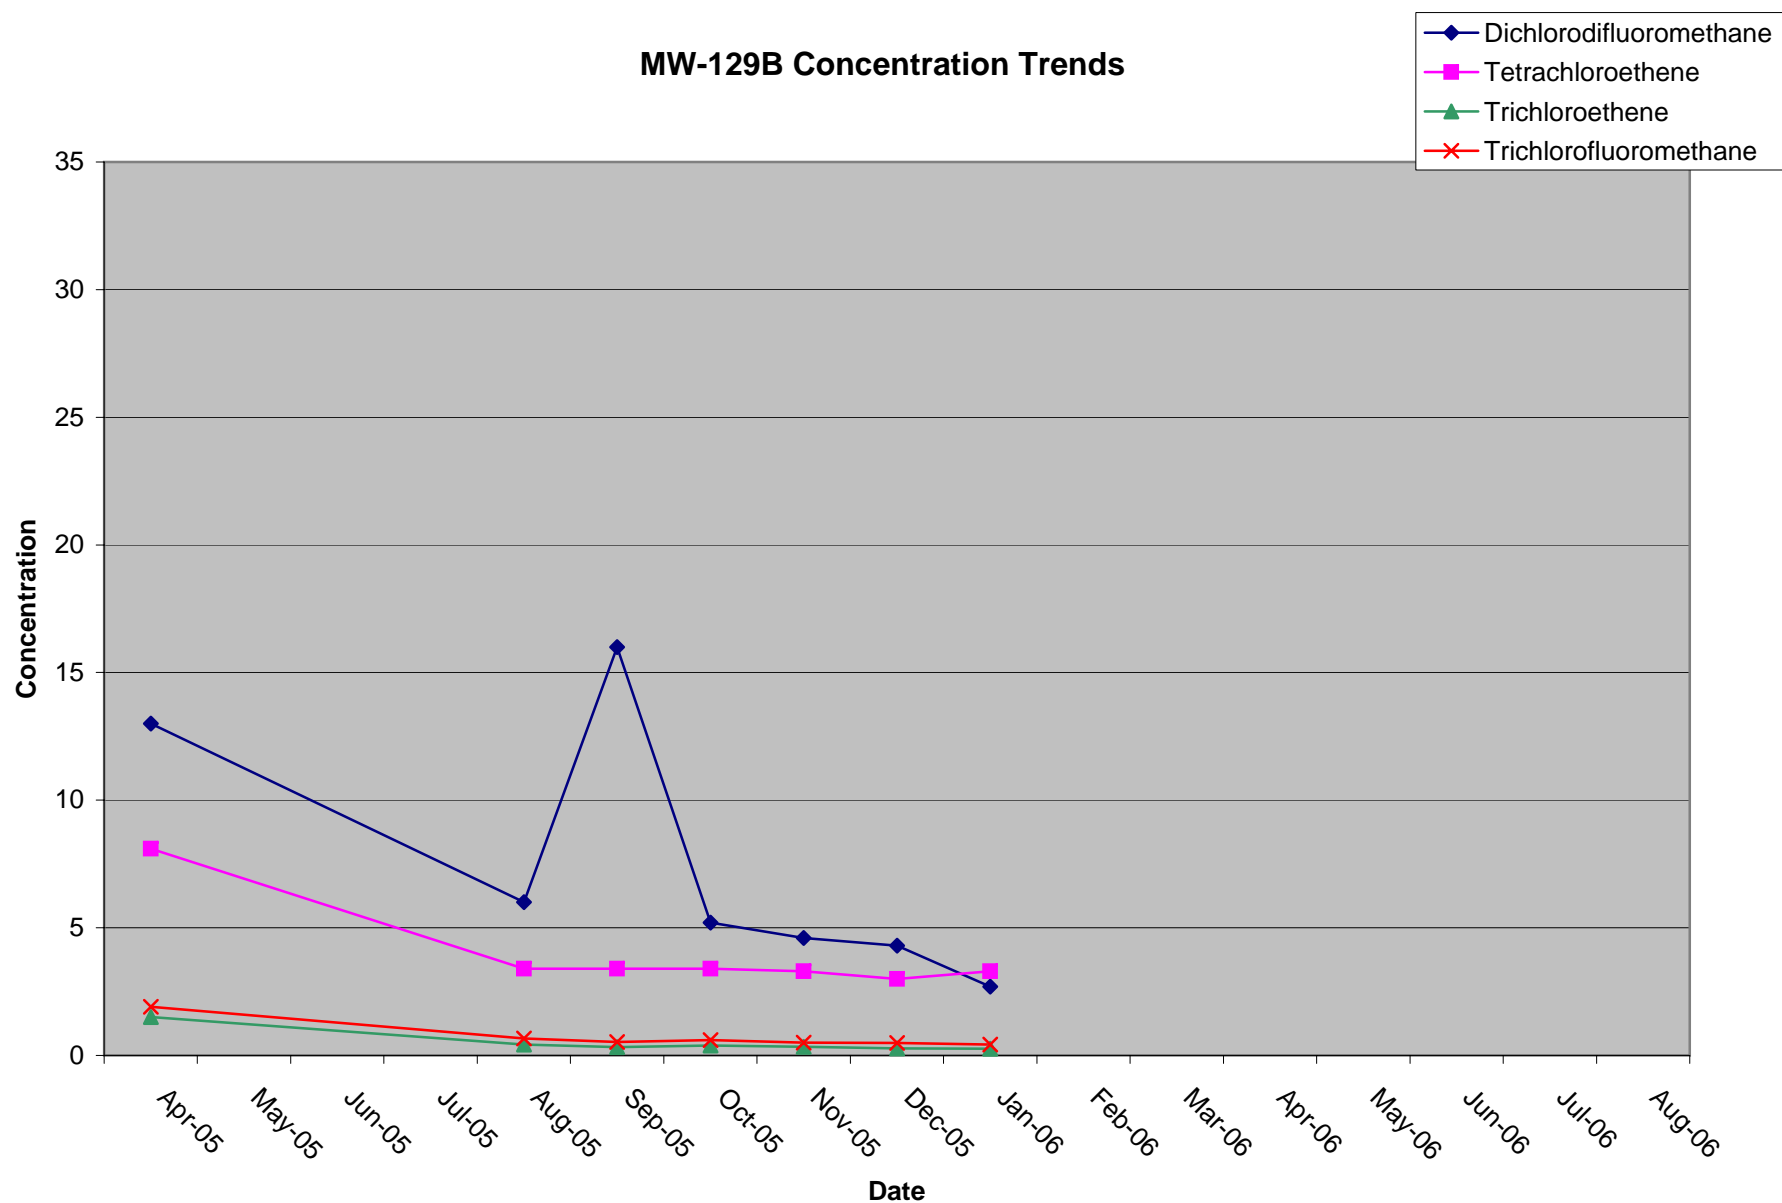

*Analyte results that are non-detect are entered as zero for graphing purposes.

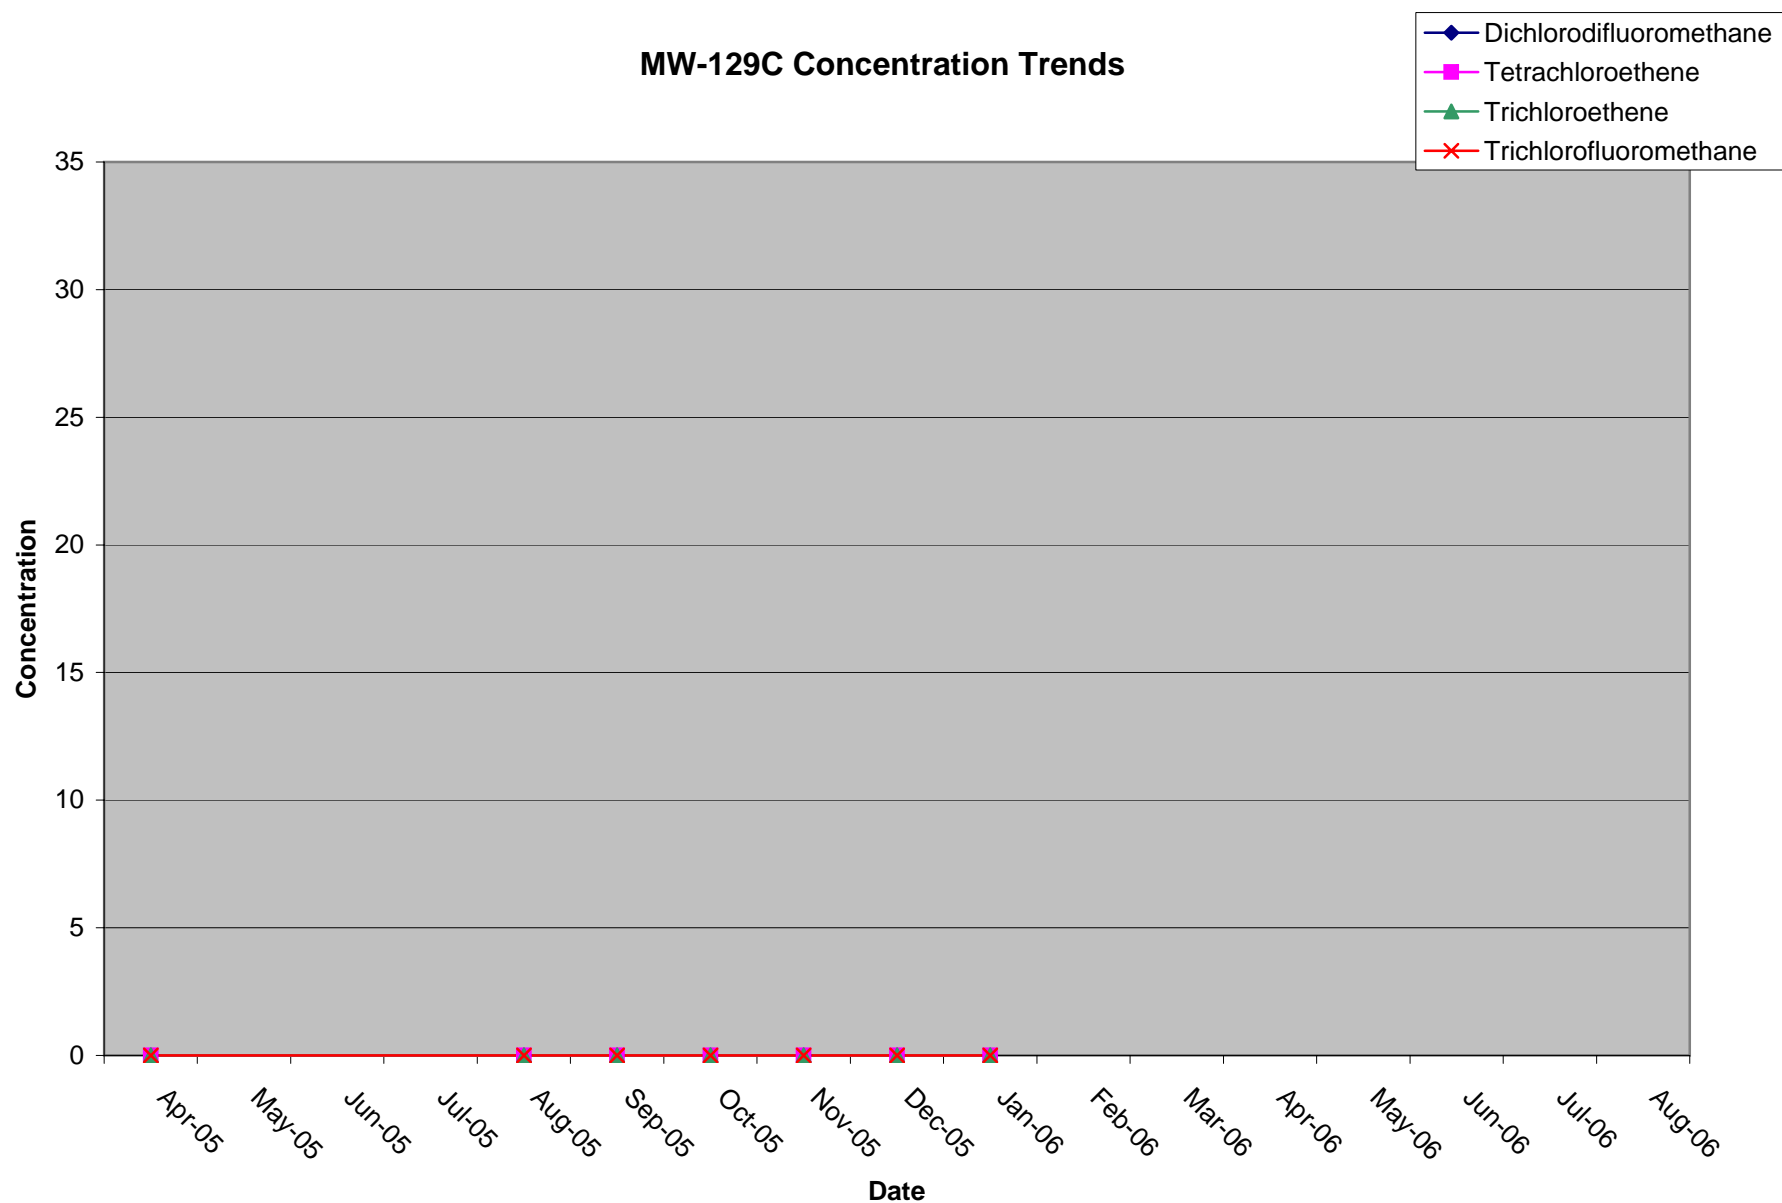

*Analyte results that are non-detect are entered as zero for graphing purposes.

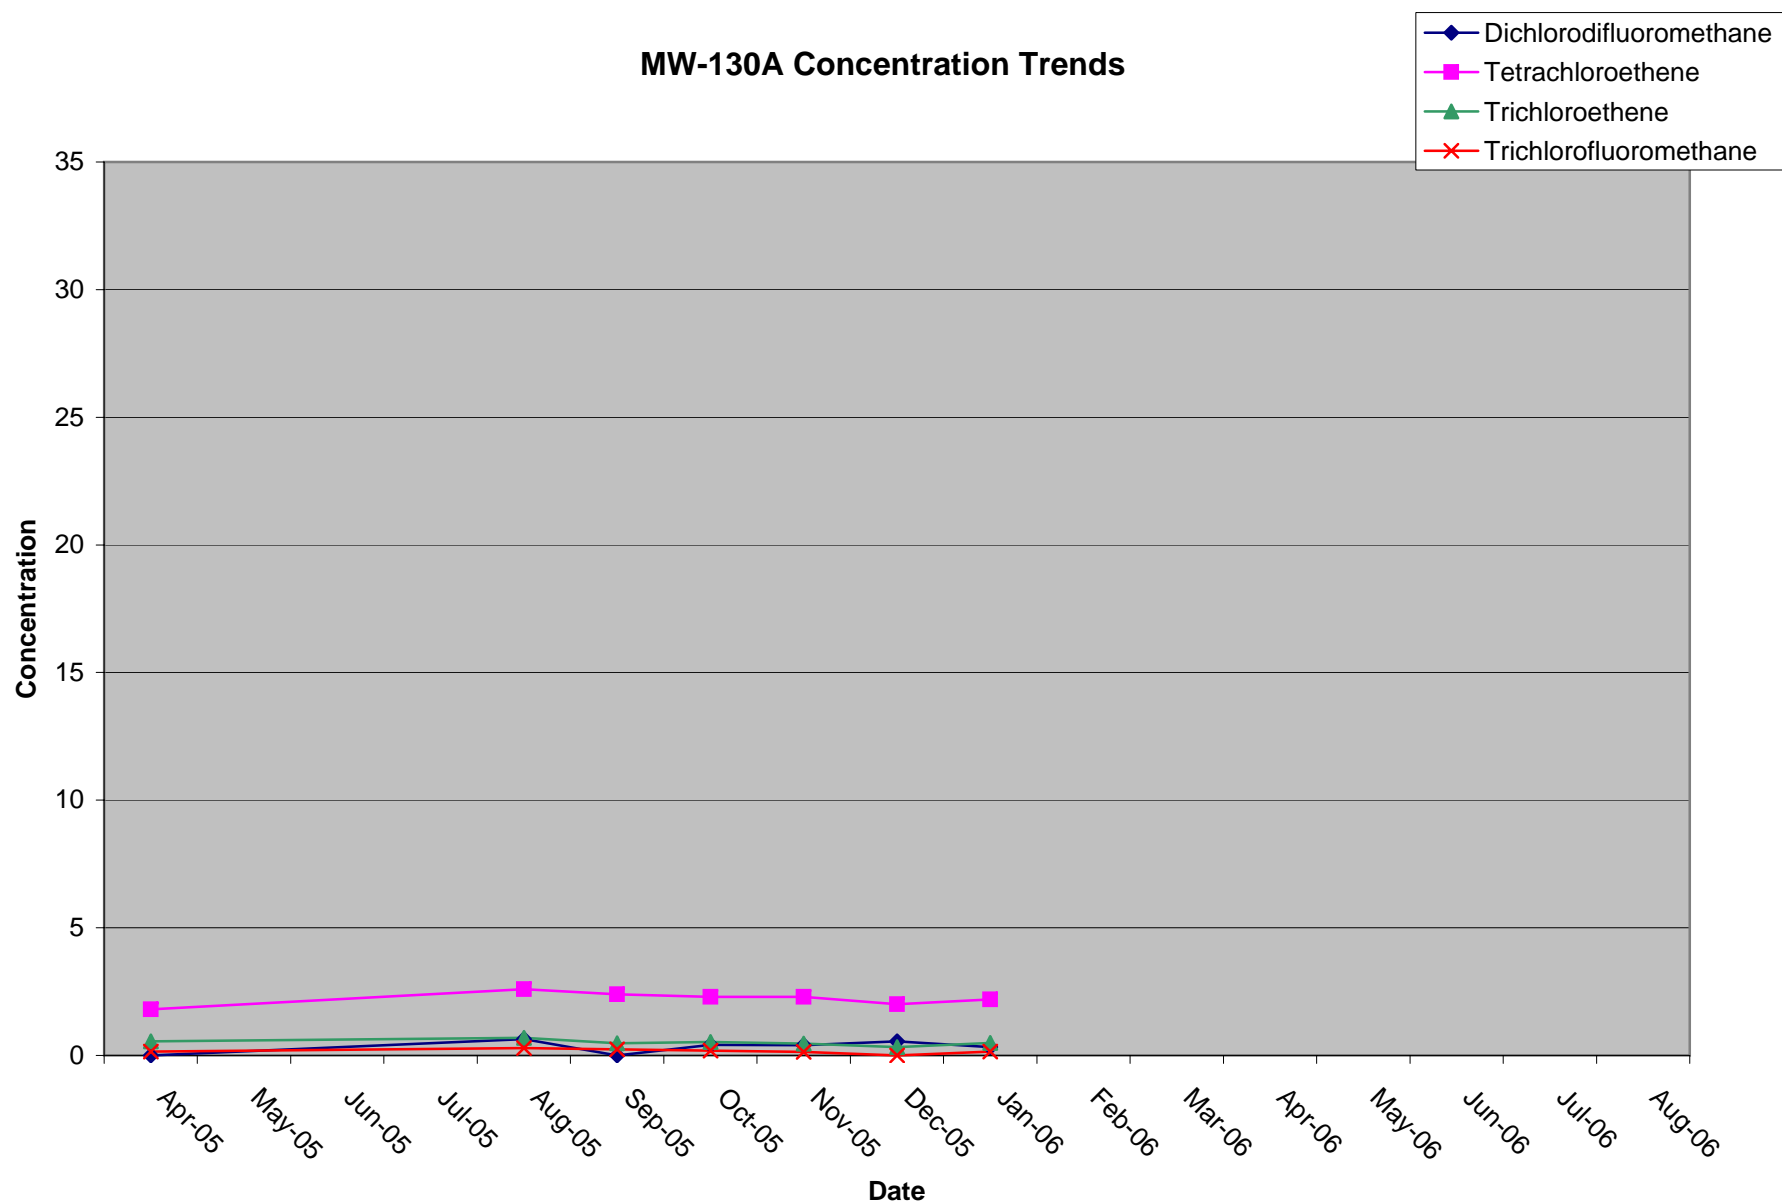

*Analyte results that are non-detect are entered as zero for graphing purposes.

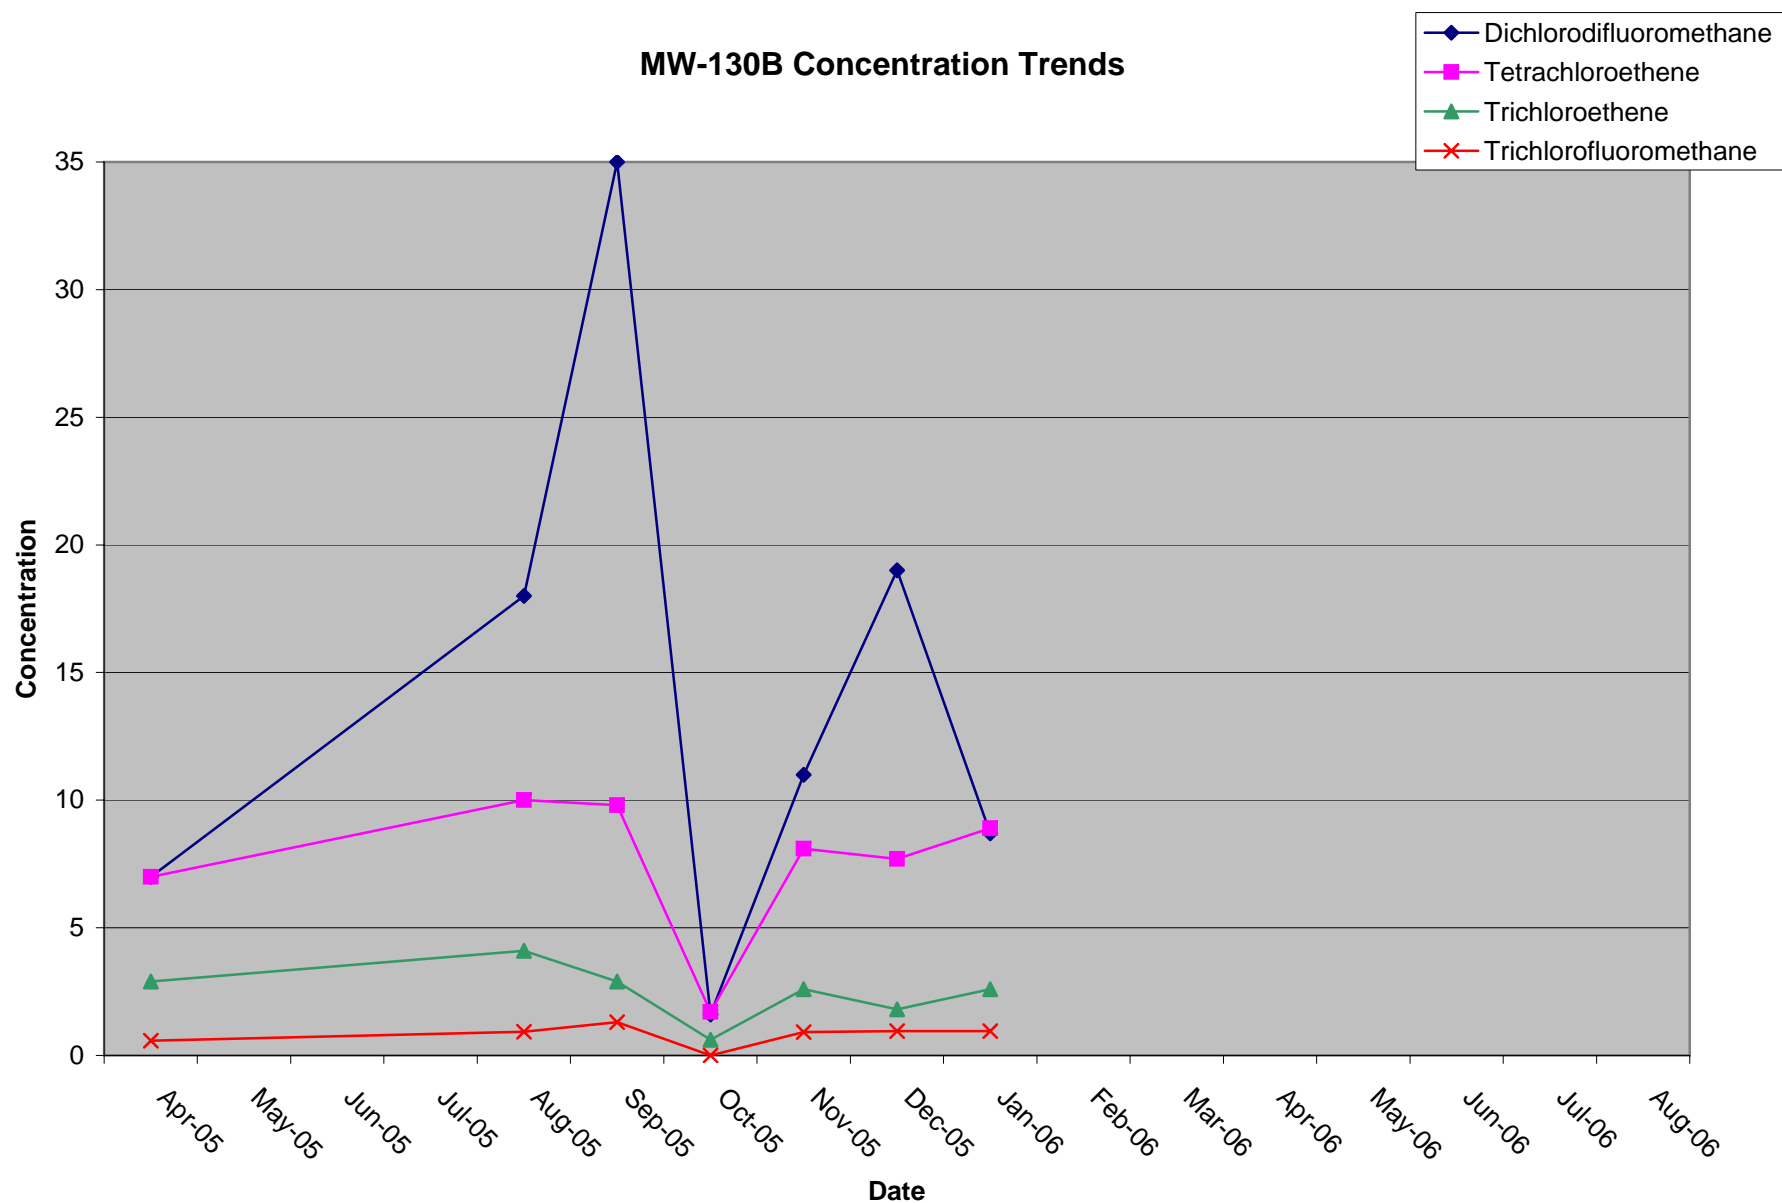

*Analyte results that are non-detect are entered as zero for graphing purposes.

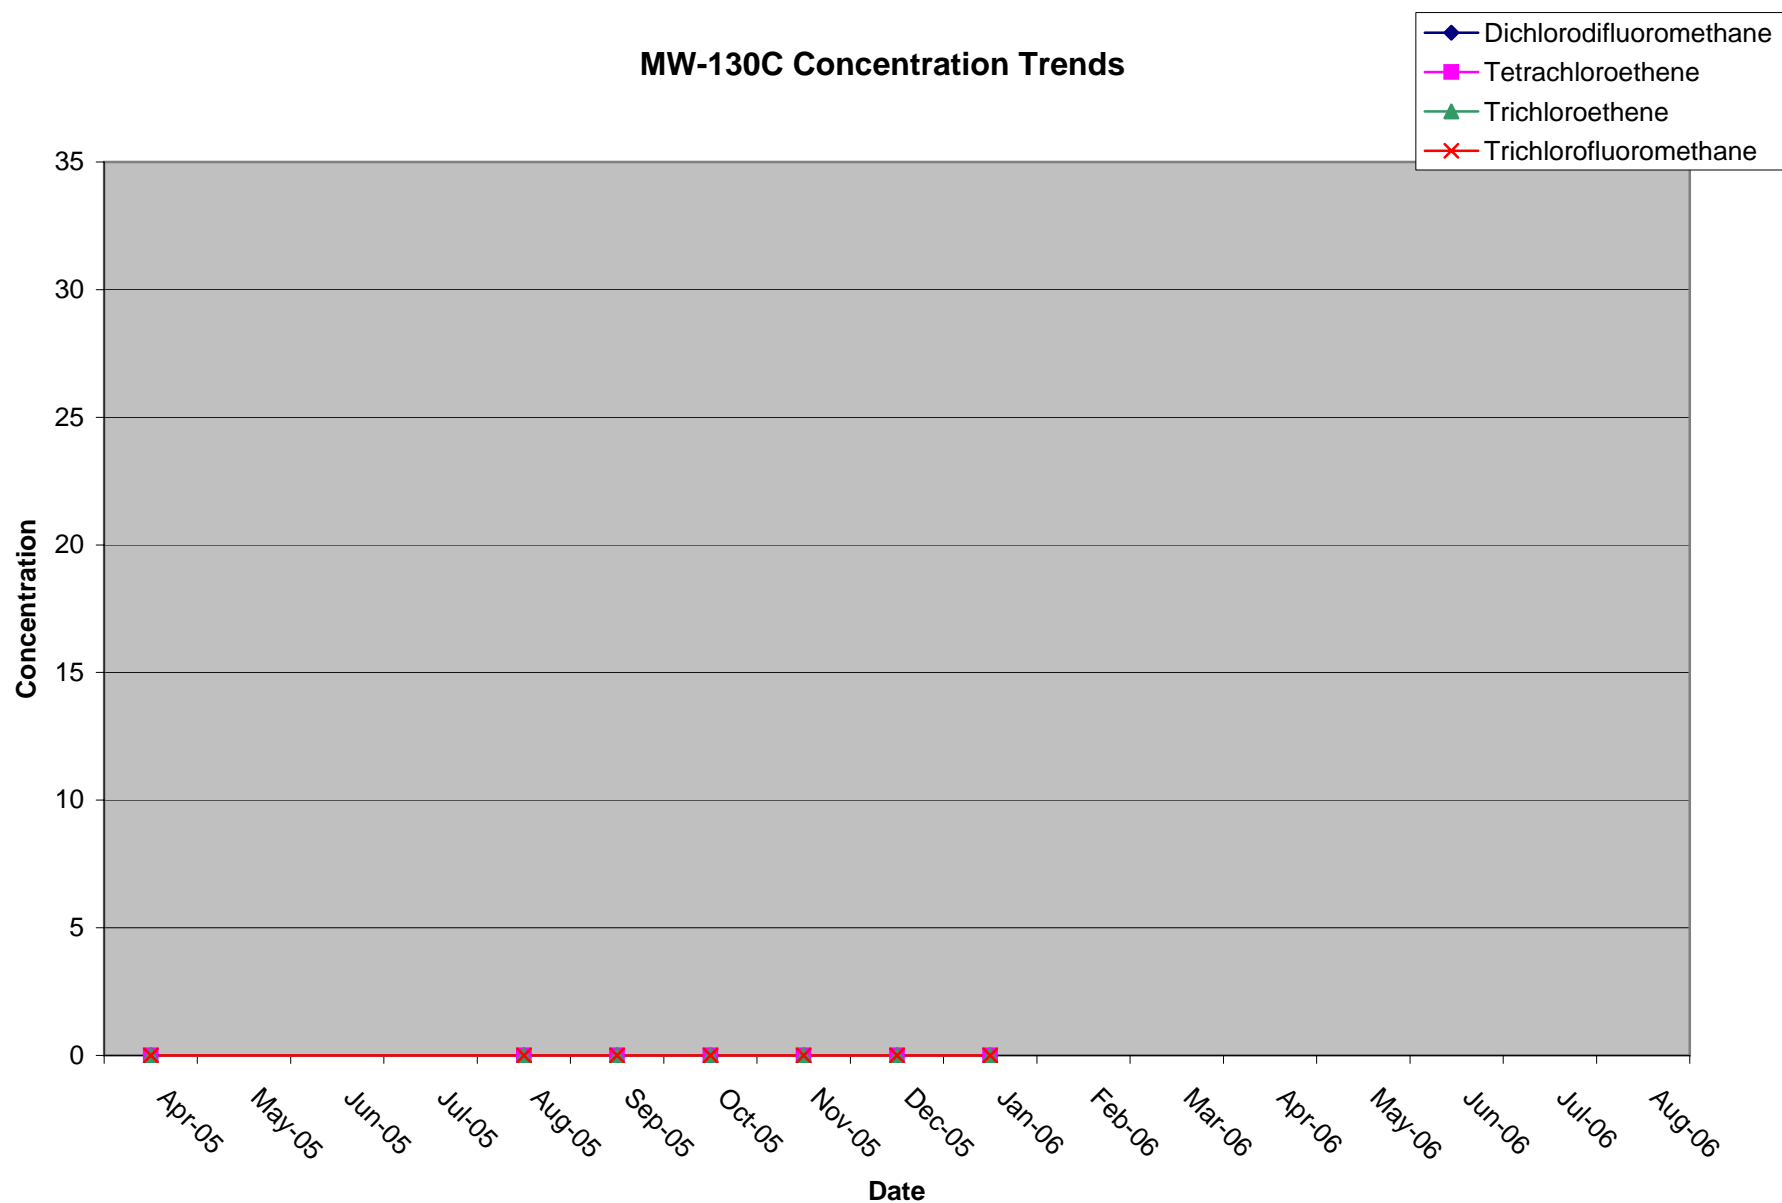

*Analyte results that are non-detect are entered as zero for graphing purposes.

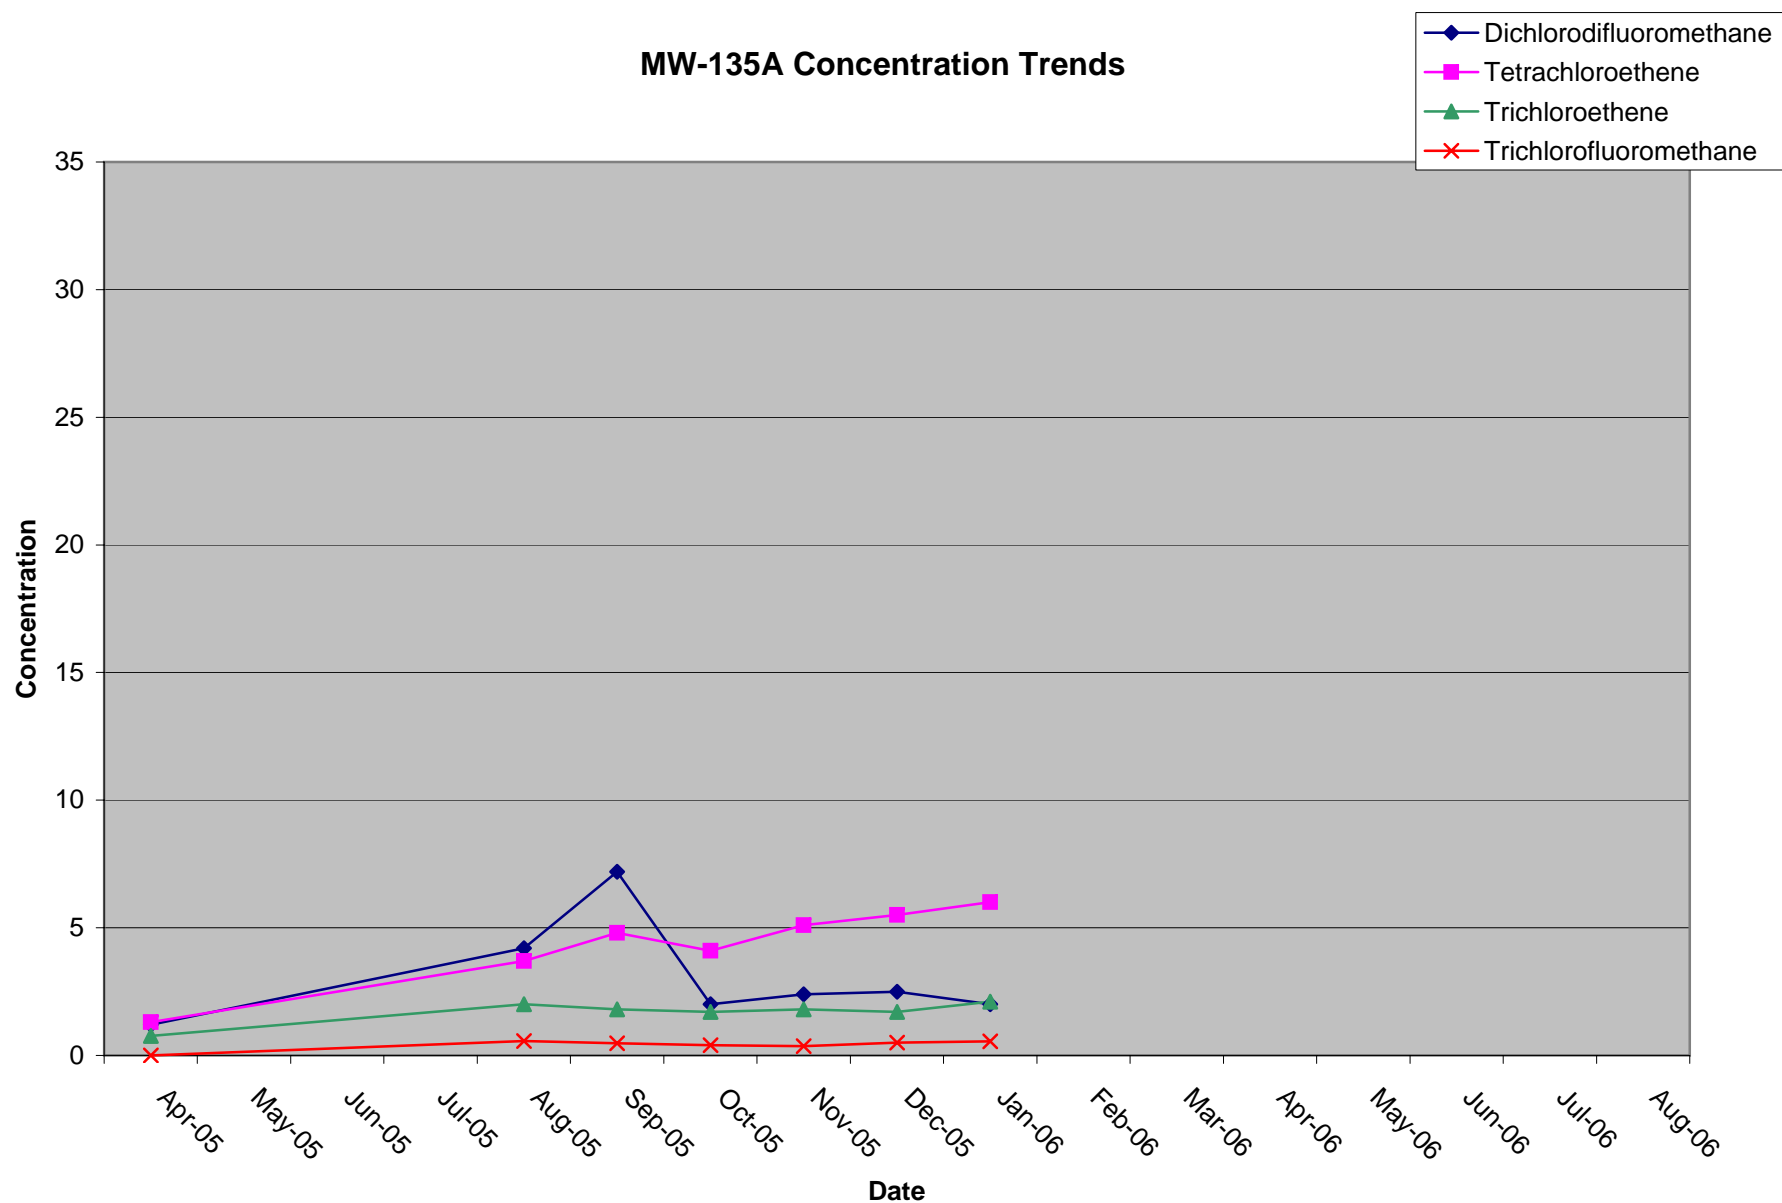

*Analyte results that are non-detect are entered as zero for graphing purposes.

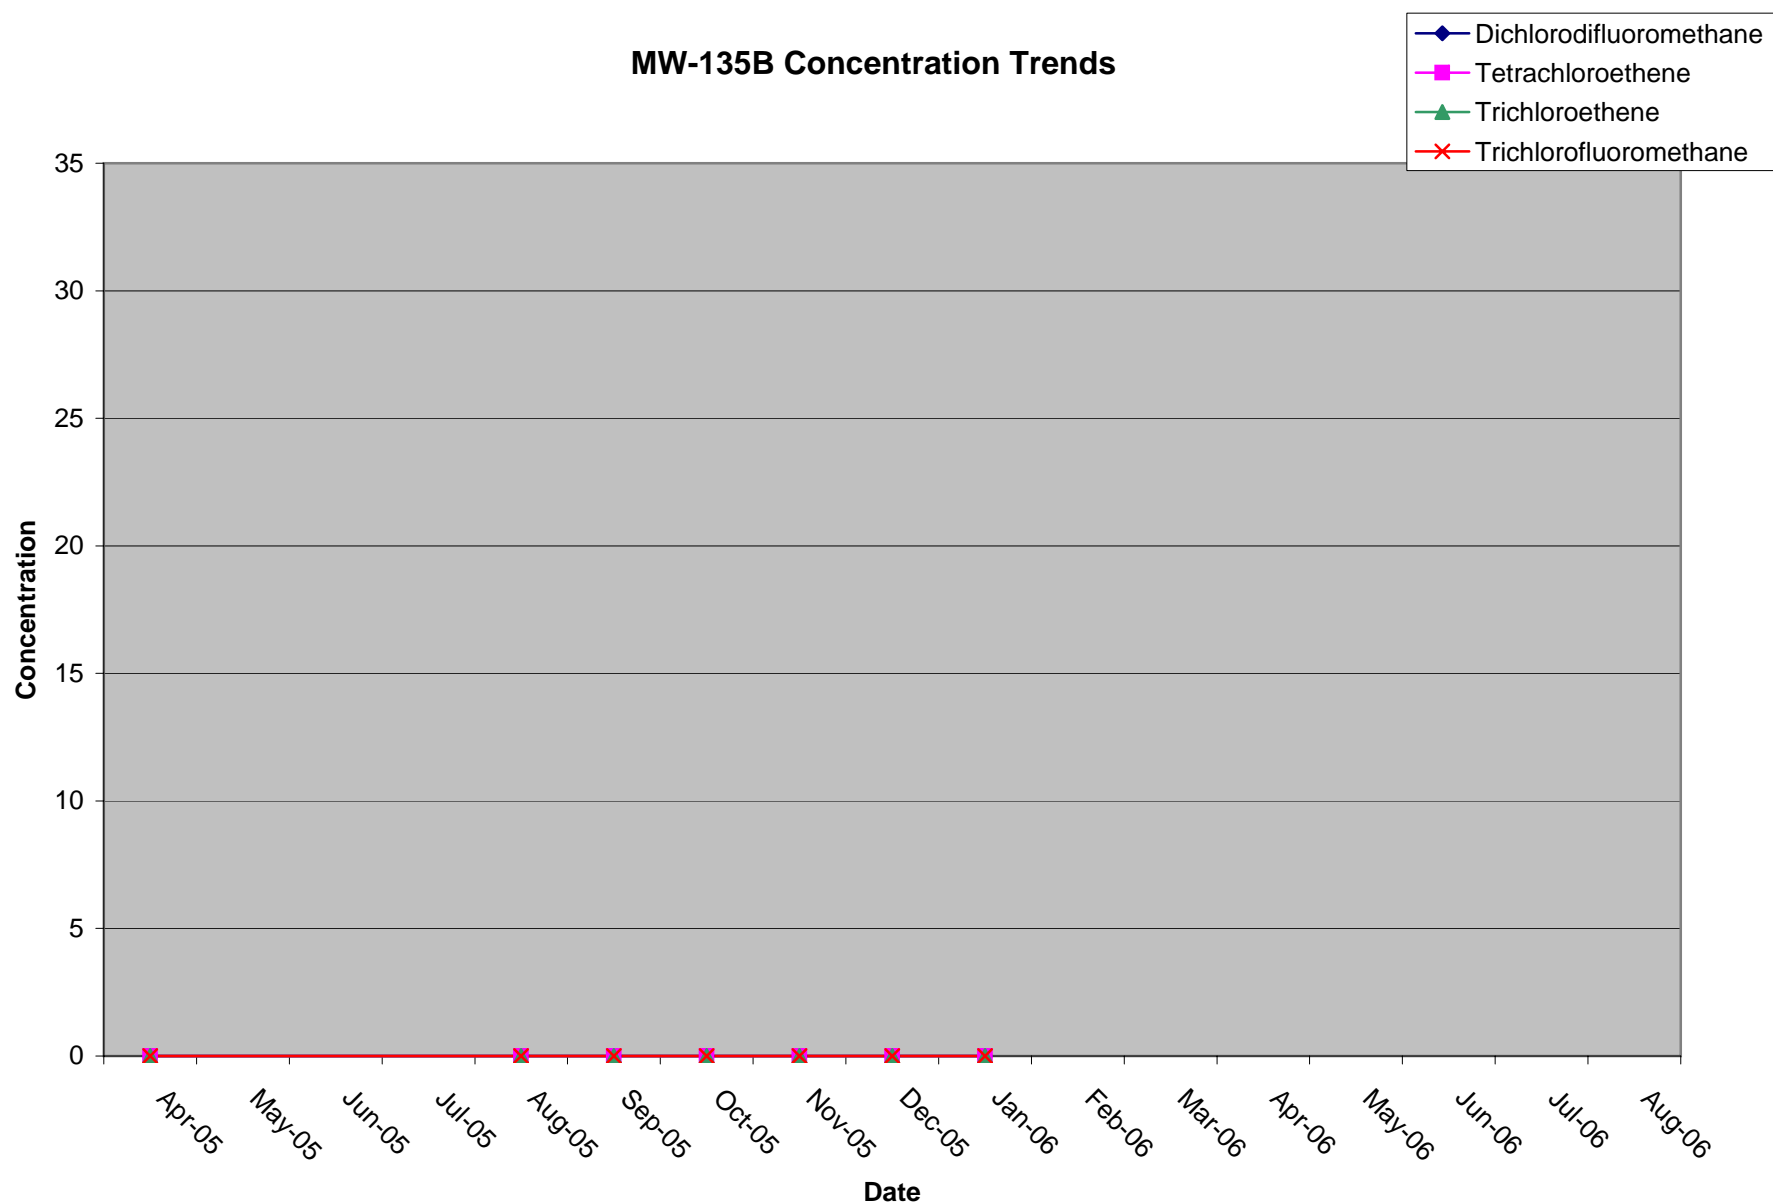

*Analyte results that are non-detect are entered as zero for graphing purposes.

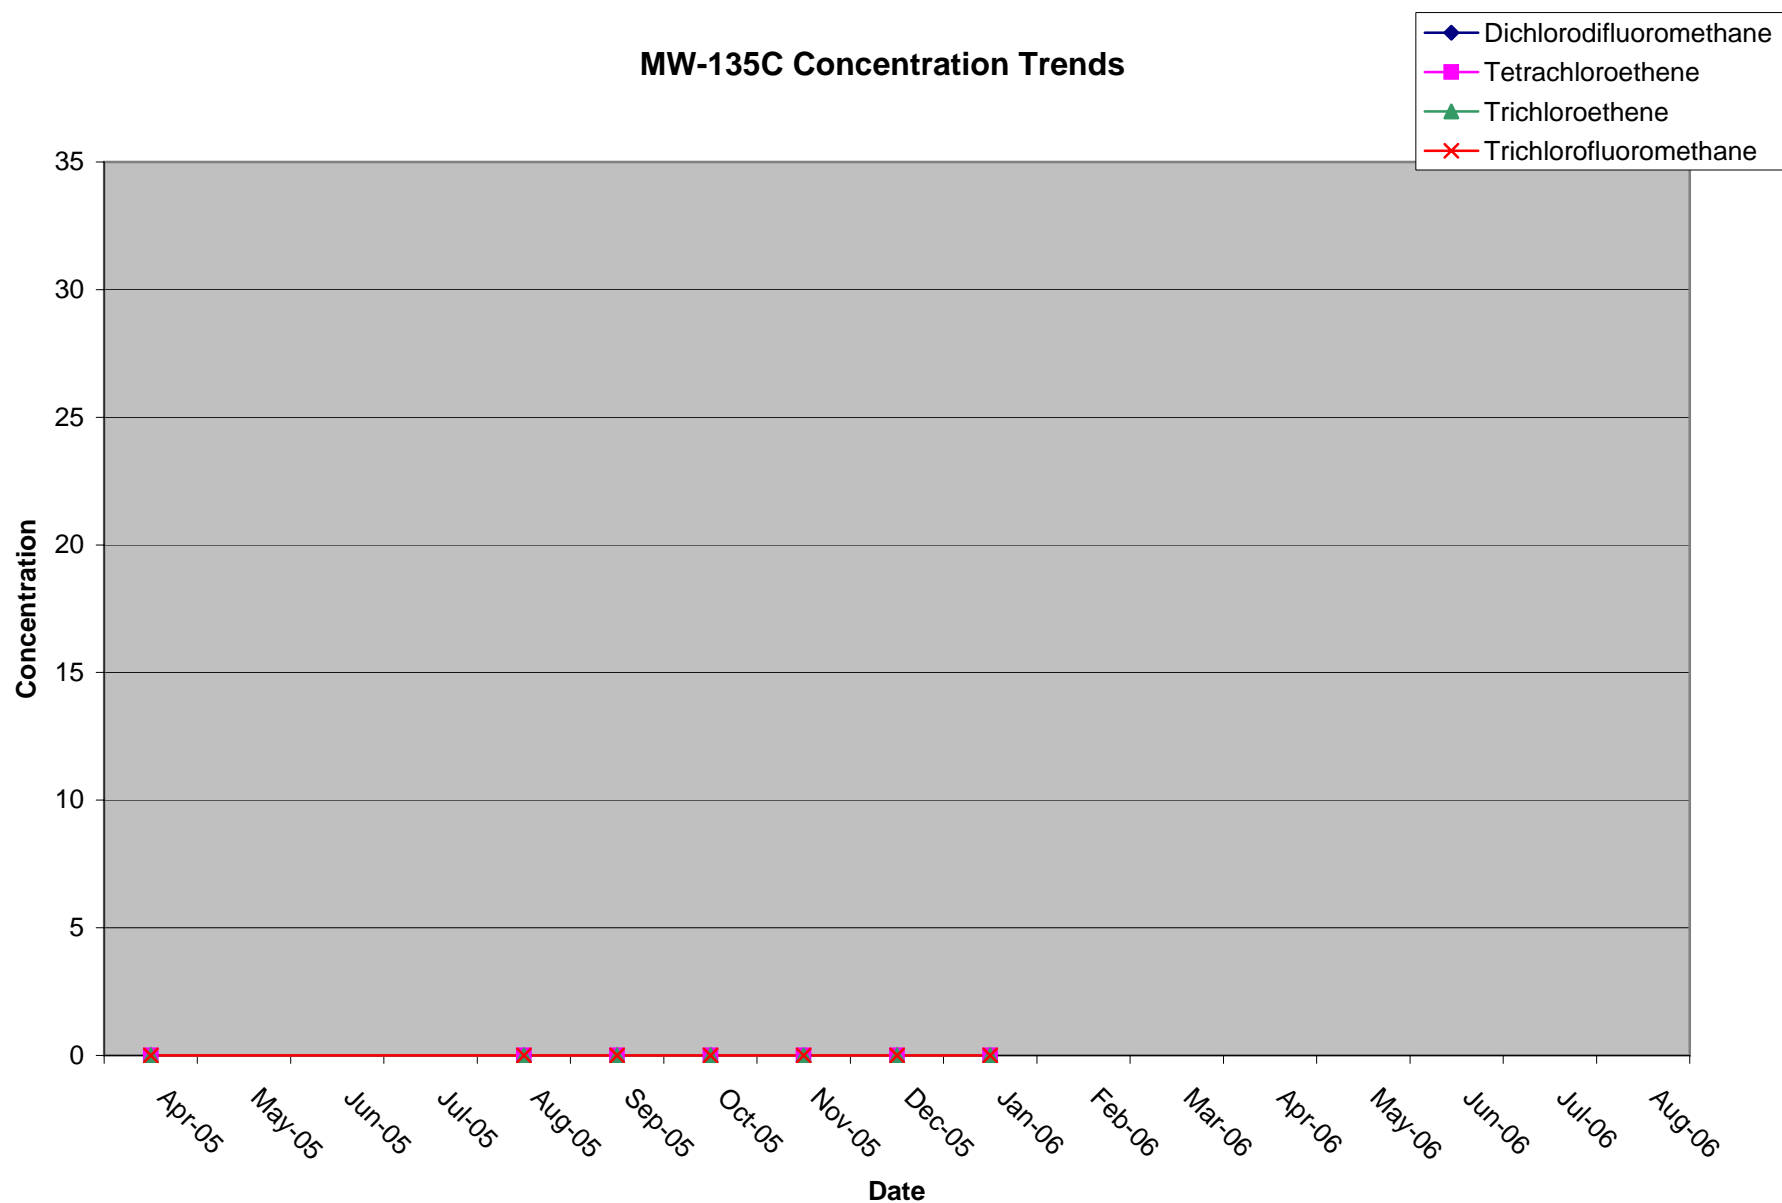

*Analyte results that are non-detect are entered as zero for graphing purposes.

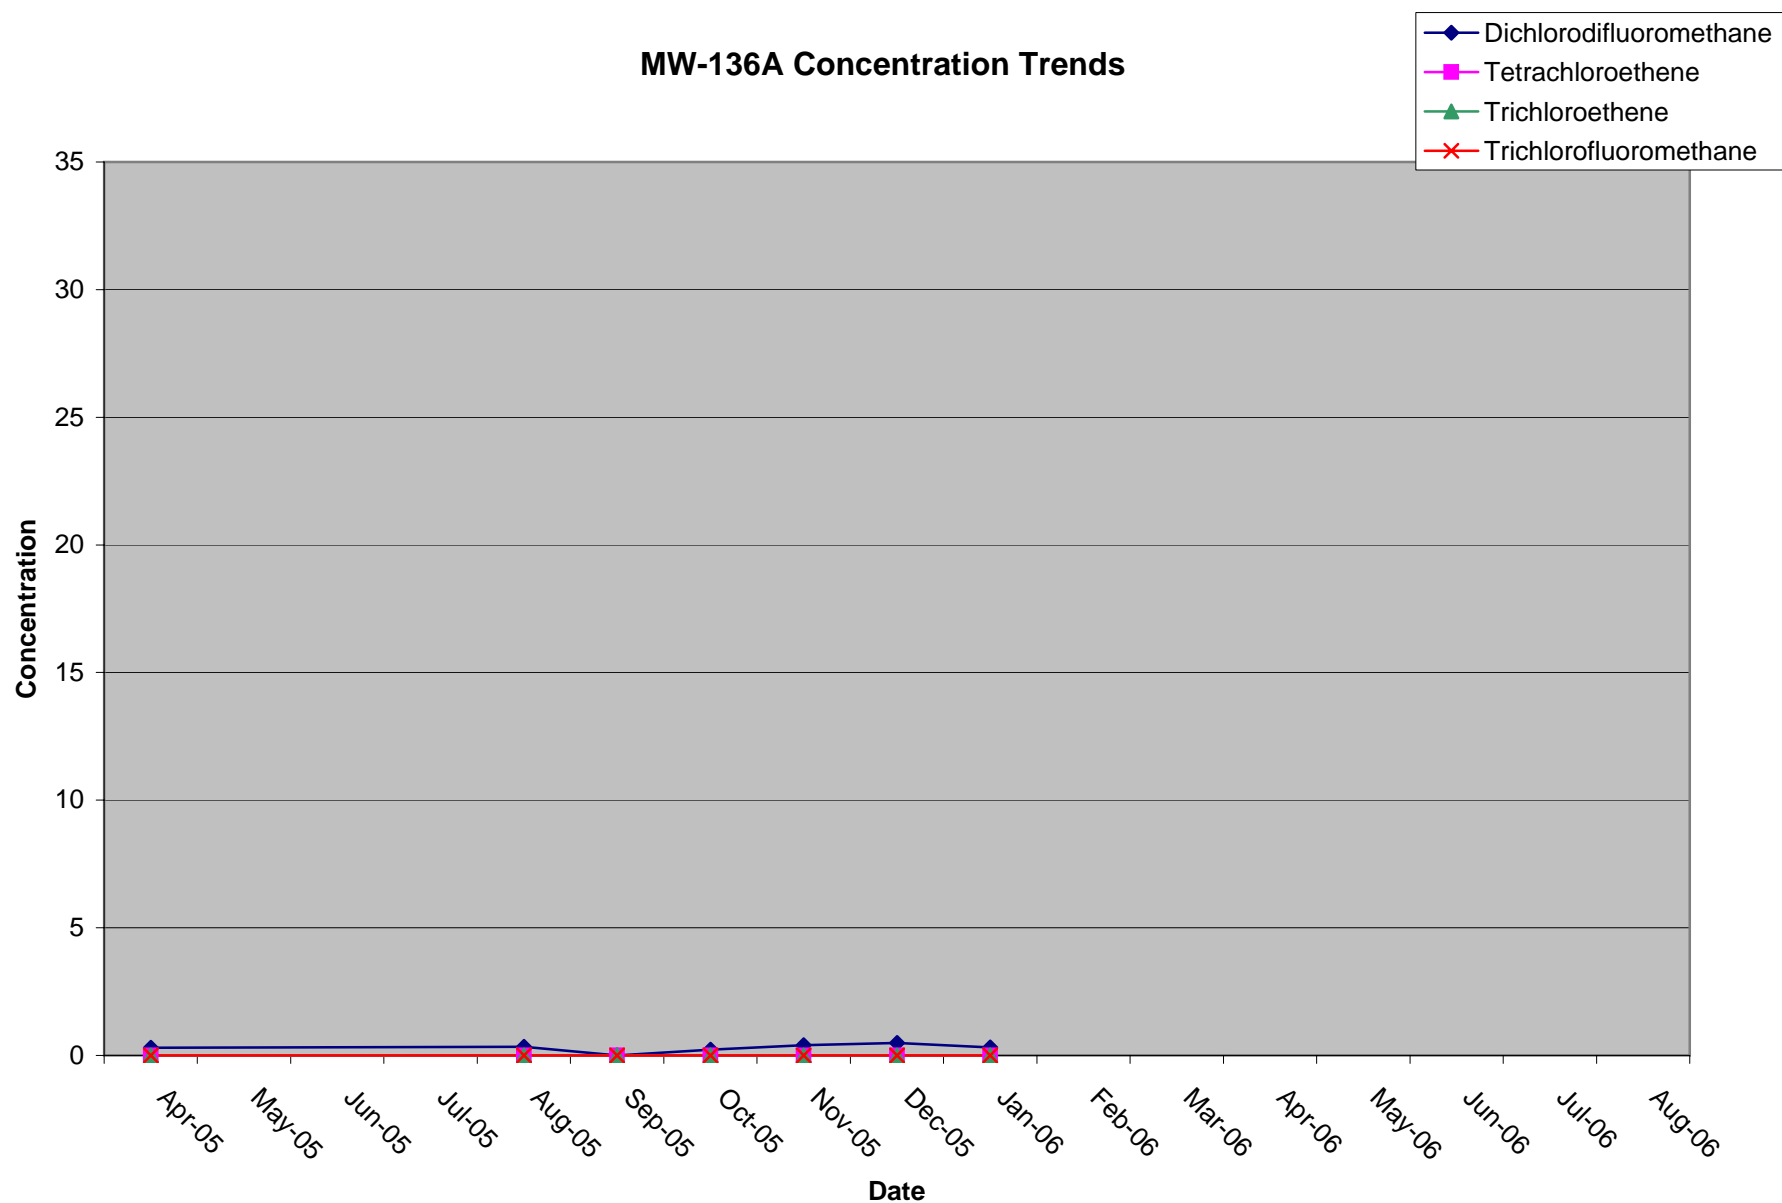

*Analyte results that are non-detect are entered as zero for graphing purposes.

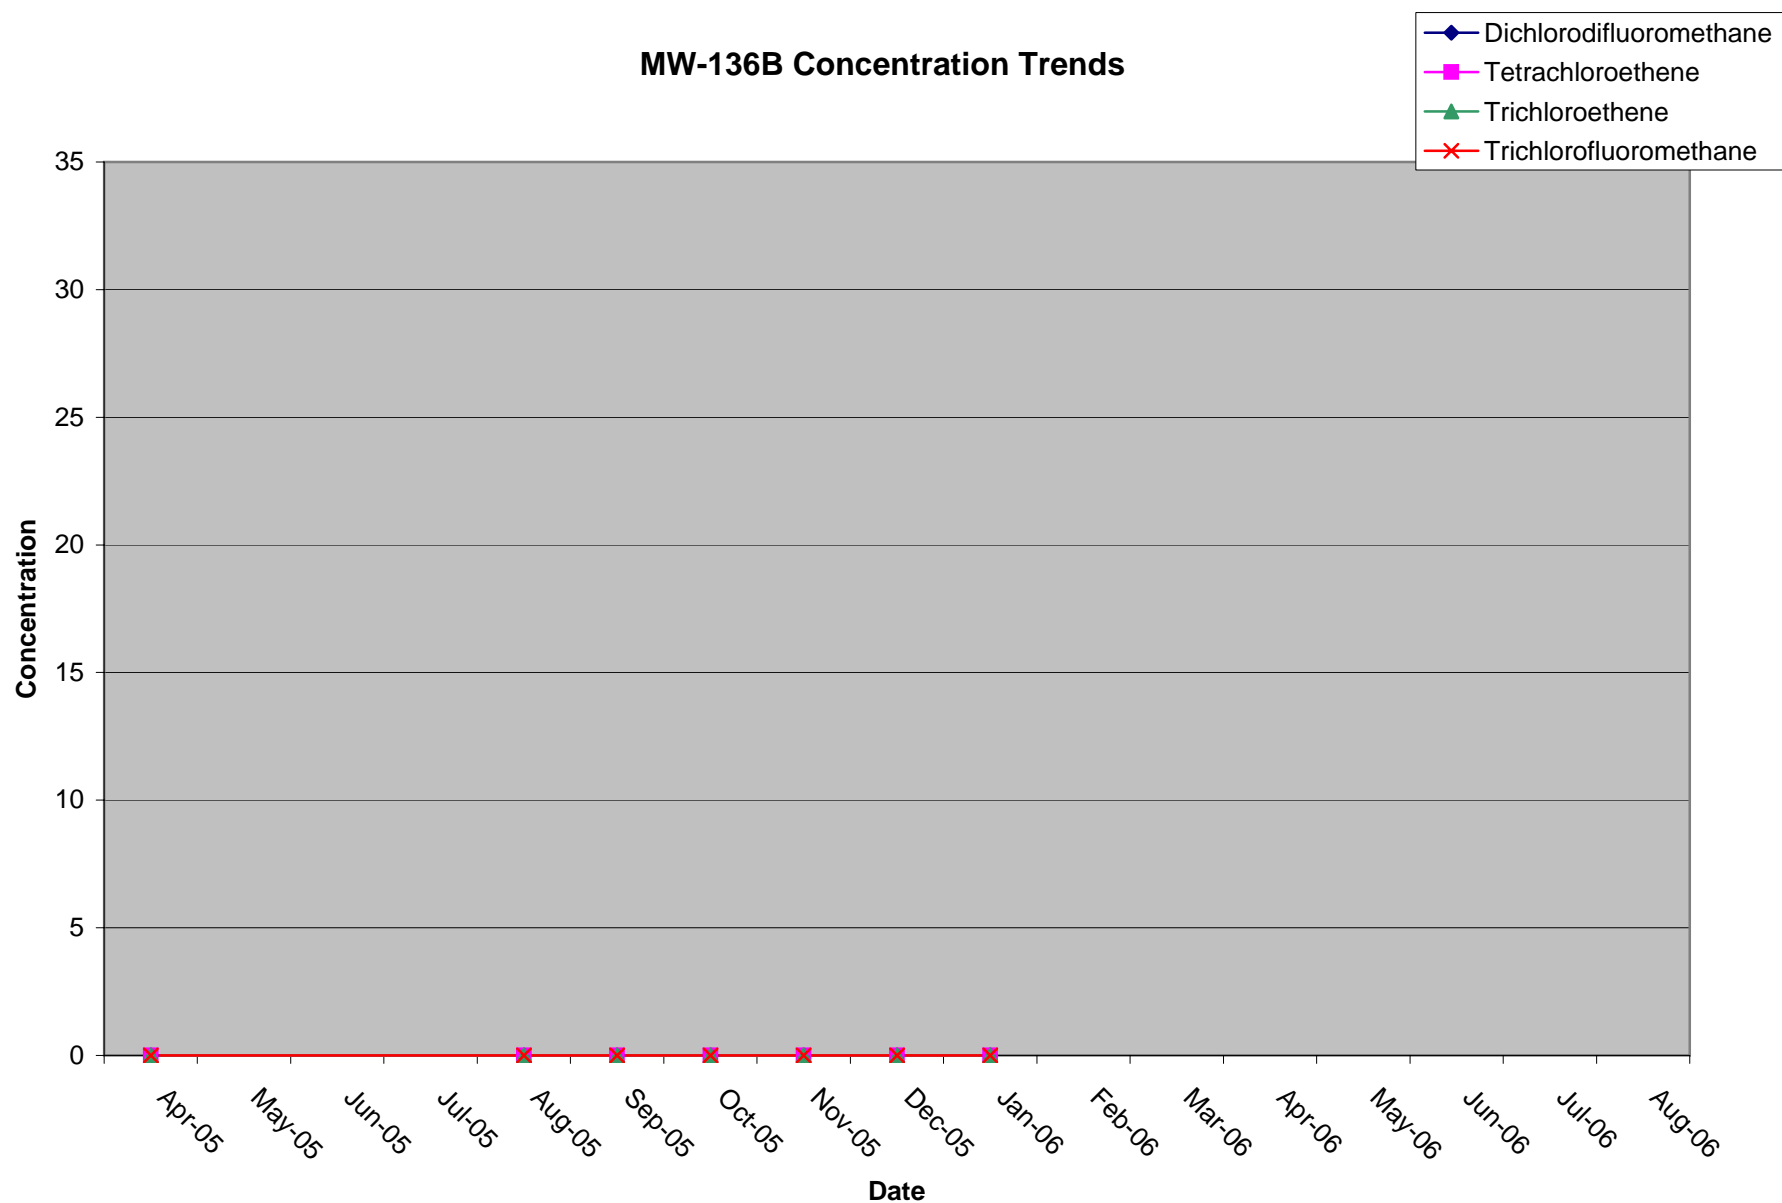

*Analyte results that are non-detect are entered as zero for graphing purposes.

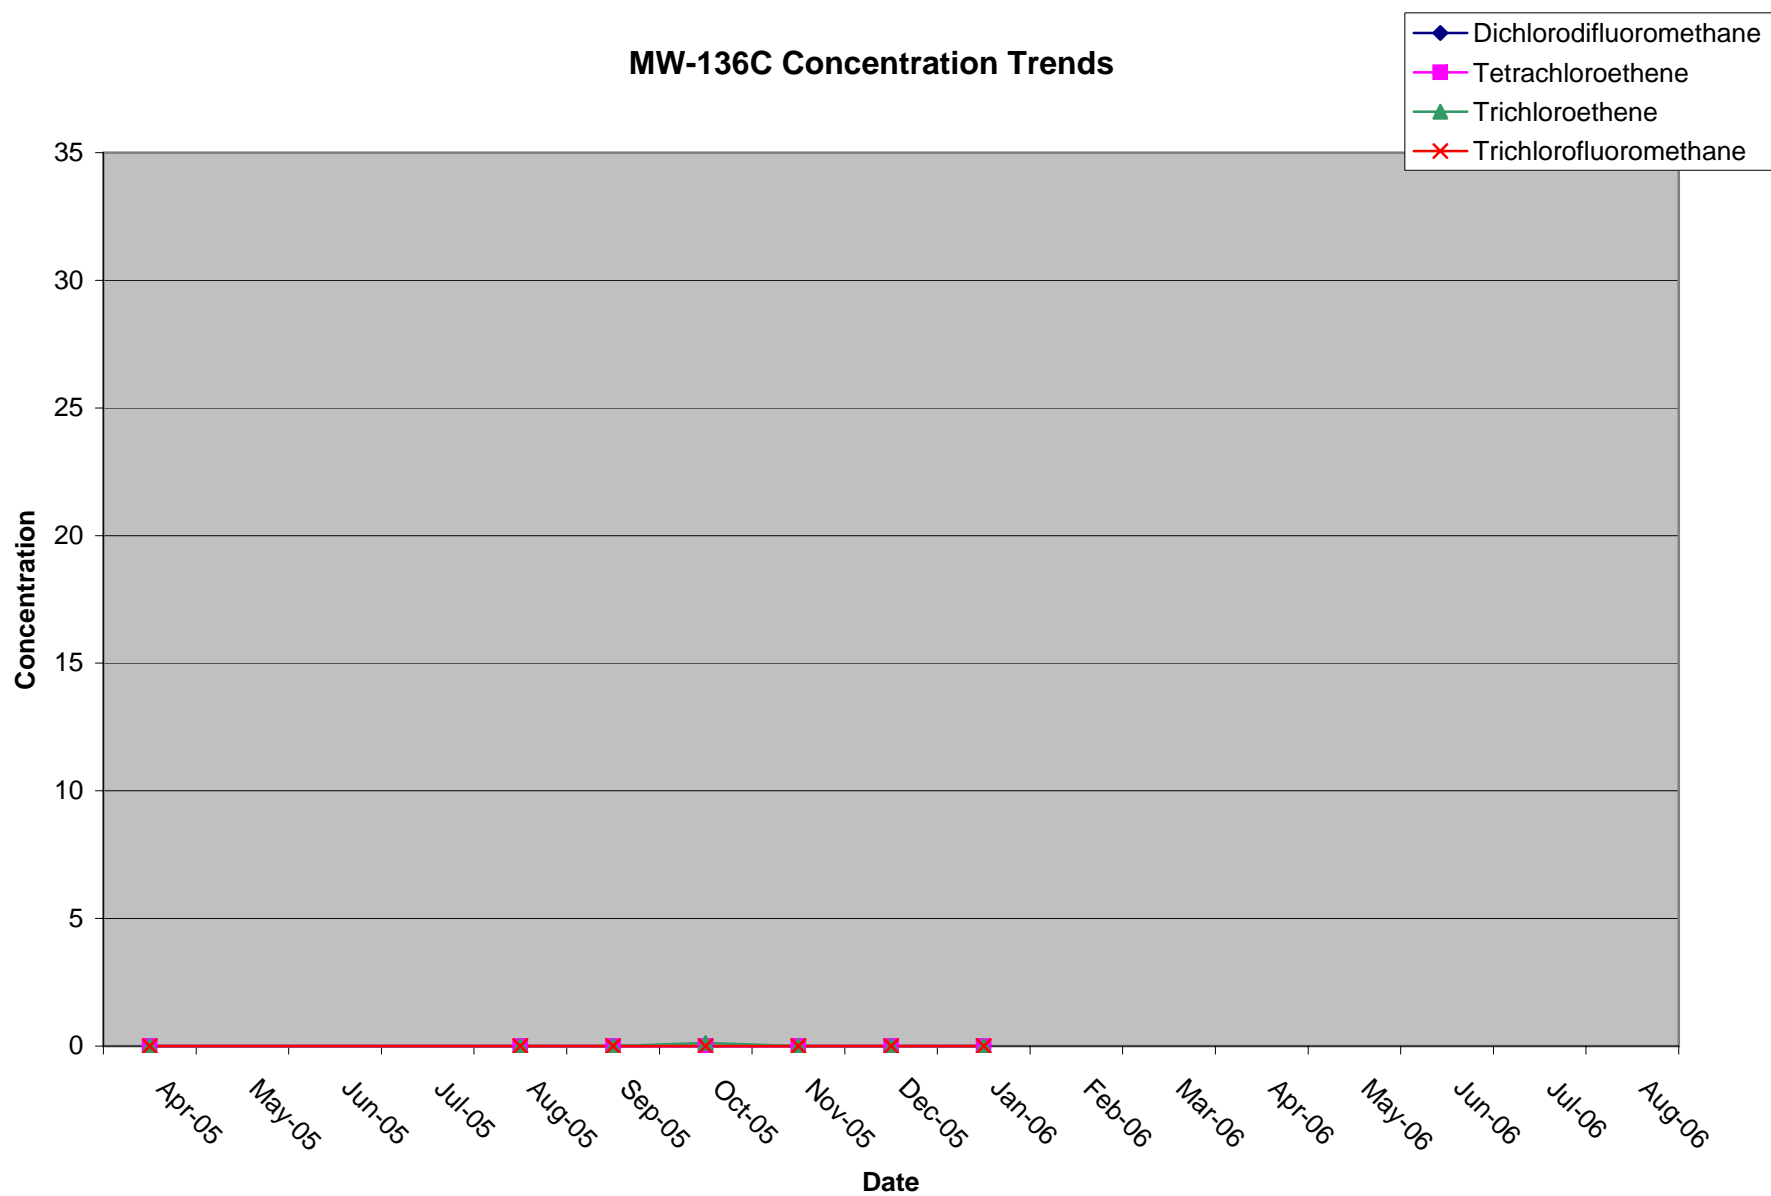

*Analyte results that are non-detect are entered as zero for graphing purposes.

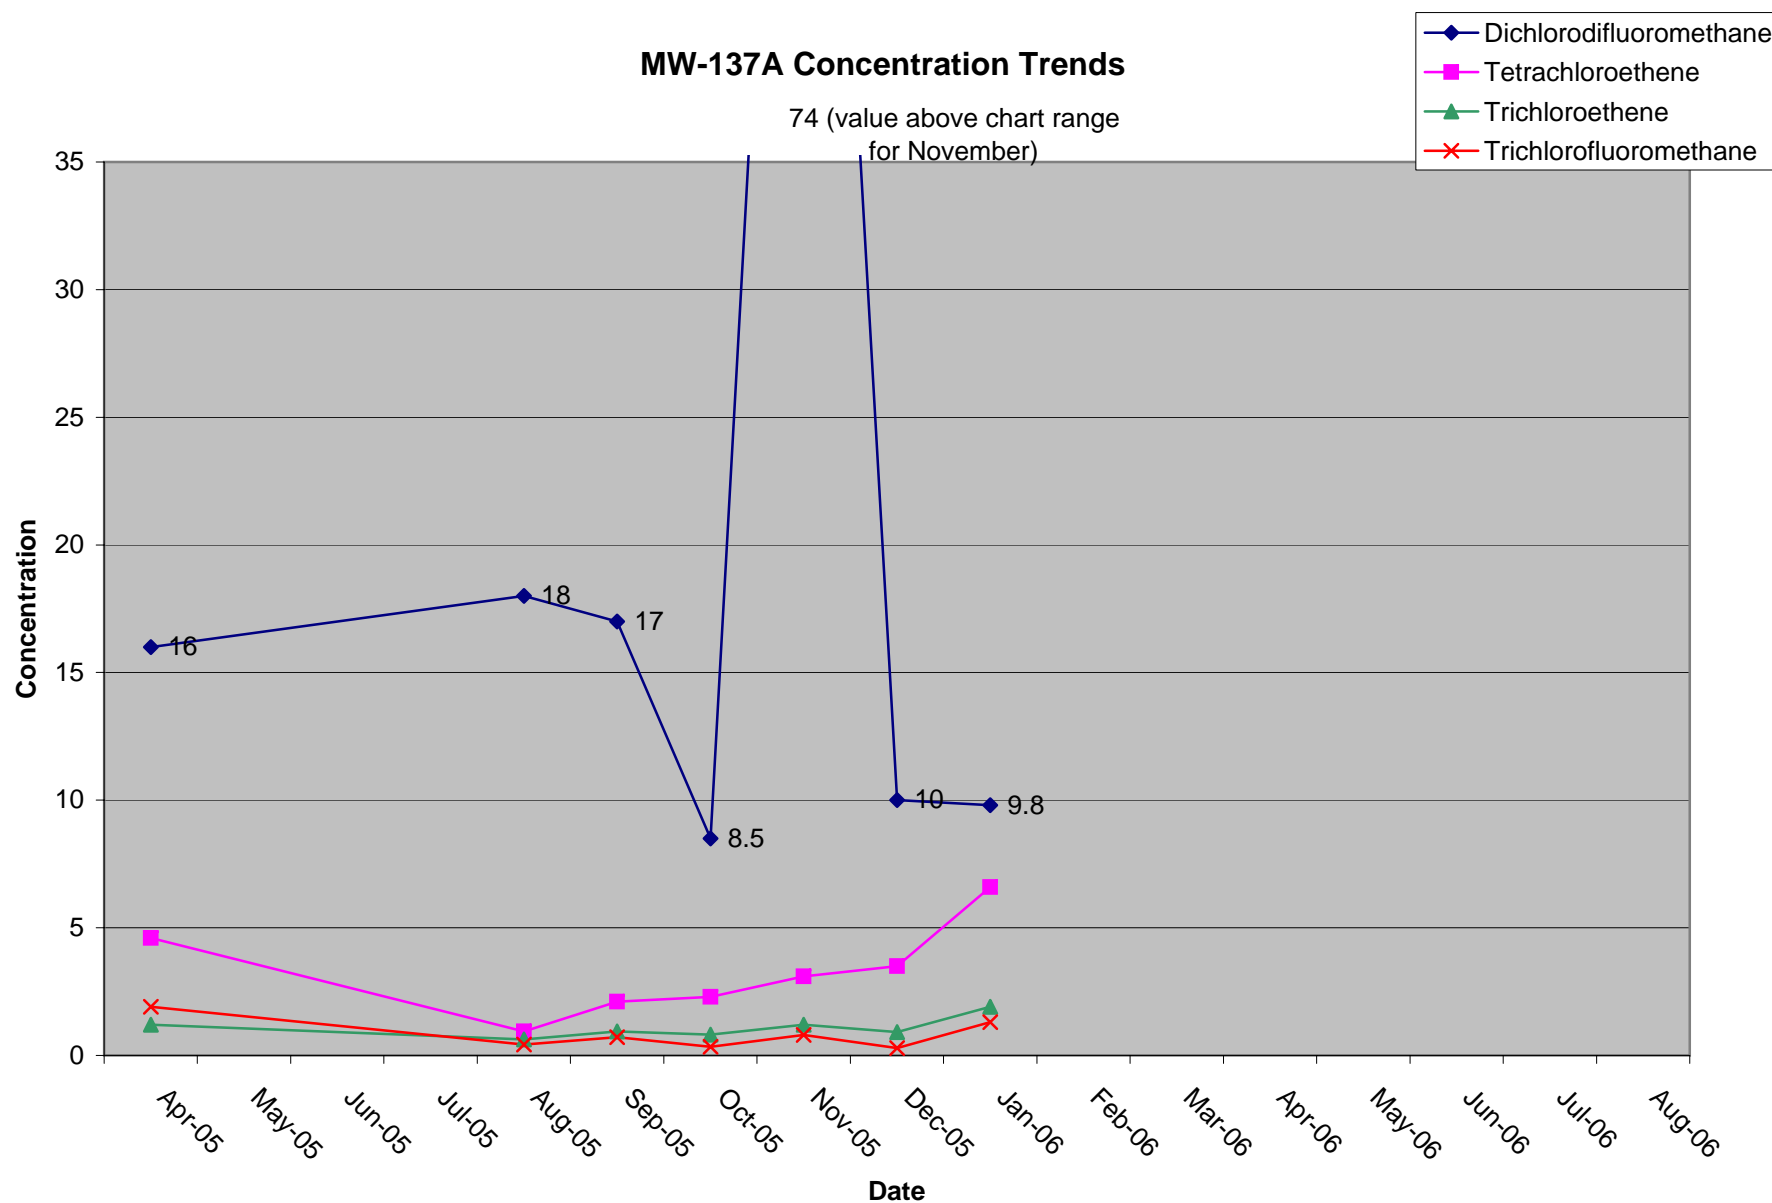

*Analyte results that are non-detect are entered as zero for graphing purposes.

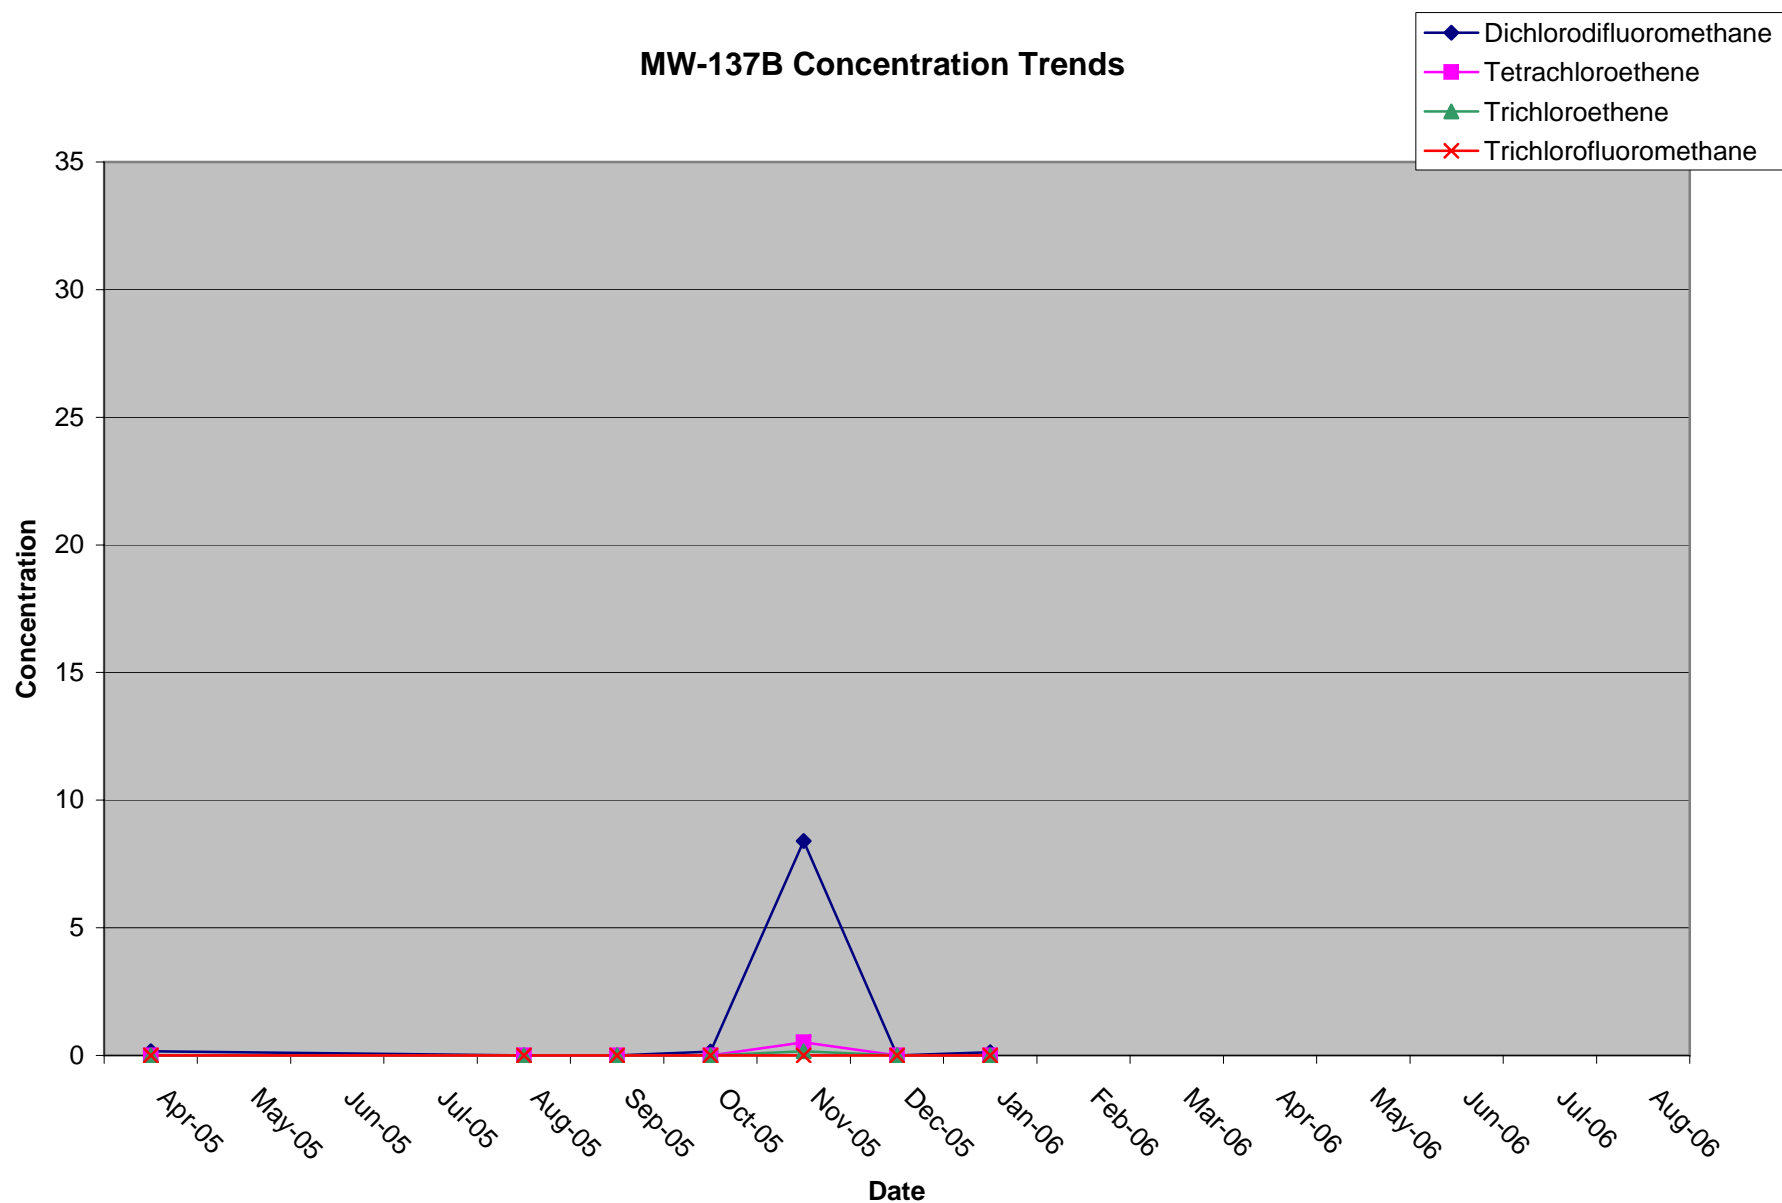

*Analyte results that are non-detect are entered as zero for graphing purposes.

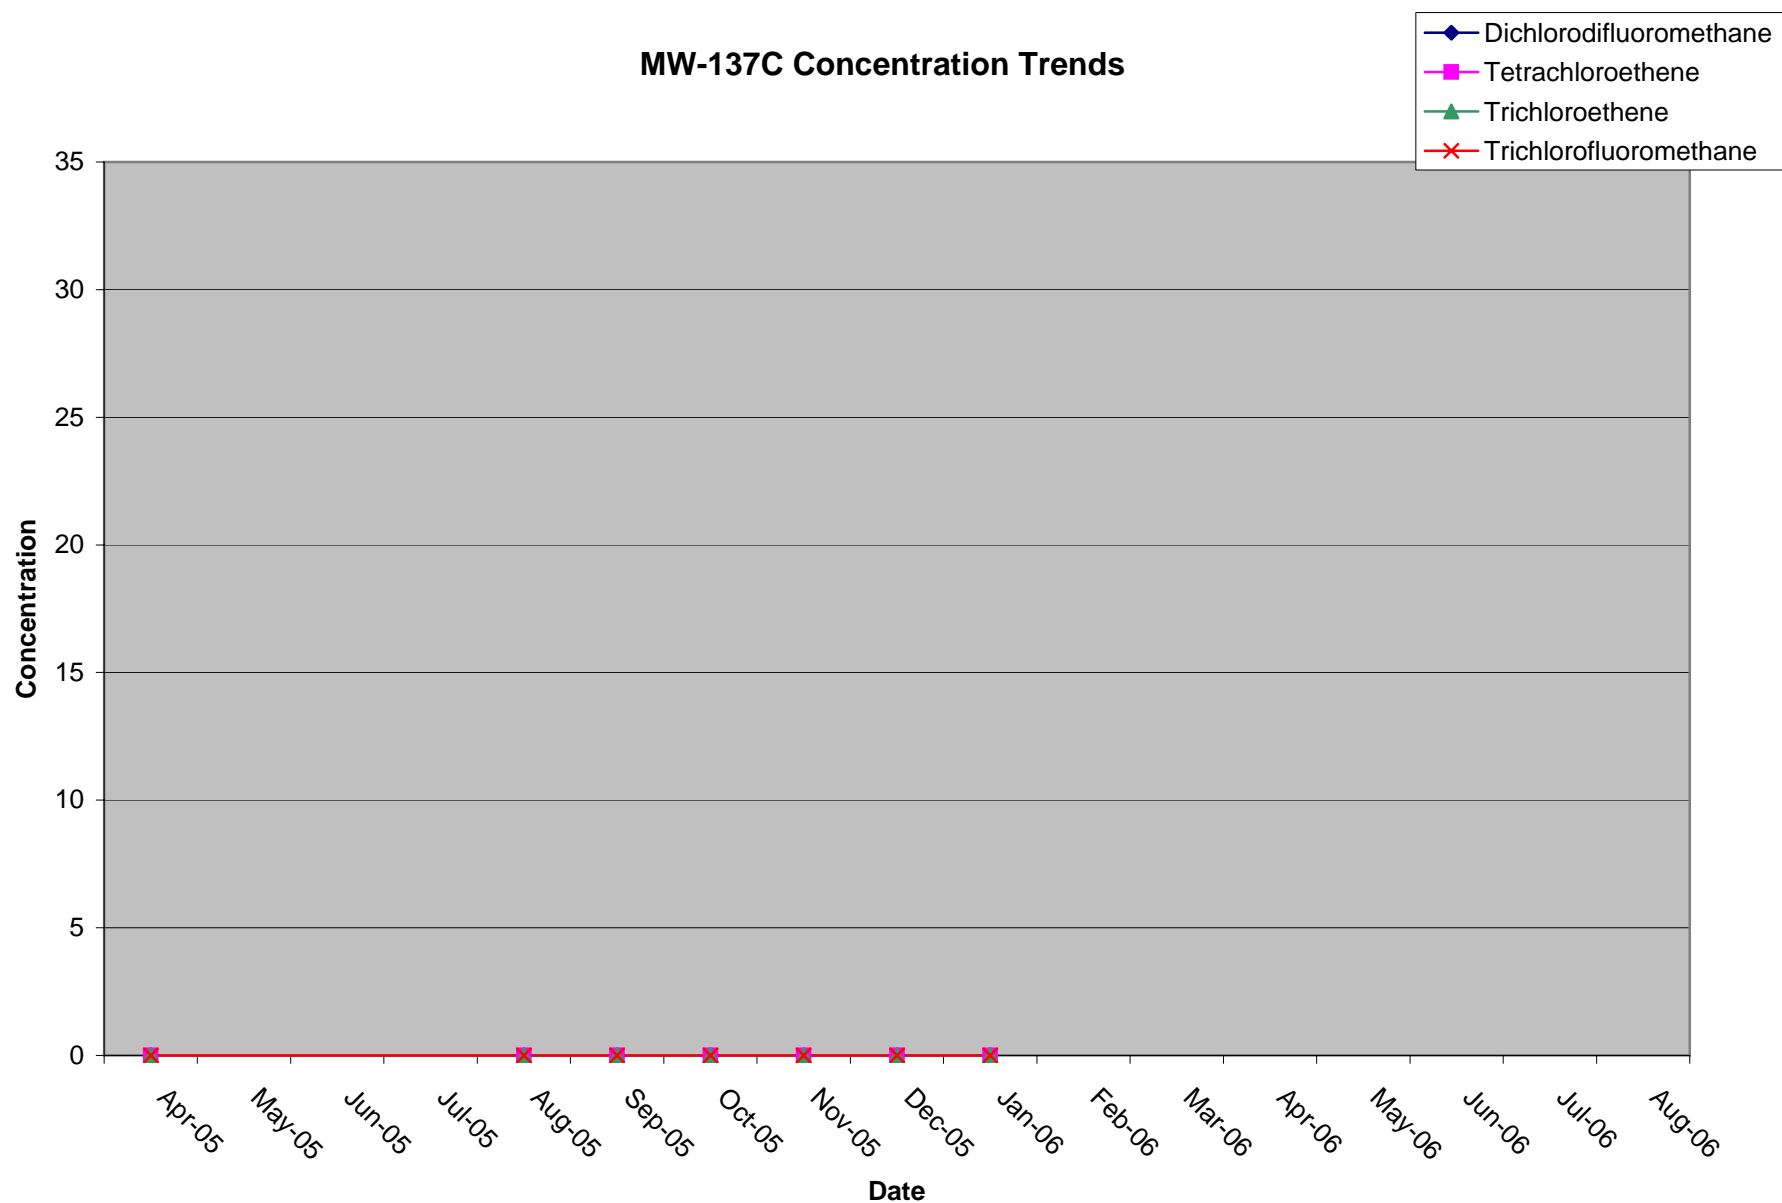

*Analyte results that are non-detect are entered as zero for graphing purposes.

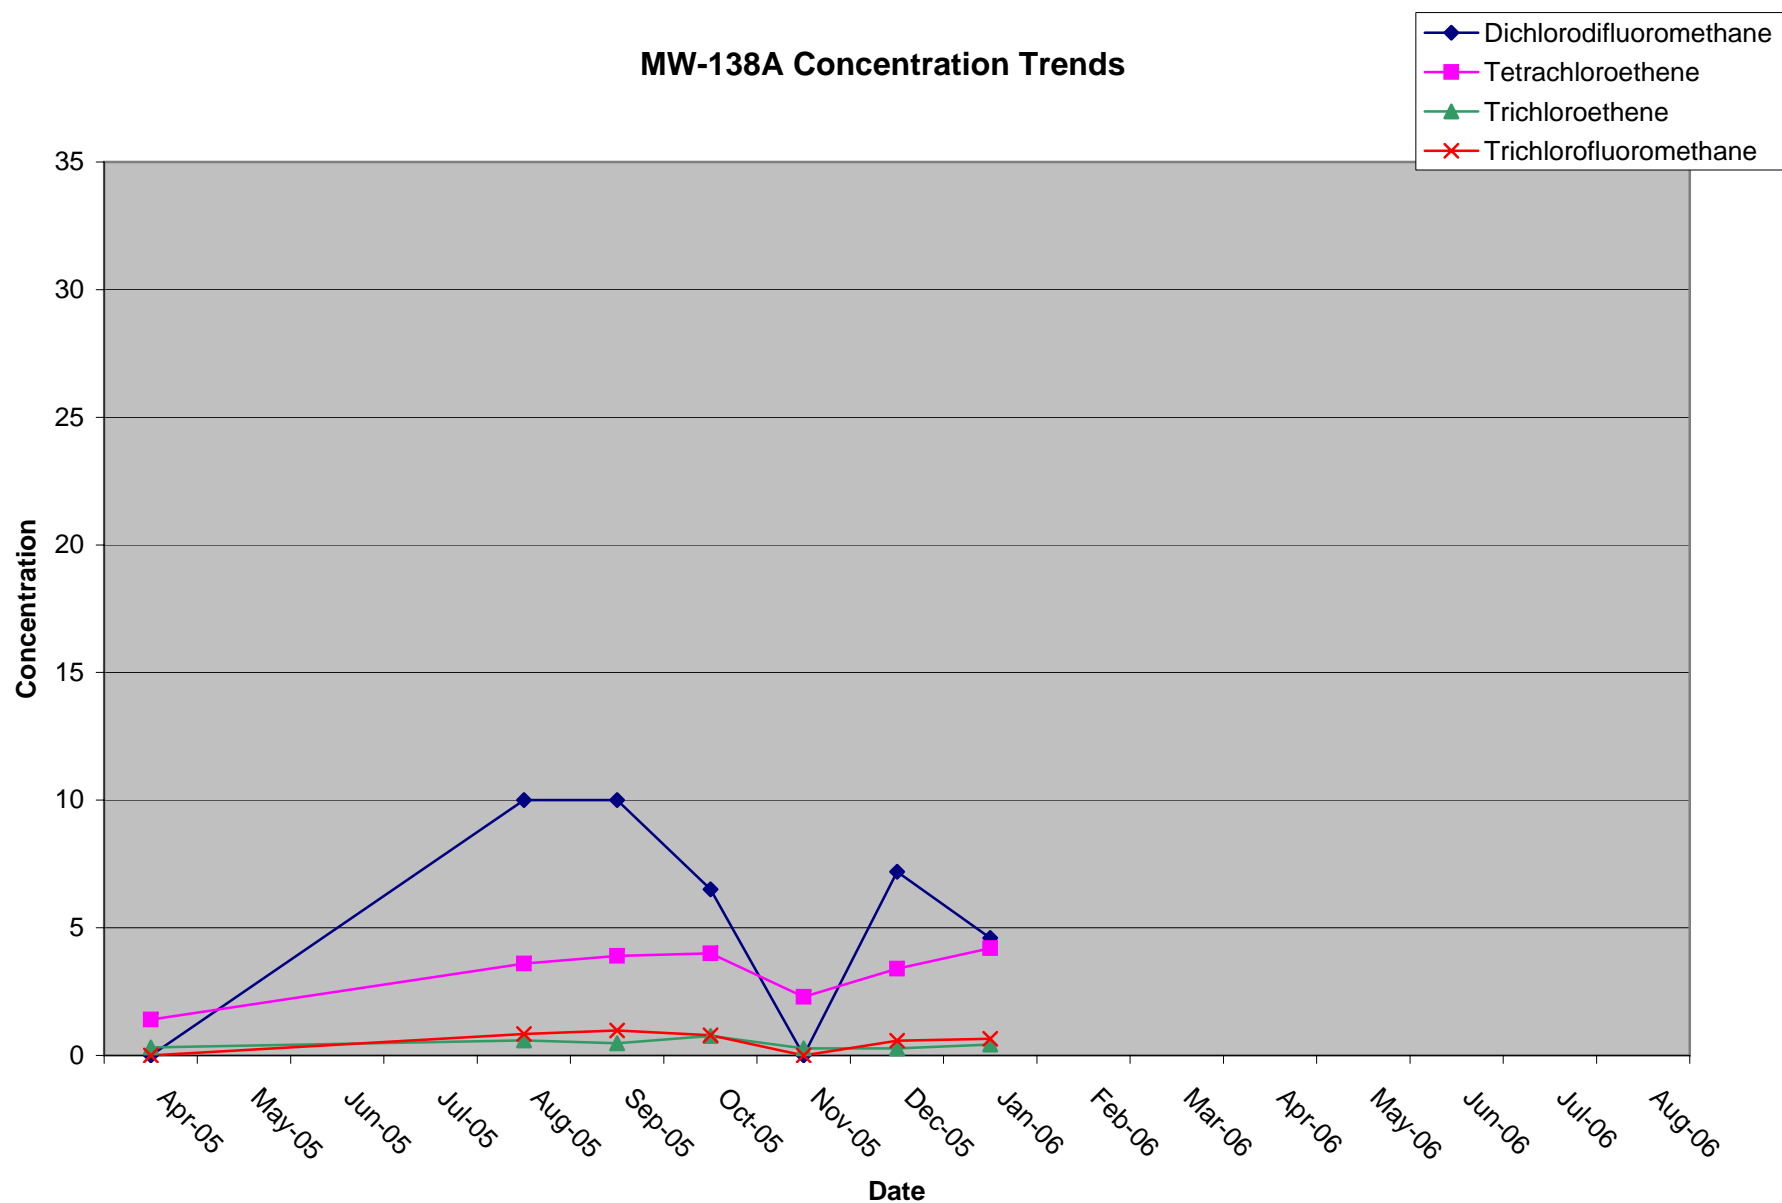

*Analyte results that are non-detect are entered as zero for graphing purposes.

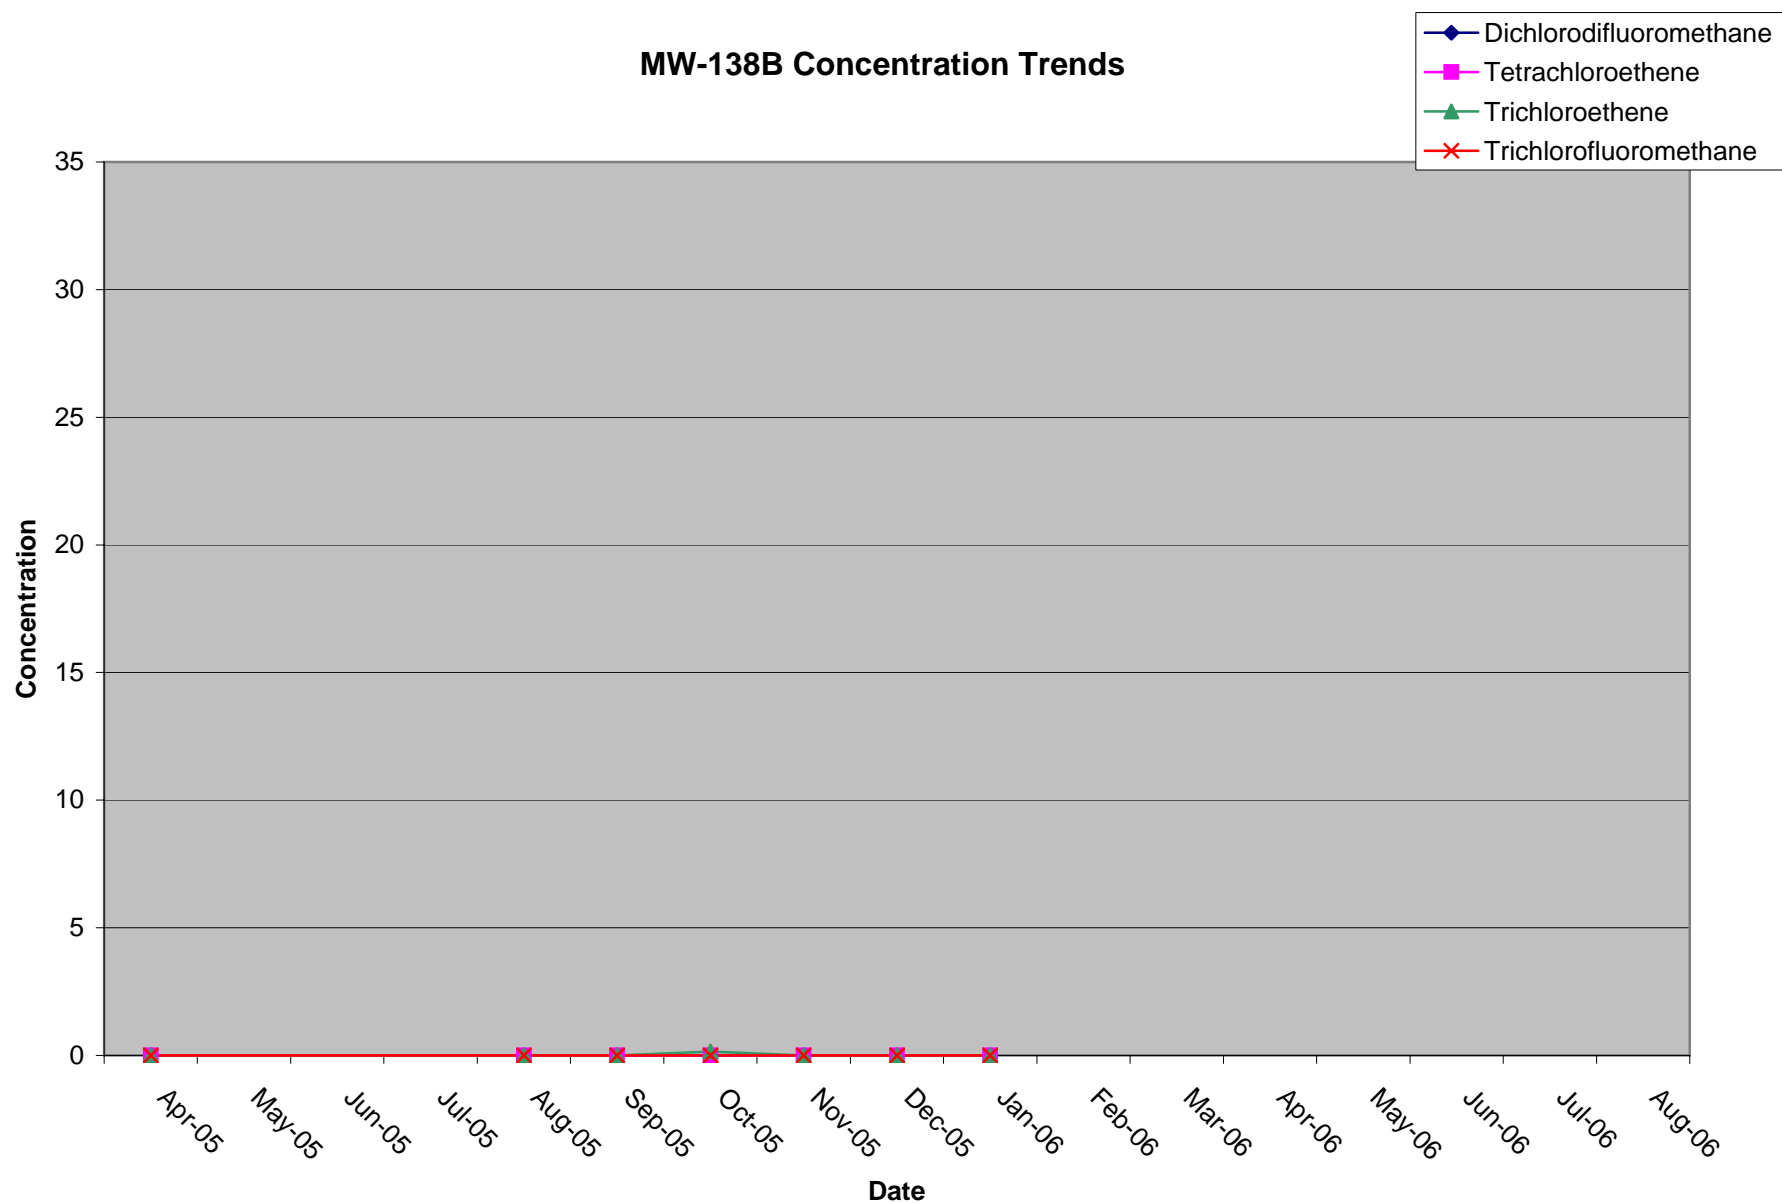

*Analyte results that are non-detect are entered as zero for graphing purposes.

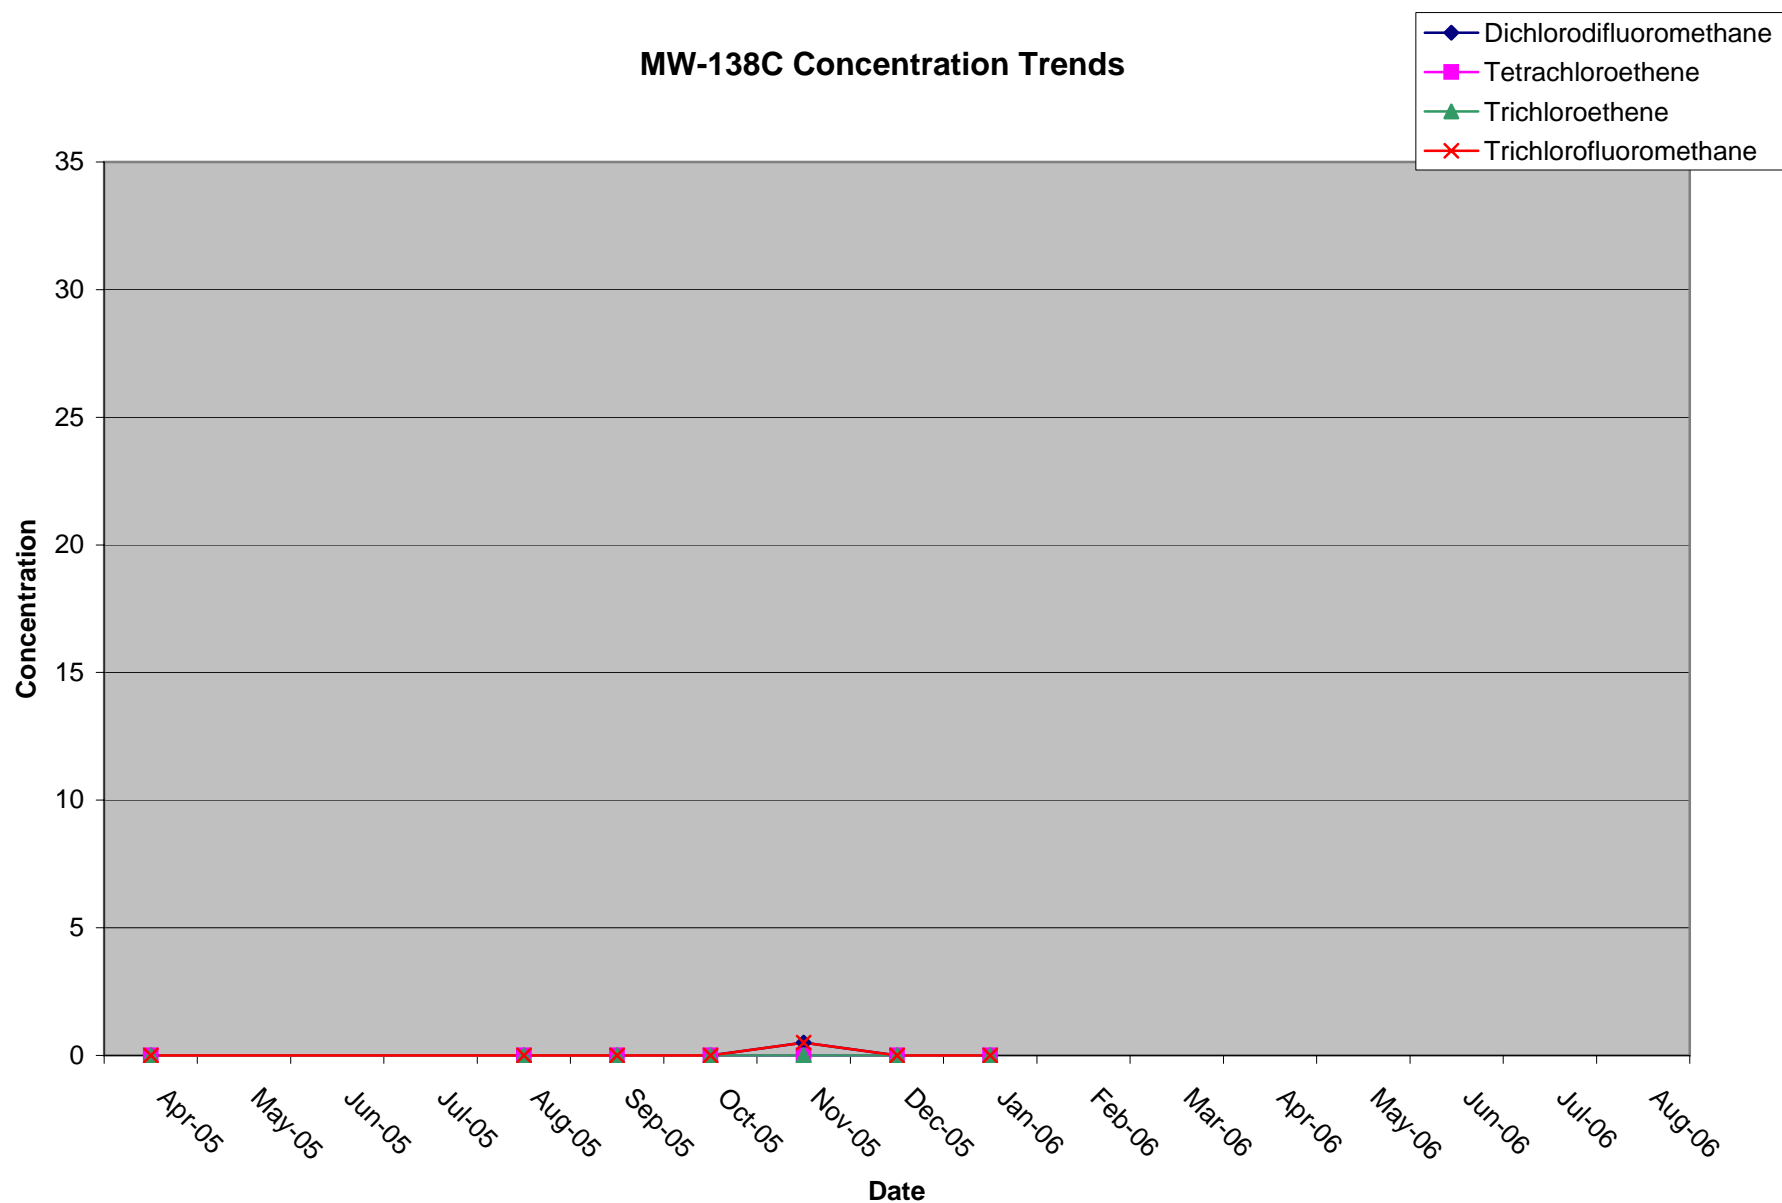

*Analyte results that are non-detect are entered as zero for graphing purposes.

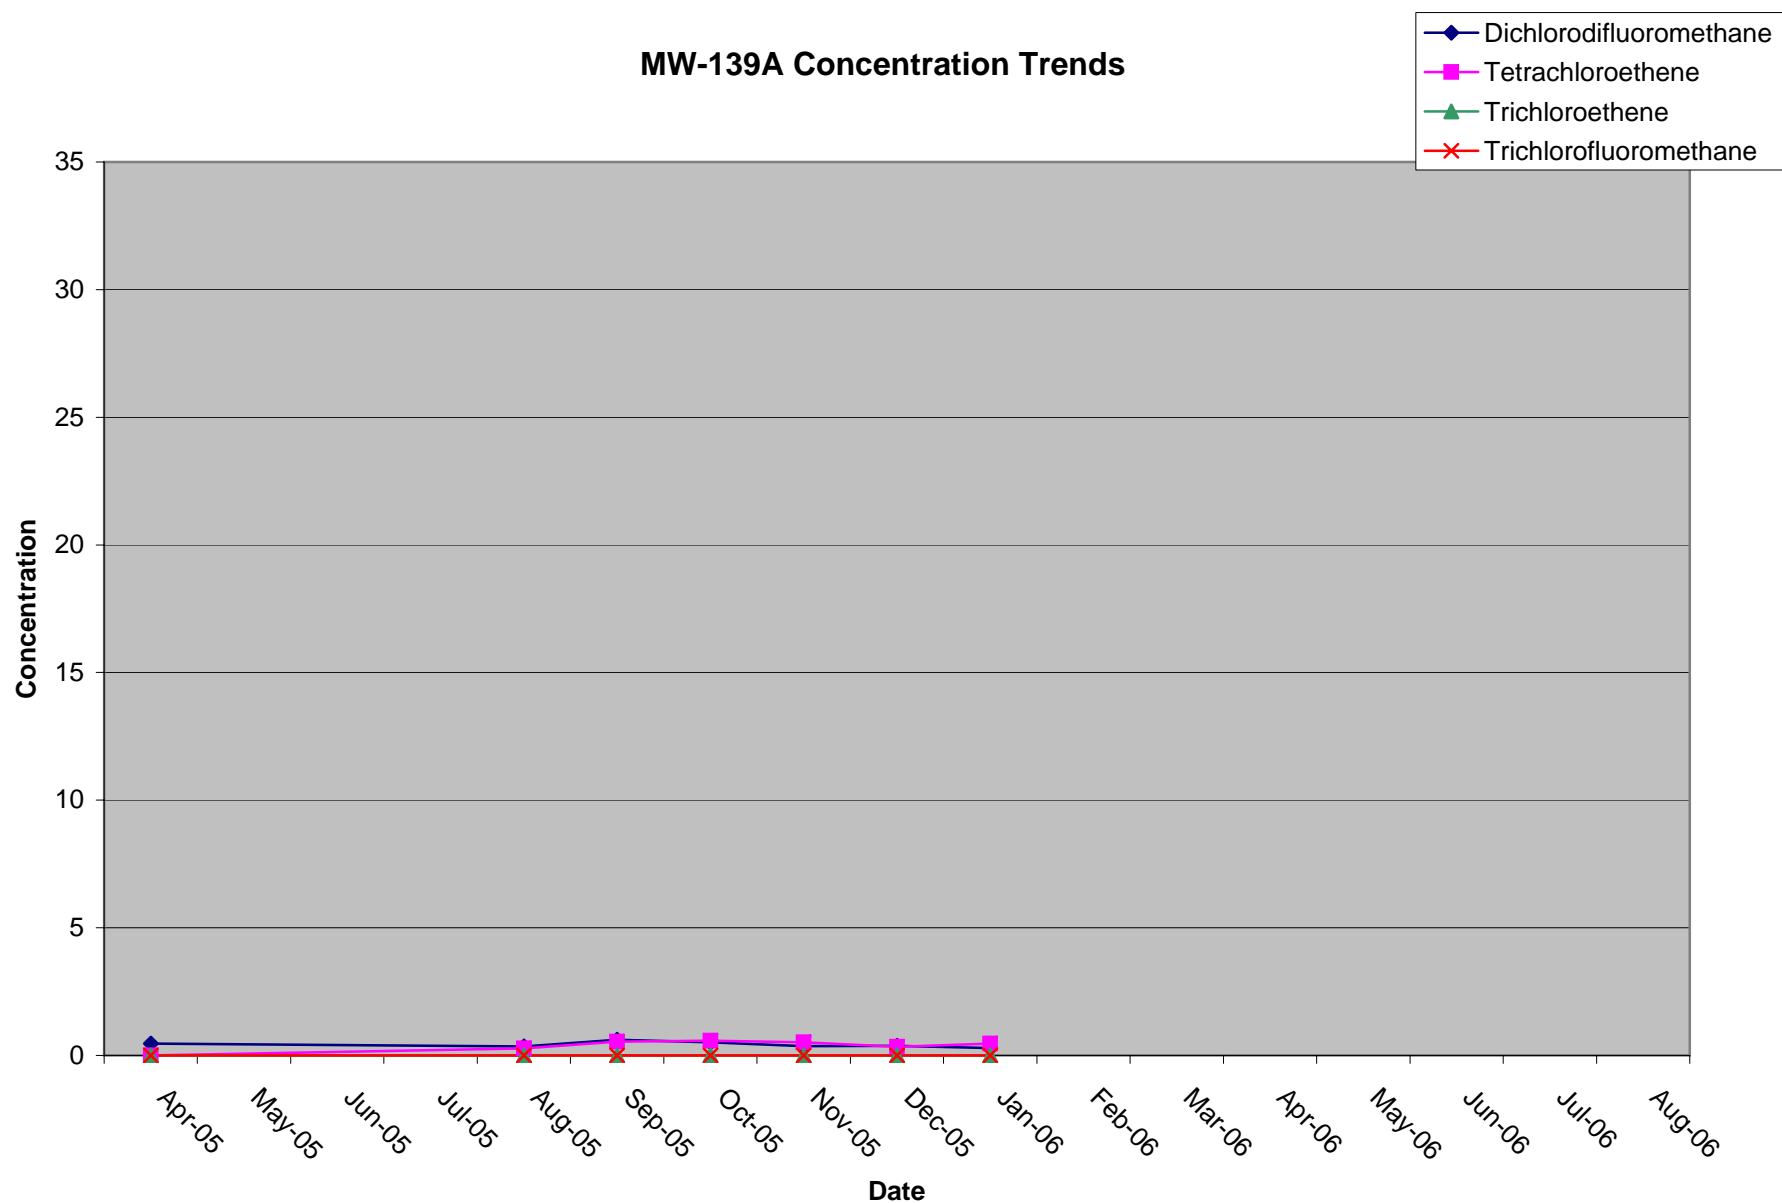

*Analyte results that are non-detect are entered as zero for graphing purposes.

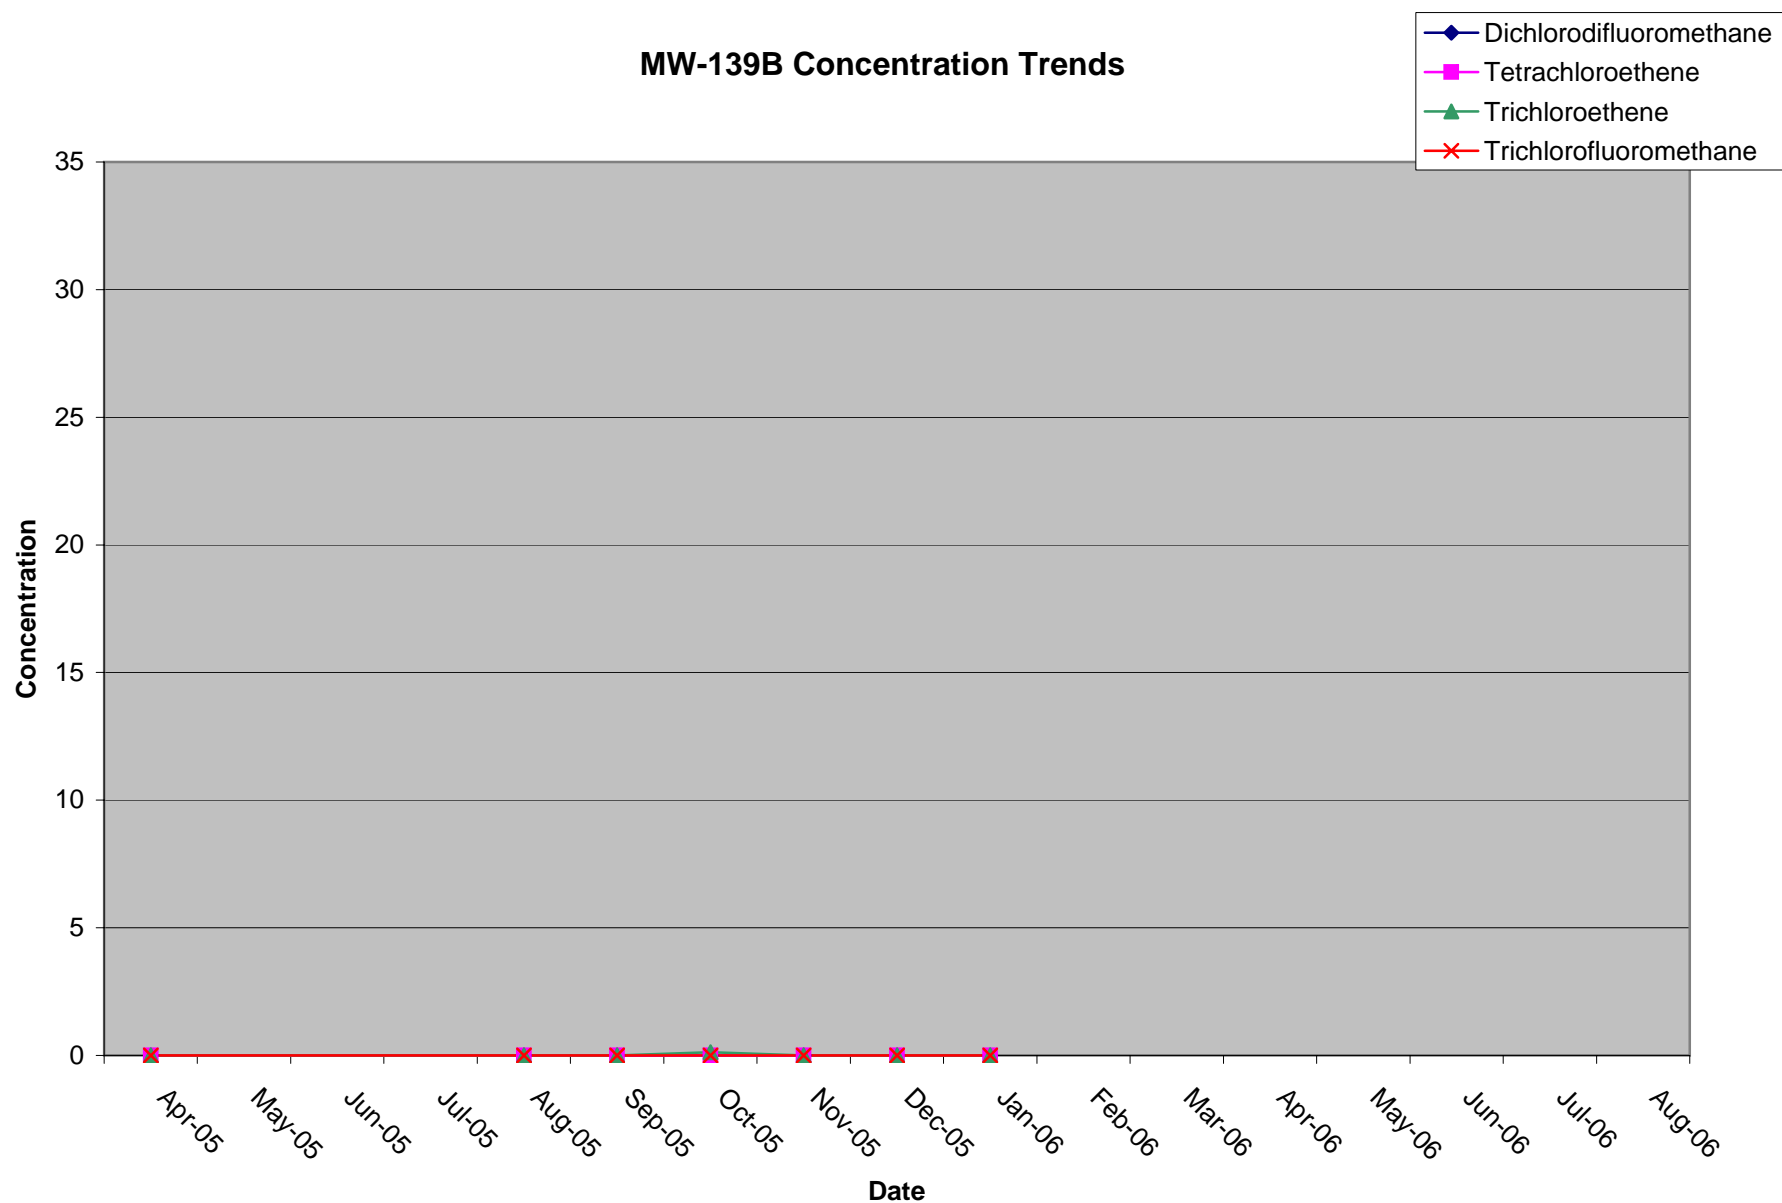

*Analyte results that are non-detect are entered as zero for graphing purposes.

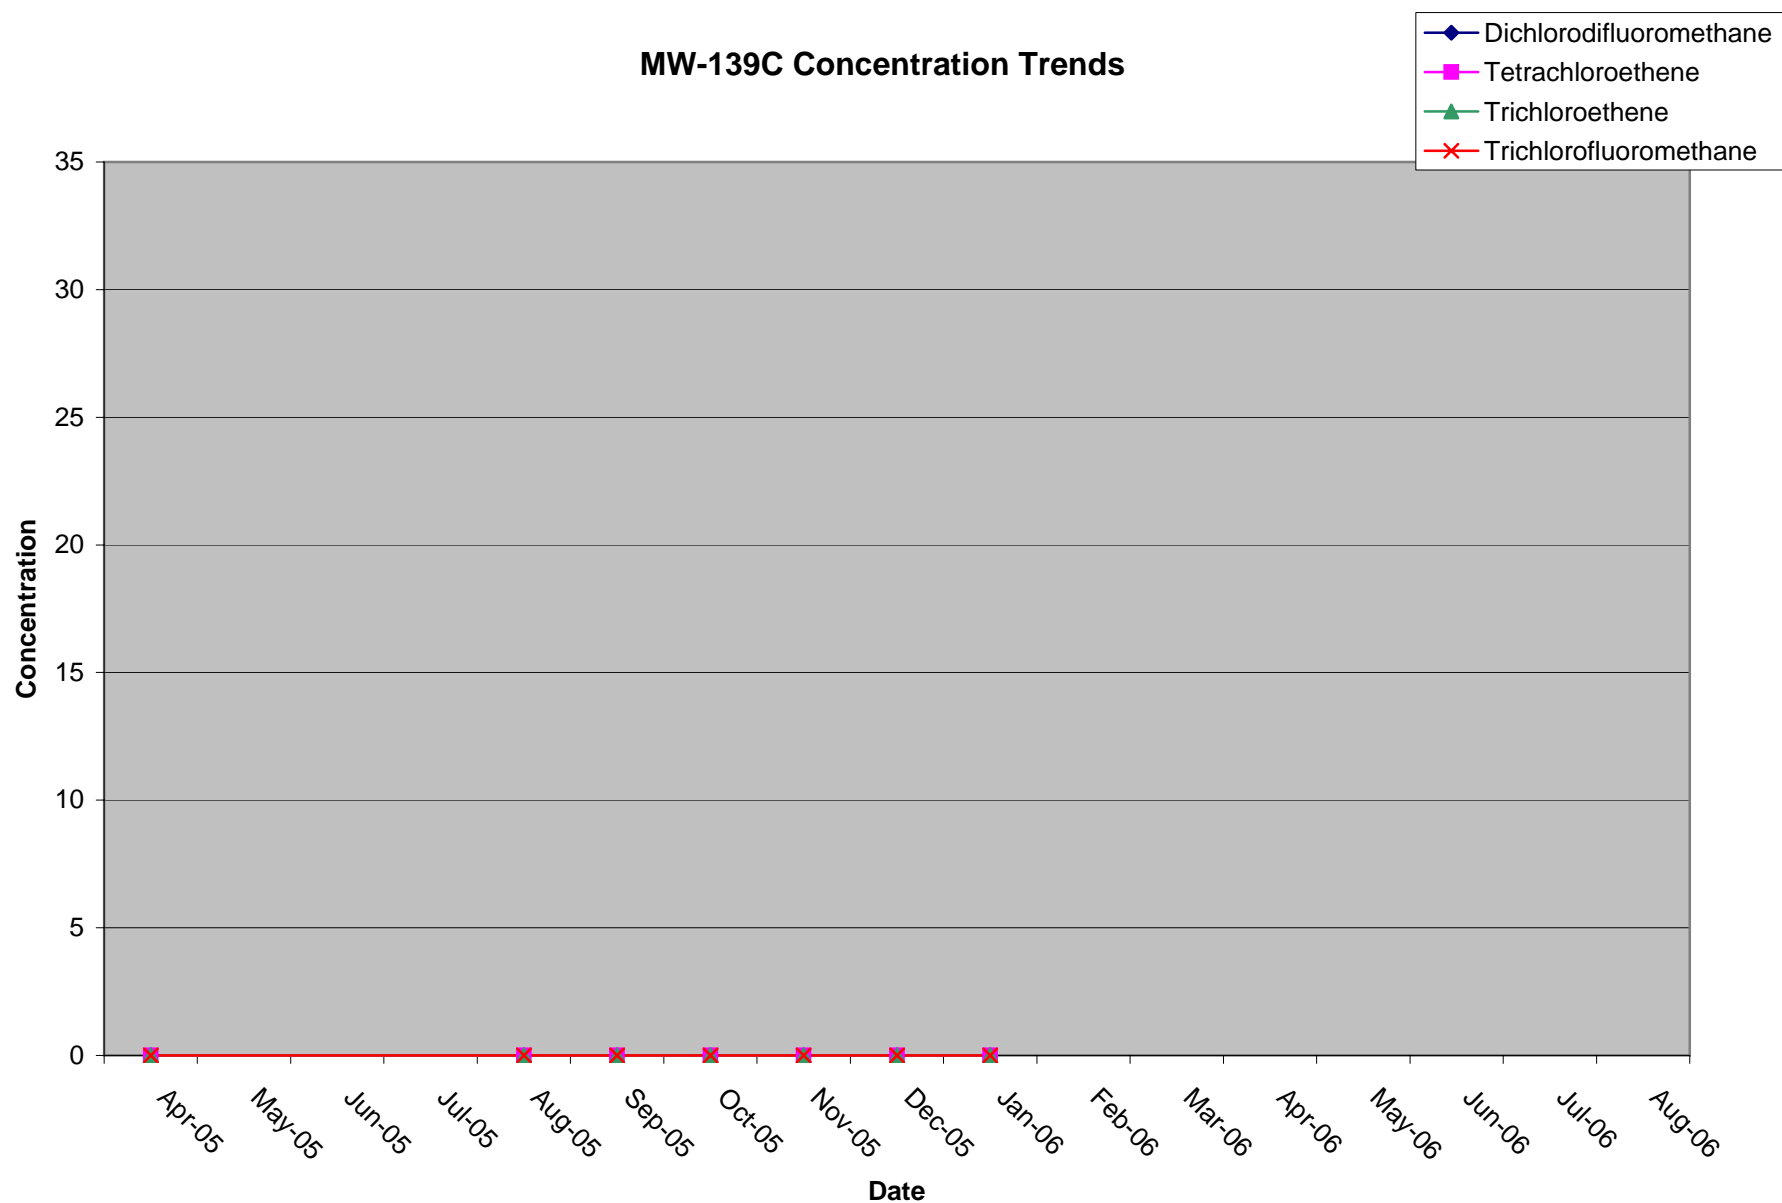

*Analyte results that are non-detect are entered as zero for graphing purposes.

*Analyte results that are non-detect are entered as zero for graphing purposes.
